ALGERIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Democratic and Popular Republic of Algeria lies in north Africa, with the Mediterranean Sea to the north, Mali and Niger to the south, Tunisia and Libya to the east, and Morocco and Mauritania to the west. The climate on the coast is temperate, becoming more extreme in the Atlas mountains immediately to the south. The Sahara, further south, is hot and arid. Arabic is the official language but French is still widely used. There is a considerable Berber-speaking minority. Islam is the state religion. The national flag (proportions 3 by 2) has equal vertical stripes of green and white, with a red crescent moon and five-pointed red star superimposed in the centre. The capital is Algiers (El Djazair).

Recent History

Until 1962 Algeria was part of the French Republic, "attached" to metropolitan France. Economic and political power was in the hands of a large white-settler population. In 1954 the native Muslim majority, led by the *Front de libération nationale* (FLN), began a war for national independence, in which over a million Muslims died. Despite resistance from the Europeans in Algeria, the French government agreed to a cease-fire in March 1962 and independence was declared on July 3rd, 1962. In August the Algerian provisional government transferred its functions to the Political Bureau of the FLN, and in September a National Constituent Assembly was elected (from a single list of FLN candidates) and the Republic proclaimed. A new government was formed, with Ahmed Ben Bella, founder of the FLN, as Prime Minister.

A draft constitution, providing for a presidential regime with the FLN as the sole party, was adopted by the Constituent Assembly in August 1963. In September the constitution was approved by popular referendum and Ben Bella was elected President. Under his leadership economic reconstruction was begun and the foundation was laid for a single-party socialist state. However, the failure of the FLN to function as an active political force left real power with the bureaucracy and the army. In June 1965 the Minister of Defence, Col. Houari Boumedienne, deposed Ben Bella in a bloodless *coup* and took control of the state as President of a Revolutionary Council of 26 members, chiefly army officers.

Boumedienne faced considerable opposition from the Left but by 1971 the government felt strong enough to adopt a more active social policy. French petroleum interests were nationalized and an agrarian reform programme was initiated. In June 1975 Boumedienne announced a series of measures to consolidate the regime and his personal power, including the drawing up of a National Charter and a new Constitution, and the holding of elections for a President and National Assembly. These actions provoked a resurgence of opposition dormant since the 1960s. However, after the publication in April 1976 of the National Charter, which lays down the principles and plans for creating a socialist system and maintaining Islam as the state religion, the administration

encouraged public discussion and responded to criticisms by amending the Charter. In a referendum in June the Charter was adopted by 98.5 per cent of the electorate. A new Constitution (*see below*), embodying the principles of the Charter, was approved by another referendum in November, and in December 10th Boumedienne was elected President unopposed with over 99 per cent of the votes cast. The new formal structure of power was completed in February 1977 by the election of FLN members to the National Assembly.

In December 1978, President Boumedienne died, the Council of the Revolution (now consisting of only eight members) taking over the government. The January 1979 FLN Congress (the first for 15 years) adopted a new party structure, electing a Central Committee envisaged as the highest policy-making body both of the party and of the nation as a whole: this Committee was to choose a party leader who would automatically become the sole presidential candidate. Their choice of Col. Bendjedid Chadli, commander of Oran military district, was upheld by a national referendum in February, and was seen as representing a compromise between liberal and radical contenders. Unlike Boumedienne, Chadli appointed a Prime Minister, Col. Mohamed Abdelghani, anticipating constitutional changes which were approved by the National Assembly in June and which included the obligatory appointment of a Prime Minister. Further changes in FLN party structure were made in June 1980, when the FLN authorized Chadli to form a smaller Political Bureau of seven members with more limited responsibilities, thereby increasing the power of the President. In July 1981 the Political Bureau was increased to 10.

In 1979 and 1980 President Chadli faced criticism from students who protested that the policy of replacing French with Arabic as the official language was not proceeding quickly enough. Conversely, there were violent demonstrations in April 1980 in Kabylia, whose inhabitants felt that "Arabization" was being carried out too strictly at the expense of the traditional Berber language of the region. In 1981 a cultural charter, aiming to accommodate both points of view, was being prepared and it was also announced in October that Berber faculties were to be opened in four universities. The campaign against corruption, begun in 1979, was intensified, and the Government directed its attention to improving social and economic conditions in an effort to curb the increasing number of strikes and demonstrations.

Since independence Algeria has been one of the most prominent non-aligned states and, as such, played an important part in the release of the American hostages in Iran in January 1981. It has supported various liberation movements in Africa and the Middle East, providing military, financial and diplomatic aid for Polisario in the Western Sahara (*see chapter on Morocco*). The protracted Sahara struggle embittered Algeria's relations with France, which supported the claims of Morocco and Mauritania; Algeria also criticized French military inter-

vention elsewhere in Africa, while further grievances were the heavy trade surplus in France's favour, and France's determination to reduce the number of Algerians resident in France (estimated at 800,000 in 1980). In September 1980 an agreement was signed on a system of incentives to be provided by the French Government for repatriating Algerian workers.

Government

Under the 1976 Constitution (with modifications adopted by the National Assembly in June 1979), Algeria is a socialist single-party state. The Head of State is a President elected for a five-year term by universal adult suffrage. The President presides over a Council of Ministers, appointed by himself, and a High Security Council. The President may appoint Vice-Presidents and must appoint a Prime Minister but executive power is essentially concentrated in his own hands. The President shares legislative power with a unicameral National Popular Assembly, with 261 members elected by universal adult suffrage for a five-year term. The President may dissolve the Assembly at any time and is empowered to legislate by decree when it is not in session. The country is divided into 31 departments (*wilayaat*), sub-divided into 691 communes. Each *wilaya* and commune has an elected assembly. All candidates for election, whether to local or national assemblies or to the Presidency of the Republic, are nominated by the FLN but the electorate may be offered a choice of candidates.

Defence

The National Popular Army, formerly FLN's military wing, is now Algeria's official army. The estimated strength of the armed forces in July 1981 was 101,000, comprising an army of 90,000, a navy of 4,000 and an air force of 7,000. The 1981 defence budget was 3,500 million dinars. The U.S.S.R. provides military equipment and training. Military service is compulsory for six months, and there is a gendarmerie of 10,000.

Economic Affairs

Only about 10 per cent of Algeria's land can be used for agriculture, which employs just under half the population and in 1976 accounted for 7.6 per cent of G.D.P. Land reforms have led to the establishment of large co-operatives, but half the cultivated land is still under private ownership. Depopulation of rural areas is a serious problem. Agricultural investment was allocated only 15 per cent of investment in the 1974-77 Development Plan, compared with 43 per cent for industry, and farm production declined; the 1980-84 Plan increased investment in agriculture, particularly irrigation. The main products are cereals, wine and citrus fruits; large quantities of food-stuffs (especially cereals, dairy produce, vegetable oils and sugar) have to be imported.

Algeria is rich in minerals, notably iron ore, phosphates, petroleum and natural gas. It is a relatively small petroleum producer but its proven reserves of natural gas, estimated at 2,974,000 million cubic metres, are among the world's largest, and ambitious development programmes have been undertaken at Arzew and Skikda. The country is aiming at self-sufficiency in cement, iron and steel, plastics, chemicals and fertilizers, although many industrial developments are working below their full potential.

Commerce and industry are dominated by state-controlled enterprises. The Government is committed to socialist company management by the workers, *gestion socialiste des entreprises*, introduced in 1974.

During the period of the 1970-73 Four-Year Plan, G.D.P. rose by about 10 per cent annually. After the large oil-price rise in 1973-74 the Government decided on a more intensive investment programme using increased revenue to push growth still faster. In 1974 Algeria for the first time achieved a large export surplus, but petroleum production fell, and natural gas production was slow to expand and trade deficits occurred over the next four years; increased earnings from gas and petroleum exports led, however, to a trade surplus in 1979 and again in 1980, when it amounted to 2,700 million dinars. However, decreased petroleum production and loss of gas revenues, owing to pricing disagreements, meant that real G.D.P. rose by only 5 per cent, instead of the projected 8 per cent, and by 7 per cent in 1981. At the beginning of 1981 the external debt was estimated at U.S. \$19,000 million.

Algeria's development has so far been concentrated in heavy industry, centralized in the northern coastal strip and emphasizing capital-intensive production for export. French investment in transport, housing, etc. has not been sufficiently augmented and reliance on the existing infrastructure, together with an annual population growth rate of 6.5 per cent in the cities, has caused a general decline in urban living standards. Too few jobs have been created to cope with an overall population increase of 3.2 per cent a year: nearly a million Algerians work abroad and about another million are unemployed or under-employed at home. In December 1979 the FLN Central Committee indicated a shift of emphasis by making detailed criticisms of Algeria's economic policy to date, condemning the country's dependence on hydrocarbons exports (which accounted for about 90 per cent of export revenue in 1980), persistent regional imbalances and insufficient use of human resources. A policy of conserving gas and petroleum was initiated and it was announced in May 1980 that the state hydrocarbons company, SONATRACH, was to be split into four less cumbersome units. The 1980-84 Five-Year Plan aims to complete the large-scale projects already begun, but to encourage smaller industrial units and the private sector, and to promote previously neglected areas, especially housing (580,000 new homes, costing 60,000 million dinars, were to be built during the period, many at El Asnam, destroyed by an earthquake in 1980). There was to be considerable investment in light industry and production correspondingly rose by 12 per cent in 1980. National production under the 1980-84 Plan was expected to increase by 10 per cent annually, compared with a rate of 7.2 per cent between 1967 and 1978.

Transport and Communications

There are 3,890 km. of railway, excellent coastal roads and good major roads over the mountains and into the Sahara. A Trans-Saharan Highway from the Mediterranean coast had reached Tamanrasset by the end of 1980. Algiers is one of the principal ports on the Mediterranean. There are internal and international air services.

Social Welfare

Since January 1st, 1974, all Algerian citizens have the right to free medical attention. In 1979 there were about

ALGERIA

4,900 doctors. The public health budget rose in 1979 to 1,226 million dinars, or approximately 3.3 per cent of current budget expenditure.

Education

Since independence, Algeria has pursued a policy of returning to its Arab-Islamic roots while remaining receptive to modern influences. Nearly 19 per cent of the 1981 administrative budget was devoted to education and 80 per cent of Algerian children receive primary education. In keeping with the National Charter, the various primary and secondary schools were unified in 1976, private education was abolished and a nine-year *enseignement fondamental* introduced. Priority is being given to teacher-training, the development of technical and scientific teaching programmes, and adult literacy and training schemes. In 1980 it was announced that 18 new universities were to be completed by 1983.

FINANCE

100 centimes=1 Algerian dinar (AD).

Coins: 1, 2, 5, 10, 20 and 50 centimes; 1 and 5 dinars.

Notes: 5, 10, 100 and 500 dinars.

Exchange rates (October 1981): £1 sterling=8.18 dinars; U.S. \$1=4.38 dinars.

100 Algerian dinars=£12.22=\$22.84.

Note: The Algerian dinar was introduced in April 1964, replacing (at par) the new Algerian franc. From January 1960 the Algerian franc (equal to the French franc) was valued at 180 milligrammes of gold. Until August 1971 the dinar was thus valued at 20.255 U.S. cents (U.S. \$1=4.937 dinars). Between December 1971 and February 1973 the dinar's value was 21.991 U.S. cents (\$1=4.537 dinars); from February 1973 to January 1974 it was 24.435 U.S. cents (\$1=4.093 dinars). Since January 1974 the Algerian authorities have allowed the dinar to "float" on foreign exchange markets. The average exchange rate (dinars per U.S. dollar) was: 3.9591 in 1973; 4.1808 in 1974; 3.9494 in 1975; 4.1638 in 1976; 4.1468 in 1977; 3.9659 in 1978; 3.8533 in 1979; 3.8375 in 1980. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1=11.849 dinars.

THE CONSTITUTION

(Approved by popular referendum, November 19th, 1976; promulgated November 22nd, 1976; amended by the National Assembly, June 30th, 1979).

SUMMARY

The preamble recalls that Algeria owes its independence to a war of liberation which will go down in history as one of the epic struggles in the resurrection of the peoples of the Third World. It emphasizes that the institutions established since June 1965 are intended to transform the progressive ideas of the revolution into real achievements, affecting daily life, and to develop the content of the revolution by thought and action towards a definitive commitment to socialism.

FUNDAMENTAL PRINCIPLES OF THE ORGANIZATION OF ALGERIAN SOCIETY

The Republic: The State is socialist. Islam is the state religion and Arabic is the official national language. National sovereignty resides in the people. The National Charter is the fundamental source of national policy and law. It is to be referred to on ideological questions and for the interpretation of the Constitution. The popular assemblies are the basic institution of the state.

Socialism: The irreversible option of socialism is the only path to complete national independence. The individual ownership of property for personal or family use is guaranteed. Non-exploitative private property is an integral part of the new social system. The cultural, agrarian and industrial revolutions and socialist management of enterprises are the bases for the building of socialism.

The State: The State is exclusively at the service of the people. Those holding positions of responsibility must live solely on their salaries and may not, directly or by the agency of others, engage in any remunerative activity.

Fundamental Freedoms and the Rights of Man and the Citizen: Fundamental rights and freedoms are guaranteed. All discrimination on grounds of sex, race or occupation is forbidden. Law cannot operate retrospectively and a person is presumed innocent until proved guilty. Victims of judicial error shall receive compensation from the State.

The State guarantees the inviolability of the home, of private life and of the person. The State also guarantees the secrecy of correspondence, the freedom of conscience

and opinion, freedom of intellectual, artistic and scientific creation, and freedom of expression and assembly.

The State guarantees the right to join a trade union, the right to work, to protection, to security, to health, to leisure, to education, etc. It also guarantees the right to leave the national territory, within the limits set by law. The law lays down the conditions under which the fundamental rights and freedoms may be withdrawn from anyone who uses them to attack the Constitution, the essential interests of the nation, the unity of the people and of the national territory, the internal and external security of the State, and the socialist revolution.

Duties of citizens: Every citizen must protect public property and safeguard national independence. The law sanctions the duty of parents to educate and protect their children, as well as the duty of children to help and support their parents. Women must participate fully in the building of socialism and national development.

The National Popular Army: The Army safeguards national independence and sovereignty. It participates in the development of the country and the building of socialism.

Principles of foreign policy: Algeria subscribes to the objectives of the United Nations, the Organization of African Unity and the Arab League. It supports Arab, Maghreb and African unity, on a basis of popular liberation. It is non-aligned and advocates peace and non-interference in the internal affairs of states. It fights against colonialism, imperialism and racial discrimination and supports the peoples of Africa, Asia and Latin America in their liberation struggles.

POWER AND ITS ORGANIZATION

Political power: The Algerian institutional system rests on the principle of the single-party state. The Front de Libération Nationale (FLN) is a vanguard force, guiding and organizing the people for the building of socialism. Party and state organs work in different frameworks and with different means to attain the same objectives. The

ALGERIA

decisive posts in the state organization are held by members of the party leadership.

The Executive: The President of the Republic is Head of State, Head of the Armed Forces and responsible for national defence. He must be of Algerian origin, a Muslim and more than 40 years old. He is nominated by the FLN Congress and elected by universal, secret, direct suffrage. His mandate is for five years, and is indefinitely renewable. The President embodies the unity of the political leadership of the party and the state. The President presides over joint meetings of the party and the executive. Ministers are appointed by the President. The President presides over meetings of the Council of Ministers. He may appoint one or more Vice-Presidents, to whom he may delegate some of his powers, and must appoint a Prime Minister, who will co-ordinate government activity. Should the Presidency fall vacant, the President of the National Popular Assembly temporarily assumes the office (subject to the approval of two-thirds majorities in the FLN Central Committee and the National Assembly) and organizes presidential elections within 45 days. He may not himself be a candidate in the election. The President presides over a High Security Council which advises on all matters affecting national security.

The Legislature: The National Popular Assembly prepares and votes the law. Its members are nominated by

The Constitution, The Government

the party leadership and elected by universal, direct, secret suffrage for a five-year term. The deputies enjoy parliamentary immunity. The Assembly sits for two ordinary sessions per year, each of not more than three months' duration. The commissions of the Assembly are in permanent session. Both the President and the Assembly may initiate legislation. The Assembly may legislate in all areas except national defence. In the periods between sessions of the Assembly the President may legislate by decree, but all such legislation must be submitted to the Assembly in the following session.

The Head of State is empowered to dissolve the Assembly or call premature elections, having consulted a joint meeting of the party leadership and the Government.

The Judiciary: Judges obey only the law. They defend the socialist revolution. The right of the accused to a defence is guaranteed. The Supreme Court regulates the activities of courts and tribunals. The Higher Court of the Magistrature is presided over by the President of the Republic; the Minister of Justice is Vice-President of the Court. All magistrates are answerable to the Higher Court for the manner in which they fulfil their functions.

Constitutional revision: The Constitution can be revised on the initiative of the President of the Republic by a two-thirds majority of the National Assembly. The basic principles of the Constitution may not be revised.

NATIONAL ASSEMBLY

The National Assembly (*Assemblée nationale populaire*) consists of 261 deputies elected by universal suffrage for a five-year term. In February 1977 elections were held for the first time under the new constitution. A single-party list of candidates was presented by the FLN, but the electorate was offered a choice of candidates within the list. Electoral participation was 78.5 per cent.

President of the National Assembly: RABAH BITAT.

There are two subsidiary levels of assemblies in Algeria. The communal assemblies (*assemblées populaires communales*) were created in 1967. They are headed by an elected president and are renewed by democratic vote every four years. The provincial assemblies (*assemblées populaires de wilayas*) were created in 1969 and are renewed every five years. The chief of the executive, the wali, is a government appointee. As for the national assembly, representatives are elected from a single list presented by the FLN.

POLITICAL PARTY

Government is based on a one-party system.

Front de Libération Nationale (FLN): place Emir Abdelkader, Algiers; f. 1954; socialist in outlook, the party is divided into a Secretariat, a Central Committee, a Political Bureau, Federations, Dairas and Kasmās; according to party statutes adopted at the FLN Congress in January 1979, the Central Committee, (elected by Congress and consisting of 120–160 full members and 30–40 alternate members, meeting twice yearly), chooses a party Secretary-General who automatically becomes the candidate for the Presidency of the Republic. Members of the Political Bureau (between seven and 11 who meet monthly) are chosen by the Secretary-General and endorsed by the Central Committee; Sec.-Gen. Col. BENDJEDID CHADLI; Head of Secretariat MOHAMED CHERIF MESSAADIA.

Political Bureau: Col. BENDJEDID CHADLI (President), RABAH BITAT, Col. ABDALLAH BELHOUCHE, Col. MOHAMED BEN AHMED ABDELGHANI, MOHAMED CHERIF MESSAADIA, MOHAMED SEDIK BENYAHIA, BOUALEM BAKI, MOHAMED HADJ YALA, BOUALEM BENHAMOUDA, MOHAMED SAID MAZOUZI.

Under the aegis of the FLN there exists a number of mass

political organizations, including *Jeunesse du Front de Libération Nationale* (JFLN) and the *Union Nationale des Femmes Algériennes* (UNFA).

There are several small opposition groups including the *Parti de l'avant-garde socialiste*, successor to the Algerian Communist Party; all are officially proscribed and in exile in France or in other Arab countries.

Frente Popular para la Liberación de Saguia el Hamra y Rio de Oro—POLISARIO: B.P. 10, El Mouradia, Algiers; f. 1973 to gain independence for Western Sahara, first from Spain and then from Morocco and Mauritania; originally based in Mauritania but later moved to Algeria where it is supported by the Algerian Government; in February 1976 proclaimed the Sahrawi Arab Democratic Republic, since recognized by 45 countries in Africa, Asia and Latin America; its main organs are a nine-member executive committee, a 21-member Political Bureau and a 41-member Sahrawi National Council; Sec.-Gen. MOHAMED ABDELAZIZ; Deputy Sec.-Gen. BACHIR MUSTAPHA SAYED; President of Ministerial Council MOHAMED LAMINE OULD AHMED.

TRANSPORT

RAILWAYS

Under the 1980-84 Development Plan U.S. \$1,250 million was allocated to extending and improving the rail network.

Société Nationale des Transports Ferroviaires (SNTF): 21-23 blvd. Mohamed V, Algiers; f. 1976 to replace Société Nationale des Chemins de Fer Algériens; 3,890 km. of track, of which 256 km. are electrified and 1,258 km. are narrow gauge; daily passenger services from Algiers to the principal provincial cities and a service to Tunis; Dir.-Gen. SASSEK BENMEHDJOUBA.

ROADS

There are about 82,000 km. of roads and tracks, of which 18,500 km. are main roads and 19,000 km. are secondary roads. The total is made up of 55,000 km. in the north, including 24,000 km. of good roads, and 27,000 km. in the south, including 3,200 km. with asphalt surface. The French administration built a good road system, partly for military purposes, which since independence has been allowed to deteriorate in parts, and only a small percentage of roads are surfaced. New roads have been built linking the Sahara oil fields with the coast, and the trans-Saharan highway is a major project. Algeria is a member of the Trans-Sahara Road Committee, organizing the building of this road, now renamed the "Road of African Unity". The first 360-km. stretch, from Hassi Marroket to Aïn Salah, was opened in April 1973, and the next section, ending at Tamanrasset, was opened in June 1978.

Société Nationale des Transports Routiers (SNTR): 27 rue des 3 Frères Bouadou, Algiers; f. 1967; holds a monopoly of goods transport by road; Dir.-Gen. HAOUSSINE EL-HADJ.

Société Nationale pour le Transport des Voyageurs (SNTV): 19 rue Rabah Midat, Algiers; f. 1967; holds monopoly of long-distance passenger transport by road.

SHIPPING

Algiers is the main port, with 23-29 metres anchorage in the Bay of Algiers, and anchorage for the largest vessels in Agha Bay. The port has a total quayside of 8,380 metres. There are also important ports at Annaba, Arzew, Béjaia, Djidjelli, Ghazaouet, Mostaganem, Oran and Skikda. It was announced in May 1981 that a new port is to be built at Djen Djen. Petroleum and liquid gas are exported through Arzew, Béjaia and Skikda. Algerian crude petroleum is also exported through the Tunisian port of La Skhirra.

Compagnie Nationale Algérienne de Navigation (CNAN): Quai 9, Nouvelle Gare Maritime, Algiers; f. 1964; state-owned company which has the monopoly of conveyance, freight, chartering and transit facilities in all Algerian ports; operates fleet of freight and passenger ships; office in Marseilles and reps. in Paris, all French ports and the principal ports in many other countries. In October 1980 it was announced that CNAN was to be split into 3 units, dealing with hydrocarbons, general freight and passenger transport; Pres. AMAR BOUSBAA.

Office National des Ports (ONP): 2 rue d'Angkor, B.P. 830, Algiers; f. 1971; responsible for management and growth of port facilities and sea pilotage; Dir.-Gen. M. HARRATI.

ANGOLA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Angola lies on the west coast of Africa. The Cabinda district is separated from the rest of the country by the estuary of the River Congo and Zairian territory, with the Congo lying to its north. Angola is bordered by Zaire to the north, Zambia to the east and Namibia to the south. The climate is tropical, locally tempered by altitude. The official language is Portuguese but African languages (mainly Ovimbundu, Kimbundu, Bakongo and Chokwe) are also in common use. Much of the population follows traditional beliefs although there is a large minority of Roman Catholics and other Christian faiths. The flag (proportions 3 by 2) has two equal horizontal bands of red and black. Superimposed in gold are a five-pointed star, half a cog-wheel and a machete. The capital is Luanda.

Recent History

Formerly a Portuguese colony, Angola became an overseas province in 1951. Small nationalist groups began to form in the 1950s. There was an unsuccessful nationalist rebellion in 1961. Severe repression followed and there was a lull in nationalist activity until 1966. After a new wave of fighting, nationalist guerrilla groups were able to establish military and political control in large parts of eastern Angola and to press westward. Three major nationalist organizations were formed: the *Movimento Popular de Libertação de Angola* (MPLA) in 1956, the *Frente Nacional de Libertação de Angola* (FNLA) in 1962 and the *União Nacional para a Independência Total de Angola* (UNITA) in 1966. A Cabindan secessionist movement, the *Frente de Libertação do Enclave de Cabinda* (FLEC), was formed in 1963 and is still active.

Following the April 1974 *coup d'état* in Portugal, Angola's right to independence was recognized but negotiations were slow to take place because of a lack of nationalist unity and the violence caused by a minority of white settlers who still wanted white minority rule. Negotiations between the Portuguese Government and the nationalist groups began in September and, following the formation of a common front by these groups, it was agreed in January 1975 that Angola would become independent in November 1975.

A transitional government of representatives of the MPLA, FNLA, UNITA and the Portuguese Government was set up. However, violent clashes between the MPLA and the FNLA occurred in March, as a result of the groups' political differences, and continued throughout the country. In the second half of 1975 the MPLA, supported by the U.S.S.R. and Cuba, controlled Luanda, parts of the coast and the districts east of the capital; the FNLA, aided by Zaire, the U.S.A. and some West European countries, held the two north-western provinces of Angola; and UNITA, backed by South African forces, held the central regions of Huambo and Bié and most of southern Angola. The FNLA and UNITA formed a united front to fight the Communist-backed MPLA.

The Portuguese Government proclaimed Angola inde-

pendent from November 11th, 1975, and transferred sovereignty to "the Angolan people" rather than to any of the liberation movements. The MPLA proclaimed the People's Republic of Angola and the establishment of a government in Luanda under the presidency of Dr. Agostinho Neto. The FNLA and UNITA proclaimed the People's Democratic Republic of Angola and a coalition government, based in Nova Lisboa (renamed Huambo). The involvement of South African troops in the south, and of an estimated 15,000 Cuban troops, caused an international furore.

However, by the end of February 1976 the MPLA, aided by Cuban technical and military expertise, had effectively gained control of the whole country. South African troops were withdrawn from Angola in March but Cuban troops remained to counter guerrilla activity by the remnants of the defeated UNITA forces.

An abortive coup led by Nito Alves (a former Minister of the Interior) in May 1977 left about 200 dead, including Saydi Mingas, the Minister of Finance, and several senior MPLA officials. The task of national reconstruction was severely hampered by the arrests and the purge of state and party officials which followed. In December 1977, the MPLA was restructured as a political party, the *Movimento Popular de Libertação de Angola-Partido de Trabalho* (MPLA-PT). In December 1978 further divisions were marked by the abolition of the post of Prime Minister, then held by Lopo do Nascimento, and the ousting of several other ministers by President Neto.

President Neto died on September 10th, 1979, and José Eduardo dos Santos, the then Minister of Planning, was unanimously elected party leader and President by the MPLA-PT Central Committee. President dos Santos stressed in his inaugural address the need for continuity of policy. In 1981, designated the "Year of Discipline and Control", the President led an attack on corruption and inefficiency.

The MPLA Government's recovery programme has been continually hampered by security problems. UNITA, with considerable South African material aid, has carried out guerrilla activities in southern and central Angola, which have particularly disrupted transport routes. The South Africans themselves have mounted numerous incursions over the Angolan border with Namibia, ostensibly in "hot pursuit" of South West African People's Organisation (SWAPO) guerrillas, who have bases within Angola. Major military offensives over the border occurred in May 1979 and June-July 1980, and there was heavy bombing of strategic industrial and transport facilities in September-October 1979.

In August-September 1981 South Africa launched a major invasion, "Operation Protea", which aimed to destroy all SWAPO bases in southern Angola and allow UNITA forces to take control of a "buffer" zone to give a respite from SWAPO raids into Namibia. About 1,000 Angolan soldiers, civilians and SWAPO members were killed. South Africa's actions were criticized by most other countries and international political organizations.

Angola, along with the other "front-line" states, consistently supported the liberation movement in Zimbabwe and continues to support those in Namibia and South Africa.

Angola has diplomatic and economic links with most countries, both Eastern and Western. However, in spite of considerable private economic interest in the country, the U.S. Government had still not recognized the MPLA Government by late 1981.

Government

According to the 1975 constitution (amended in October 1976 and September 1980), the MPLA is responsible for the country's political, economic and social leadership. At its first congress, in December 1977, the MPLA was renamed the *MPLA-Partido de Trabalho* (Workers' Party) (MPLA-PT), and transformed into a Marxist-Leninist vanguard party. The MPLA-PT's supreme organ is the Congress, which normally meets every four years. The party held its first extraordinary congress in December 1980. The Congress elects the MPLA-PT's President and 75-member Central Committee to supervise the movement's work. In March 1981 the Committee elected a nine-member Secretariat which recommends policies to the Council of Ministers.

The Council of the Revolution was the supreme organ of state until the installation of the 223-member National People's Assembly (203 members chosen by electoral colleges and 20 nominated by the party Central Committee) in November 1980. Elections were held on November 11th, the fifth anniversary of independence. There are also 18 elected provincial assemblies. The Head of State is the President of the Republic, who is also President of the MPLA-PT, Commander-in-Chief of the armed forces and Chairman of the Council of Ministers. The President appoints the Council of Ministers to exercise executive authority.

Defence

Military service is by compulsory conscription. In July 1981 the armed forces, *FAPLA (Forças Armadas Populares de Libertação de Angola)*, had a total strength of 33,000; 30,000 serving in the army, 1,500 in the navy, 1,500 in the air force. In addition there are an estimated 19,000 Cuban and 2,500 East German troops stationed in Angola, and Portuguese and Soviet advisers and technicians. In 1975 defence expenditure totalled U.S. \$98.0 million.

Economic Affairs

The principal crops are coffee (the second largest export commodity), sugar cane, maize, cassava, cotton and sisal. Livestock is of growing significance, particularly in the southern provinces. Forestry is important in the Cabinda and Moxico districts. The Government formed a fisheries enterprise in 1981 with a catch target of 128,900 metric tons for the year, compared with an estimated 85,000 tons in 1980.

Angola is very rich in minerals, especially petroleum, diamonds and iron ore, and there are also deposits of copper, manganese, phosphates and salt. In 1975 deposits of uranium were discovered on the border with Namibia. Angola is developing these resources with foreign economic assistance, although the Government has stated that it will grant concessions only to Angolan state-owned companies.

All aspects of the economy were severely affected by the exodus in 1975 of over 300,000 Portuguese, who had held virtually all key positions in agricultural and industrial activity, and by the effects of the two-year civil war. The economy, which grew at an annual average rate of 6 per cent between 1966 and 1974, has been slow to recover due to the severe lack of skilled workers and administrators, and continuing security problems. Angola is now receiving financial and technical aid from several Soviet bloc and West European countries, including Portugal.

Coffee is the principal cash crop and was expected to provide 6 per cent of foreign exchange earnings in 1981. Production fell from over 200,000 metric tons a year before independence to an annual average of only 50,000 tons between 1975 and 1979 because of the neglect of coffee plantations in the north. The increase in world market prices between 1975 and 1977 helped to offset the fall in export volume. However, by the time production recovered to an estimated 80,000 tons in 1980, the price of coffee had fallen.

Production of raw sugar was 82,000 metric tons in 1973 but only 39,000 tons in 1978. Cuban technicians are assisting with the rehabilitation of sugar estates. The staple diet of most inhabitants is cassava, and production was estimated at 1.85 million metric tons in 1980. An estimated 320,000 metric tons of maize was produced in 1980, but the 1981 harvest was expected to be less than 20,000 tons because of drought. Before independence Angola was a net exporter of food, but in 1981 food imports were equivalent to about 25 per cent of foreign exchange earnings.

Petroleum is the major earner of foreign exchange, accounting for nearly half of export earnings in 1974, and about 80 per cent in 1980. The majority of production comes from offshore fields in Cabinda, where the Cabinda Gulf Oil Company hopes to double its 1981 production of 100,000 barrels per day (b.p.d.) by 1985. However, other fields, both onshore and offshore, are of increasing importance. Total production stood at about 160,000 b.p.d. in 1980 and 1981, or 8 million metric tons in annual terms. The Government expects this to increase to 15 million tons by 1985. In May 1976 a national oil company, Sonangol, was set up to supervise production and distribution and in 1978 acquired a 51 per cent stake in the Cabinda Gulf Oil Company from its U.S. parent company. The Sonangol refinery processed about 1.25 million metric tons of petroleum in 1980, but the bulk of the oil is exported in its crude form. However, in November 1981, the refinery was seriously damaged in an attack by UNITA terrorists. Sonangol has trade and technical co-operation agreements with several major oil companies, including Texaco (U.S.A.), Petrogal (Portugal), Petrobras (Brazil), Elf-Aquitaine (France) and Agip (Italy).

Diamonds are the country's third largest foreign exchange earner and the Catoca diamond field is the world's third largest. The output of Angolan diamonds (mostly of gem quality) was 1,960,000 carats in 1974 but fell to only 353,000 carats in 1977. Production had recovered to 1.5 million carats by 1980. The Government holds 77 per cent of the shares in the diamond mining company, Diamang, but, under a contract negotiated in 1981, takes 90 per cent of the production value.

The other main mineral is iron ore, the production of which reached 5.6 million metric tons (60 to 65 per cent

iron) in 1974. However, production was halted in August 1975, when the Cassinga mines in southern Angola were partially destroyed, and was not expected to recommence until 1982. Exports of pre-independence stocks started in 1981. Phosphate mining started in the north in 1981. Angola has great hydroelectricity potential and when the Cunene scheme in the south is completed it will supply Angola and Namibia with hydroelectricity and vast supplies of water for irrigation projects in the area.

Angola maintains a surplus in both its balance of trade and payments, and has a good record in repayment of foreign debts. These factors, combined with a foreign investment law of June 1979 which made arrangements for royalties, taxes and the repatriation of capital in the event of nationalization, make Angola attractive to foreign investors. However, Angola's ability to import vital raw materials and machinery is restricted by the need to spend about 50 per cent of foreign exchange earnings (which were expected to be U.S. \$2,100 million for 1981) on defence, and a further 25 per cent on food imports. Private enterprise is permitted in some sectors of the economy, but over 80 per cent was state-owned in 1981.

The extraordinary congress of MPLA-PT in December 1980 approved a national economic plan for 1981-1985 in an attempt to alleviate some of these problems. Greater incentives to peasants are intended to increase food production and release more foreign exchange for industrial imports. The economic targets of the plan had to be scaled down in 1981 because of falling commodity prices for Angola's petroleum and coffee.

Transport and Communications

The Portuguese developed an extensive transport and communications network but much of this was destroyed during the civil war. While many bridges have been rebuilt with Cuban assistance, there remains a severe shortage of road vehicles. The Benguela railway, of particular importance for the Zambian and Zairian copper trade, was reopened to local traffic in 1979, after being closed since August 1975 as a result of sporadic guerrilla attacks, but international traffic remains severely restricted. Angola, Zambia and Zaire agreed on a U.S. \$18.4 million rehabilitation programme in 1981. The Government agreed with the British owners of the railway to take a 51 per cent holding from the end of 1980. Internal air transport is well developed and the principal airport is in Luanda. The main harbours are Lobito, Luanda and Moçâmedes; a new port in Cabinda was expected to be completed in 1983.

Social Welfare

Medical care is free, but hampered by a shortage of trained personnel and medicines. At independence there were 24 hospitals in Angola (eight of them in Luanda), but these were left without trained staff. In 1981 there were 460 foreign doctors in the country, mainly from Cuba, and a major training programme produces about 1,000 Angolan paramedics a year, and helps to spread basic medical knowledge to village communities. A major vaccination programme was launched in 1977 and by 1981 about 3 million children had been immunized against poliomyelitis. War veterans are cared for by the Ministry of Defence.

Education

In 1973, under Portuguese rule, primary school pupils numbered only 300,000; by 1978 there were 1,388,000. Secondary school numbers increased from 4,000 to 153,000 in the same period. Higher education is also being encouraged. Much education now uses national languages rather than Portuguese.

At independence the adult illiteracy rate was over 85 per cent. A national literacy campaign was launched in 1976, since when over half a million adults have been taught basic reading, writing and arithmetic. In 1981 Angola was awarded the UNESCO International Prize for Literacy.

Public Holidays

1982: April 14th (Youth Day)*, May 1st (Workers' Day), August 1st (Armed Forces' Day)*, September 17th (National Hero's Day), November 11th (Independence Day), December 1st (Pioneers' Day)*, December 10th (Anniversary of the Foundation of the MPLA), December 25th (Family Day).

1983: January 1st (New Year's Day), February 4th (Anniversary of the outbreak of anti-Portuguese struggle).

* Although not officially recognized as public holidays, these days are popularly treated as such.

Notes: 20, 50, 100, 500 and 1,000 kwanza.

Exchange rates (October 1981): £1 sterling=119.00 kwanza; U.S. \$1=63.75 kwanza.

1,000 kwanza=£8.40=\$15.69.

Note: The kwanza was introduced in January 1977, replacing (at par) the Angolan escudo, itself at par with the Portuguese escudo. Between September 1949 and August 1971 the official exchange rate (par value) was U.S. \$1=28.75 escudos (1 escudo=3.478 U.S. cents). From December 1971 to February 1973 the central rate was \$1=27.25 escudos. In terms of sterling, the exchange rate was £1=69.00 escudos from November 1967 to August 1971; and £1=71.006 escudos from December 1971 to June 1972. Since March 1973 the Portuguese escudo has been allowed to "float". The average exchange rate (escudos per U.S. dollar) was 24.67 in 1973; 25.41 in 1974; 25.55 in 1975; 30.22 in 1976; 38.28 in 1977; 43.94 in 1978; 48.92 in 1979; 50.06 in 1980. Figures in this Survey may still be expressed in terms of escudos.

THE CONSTITUTION

(The Constitution was promulgated in November 1975 and amended in October 1976 and September 1980.)

BASIC PRINCIPLES

The People's Republic of Angola shall be a sovereign, independent and democratic state. All sovereignty shall be vested in the Angolan people. The *Movimento Popular de Libertação de Angola (MPLA)**, their legitimate representative, shall be responsible for the political, economic and social leadership of the nation. The people shall be guaranteed broad effective participation in the exercise of political power through the development of people's power organizations.

The People's Republic of Angola shall be a unitary and indivisible State. Economic, social and cultural solidarity shall be promoted between all the Republic's regions for the common development of the entire nation and the elimination of regionalism and tribalism.

Defence

Under the leadership of the MPLA-PT and with its President as Commander-in-Chief, the People's Armed Forces for the Liberation of Angola (FAPLA) shall be institutionalized as the national army of the Republic. It shall be the responsibility of FAPLA to defend the country and to participate alongside the people in production and hence in national reconstruction. The Commander-in-Chief of FAPLA shall appoint and dismiss high-ranking officers.

Religion

The Republic shall be a secular state and there shall be complete separation of the State and religious institutions. All religions shall be respected.

The Economy

Agriculture shall be regarded as the base and industry as the decisive factor in the Republic's development. The Republic shall promote the establishment of just social relations in all sectors of production, furthering and developing the public sector and fostering co-operatives. It shall recognize, protect and guarantee private activities and property, including that of foreigners, provided that they are useful to the country's economy and in the interests of the Angolan people. The fiscal system shall be guided by the principle of graduated direct taxation.

Education

The Republic shall vigorously combat illiteracy and obscurantism and shall promote the development of education and of a true national culture.

FUNDAMENTAL RIGHTS AND DUTIES

The State shall respect and protect the human person and human dignity. The life, liberty, personal integrity, good name and repute of every citizen shall be protected by law. All citizens shall be equal before the law and enjoy the same rights. They shall be subject to the same duties, without any distinction based on colour, race, ethnic group, sex, place of birth, religion, level of education, or economic or social status.

* In December 1977 the MPLA was restructured as the *Movimento Popular de Libertação de Angola-Partido de Trabalho (MPLA-PT)*.

It shall be the right and duty of every citizen to participate in the defence of the country and to defend and extend the revolution. All citizens over the age of 18 shall have the right and duty to take an active part in public life, to vote and be elected or appointed to any State organ. It shall be the duty of every elected citizen to account for the discharge of his mandate to the electors who have chosen him, who shall at any time have the right to revoke his mandate.

There shall be freedom of expression, assembly and association provided that the basic objectives of the Republic are adhered to. Every citizen has the right to a defence. Individual freedoms, namely the inviolability of the home and the privacy of correspondence, are guaranteed. Freedom of conscience and belief shall be inviolable. Work shall be the right and duty of all citizens. The State guarantees medical and health care and the right to assistance in childhood, motherhood, disability, old age, etc. It also guarantees access to education and culture.

STATE ORGANS

President of the Republic

The President of the Republic shall be the President of the MPLA-PT. As Head of State he shall represent the Angolan nation. He shall have the following specific functions:

- to swear in the Government appointed by the People's Assembly on the recommendation of the MPLA-PT;
- to preside over the Council of Ministers;
- to declare war and make peace, following authorization by the People's Assembly;
- to nominate, swear in and dismiss the Provincial Commissioners;
- to sign, promulgate and publish the laws of the People's Assembly, Government decrees and statutory decrees;
- to direct national defence;
- to decree a state of siege or state of emergency;
- to pardon and commute sentences;
- to indicate from among the members of the Political Bureau who shall replace him in his absence or when temporarily prevented from exercising his functions;
- to discharge all the other functions conferred on him by the People's Assembly.

In the case of the death, resignation or permanent incapacity of the President, the Central Committee shall designate from among its members the person who shall provisionally exercise the duties of the President of the Republic.

People's Assembly

The People's Assembly is the supreme State body, to which the Government is responsible. Members are elected by colleges composed of representatives chosen by all loyal citizens over 18 years old in their work- or living-places. Elections to the assembly are held every three years.

Government

The Government shall comprise the President of the Republic, the Ministers and the Secretaries of State, and other members whom the law shall indicate.

The Government shall have the following functions:-

- to guarantee the safety of persons and property;
 - to draw up and implement the General State Budget once it is approved by the People's Assembly;
 - to follow guidelines laid down by the People's Assembly.
- The Government may exercise by decree the legislative functions delegated to it by the People's Assembly.

Judiciary

The organization, composition and competence of the Courts shall be established by law. Judges shall be independent in the discharge of their functions.

Local Administration

The People's Republic of Angola shall be administratively divided into *Provincias* (Provinces), *Concelhos* (Councils), *Comunas* (Communes), *Circuitos* (Circles), *Bairros* (Neighbourhoods) and *Povoações* (Villages).

Local administration shall be guided by the combined principles of unity, decentralization and local initiative.

In a Province, the Provincial Commissioner shall be the direct representative of the Government. The Government shall be represented in the District by the Local Com-

missioner, and in the Commune by the Commune Commissioner, who shall be appointed on the recommendation of the MPLA-PT. The administrative bodies of the District, Commune, Neighbourhood and Village shall be, respectively, the Local Commission, the Commune Commission, and the People's Neighbourhood or Village Commission.

Eighteen provincial assemblies of 55-85 deputies are elected every three years by all loyal citizens over 18 years old.

The local authorities shall have legal personality and shall enjoy administrative and financial autonomy. The structure and jurisdiction of the administrative bodies and other organs of local administration shall be established by law.

FINAL AND TRANSITORY PROVISIONS

An amendment to the Constitution is made by the People's Assembly. Laws and regulations may be repealed or amended if they conflict with the spirit of the present law or the Angolan revolutionary process. All treaties, agreements and alliances to which Portugal has committed Angola which are contrary to the interests of the Angolan people shall be reviewed.

THE ANTARCTIC TREATY

The Treaty was signed in Washington on December 1st, 1959, by the twelve nations co-operating in the Antarctic during the International Geophysical Year. The Treaty entered into force on June 23rd, 1961.

SUMMARY OF TREATY

Article 1. Antarctica shall be used for peaceful purposes only.

Article 2. Freedom of scientific investigation and co-operation.

Article 3. Exchange of information and personnel.

Article 4. 1. Nothing contained in the present Treaty shall be interpreted as:

- (a) a renunciation by any Contracting Party of previously asserted rights of or claims to territorial sovereignty in Antarctica;
- (b) a renunciation or diminution by any Contracting Party of any basis of claim to territorial sovereignty in Antarctica which it may have whether as a result of its activities or those of its nationals in Antarctica, or otherwise;
- (c) prejudicing the position of any Contracting Party as regards its recognition or non-recognition of any other State's right of or claim or basis of claim to territorial sovereignty in Antarctica.

2. No acts or activities taking place while the present Treaty is in force shall constitute a basis for asserting, supporting or denying a claim to territorial sovereignty in Antarctica or create any rights of sovereignty in Antarctica. No new claim, or enlargement of an existing claim, to territorial sovereignty in Antarctica shall be asserted while the present Treaty is in force.

Article 5. Any nuclear explosions in Antarctica and the disposal there of radioactive waste material shall be prohibited.

Article 6. Geographical limits and rights on high seas.

Article 7. Designation of observers and notification of stations and expeditions.

Article 8. Jurisdiction over observers and scientists.

Article 9. Consultative meetings.

Articles 10-14. Upholding, interpreting, amending, notifying and depositing the Treaty.

SIGNATORIES

ANTARCTIC TREATY CONSULTATIVE MEETINGS

Meetings of representatives from all the signatory nations of the Antarctic Treaty are held from time to time to discuss scientific and political matters. The Tenth Meeting was held in Washington, D.C., in September-October 1979. The representatives elect a Chairman and Secretary. Committees and Working Groups are established as required.

Among the numerous measures which have been agreed and implemented by the Consultative Parties are several designed to protect the Antarctic environment and wildlife. These include Agreed Measures for the Conservation of Antarctic Flora and Fauna, the designation of Specially Protected Areas and Sites of Special Scientific Interest, and a Convention for the Conservation of Antarctic Seals.

ANTIGUA AND BARBUDA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The islands of Antigua, Barbuda, 40 km. (25 miles) to the north, and their dependency Redonda, 40 km. to the south-west, lie along the outer edge of the Leeward Islands chain in the West Indies. The climate is tropical, although tempered by constant sea breezes and the trade winds, and the mean annual rainfall of 1,000 mm. (40 inches) is slight for the region. The temperature averages 27°C (81°F) but can rise to 33°C (93°F) during the hot season between June and October. English is the official language but an English patois is commonly used. The majority of the inhabitants are Anglicans. The national flag consists of an inverted triangle centred on a red ground and divided horizontally into three bands of black, blue and white, the black stripe bearing a symbol of the rising sun in gold. The capital is St. John's.

Recent History

Antigua was colonized by the British in the seventeenth century. The island of Barbuda, formerly a slave stud farm for the Codrington family, was annexed to the territory in 1860. Until December 1959 Antigua was administered with surrounding British territories under a federal system as the Leeward Islands. The first elections under universal adult suffrage were held in 1951. The colony participated in the West Indies Federation which was formed in January 1958 but broke up in May 1962. In January 1960 a new constitution came into force in Antigua and the other Leeward Islands, giving each its own Administrator and an enlarged Legislative Council.

Attempts to form a smaller East Caribbean Federation failed and most of the colonies involved subsequently became Associated States in an arrangement which gave them full internal self-government while the United Kingdom retained responsibility for defence and foreign affairs. Antigua attained Associated status in February 1967. The Legislative Council was replaced by a House of Representatives, the Administrator became Governor and the Chief Minister was restyled Premier.

In the first general elections under Associated status, held in February 1971, the Progressive Labour Movement (PLM) ousted the Antigua Labour Party (ALP), which had held power since 1946, by winning 13 of the 17 seats in the House of Representatives. Its Leader, George Walter, replaced Vere C. Bird, Sr. as Premier. However, elections in 1976 returned the previous administration to office with 11 seats, the seat representing Barbuda being won by an independent.

In 1975 the Associated States agreed that they would seek independence separately. In the 1976 elections the PLM campaigned for early independence while the ALP stood against it. In September 1978, however, the Bird Government declared that the economic foundation for independence had been laid. It called early general elections in April 1980 to obtain a mandate for proceeding to independence and won 13 of the 17 seats, but strong opposition from the inhabitants of Barbuda to independence as part of Antigua delayed the convening of a con-

stitutional conference until December 1980. The Barbudans finally agreed to attend with a promise from the Government that devolution of power would be considered. Although the outcome of the conference was an agreement between the Antigua and United Kingdom Governments to take the territory to independence, the Barbuda delegation refused to sign the conference record because it had not received certain guarantees on control over its land and finances and devolution of power to its local council, which it considered necessary to protect its interests after independence. In local elections in March 1981 the Barbuda People's Movement (BPM), which continued to campaign for secession from Antigua, took all the seats on the Barbuda Council. With the grievances of the Barbudans still largely unresolved, both the BPM and the PLM boycotted the vote on the new constitution in June. The territory nevertheless became independent, as Antigua and Barbuda, on November 1st, 1981, remaining within the Commonwealth.

The ALP government intends to adopt a non-aligned stance in foreign relations.

Government

Antigua is a constitutional monarchy. Executive power is vested in the British sovereign, as Head of State, and exercised by the Governor-General, who represents the sovereign and is appointed on the advice of the Prime Minister. Legislative power is vested in Parliament, comprising the sovereign, a 17-member House of Representatives, elected from single-member constituencies for up to five years by universal adult suffrage, and a 17-member Senate. The Senate is composed of 11 members appointed on the advice of the Prime Minister (of whom one must be an inhabitant of Barbuda), four appointed on the advice of the Leader of the Opposition, one appointed at the discretion of the Governor-General and one appointed on the advice of the Barbuda Council. Government is effectively by the Cabinet. The Governor-General appoints the Prime Minister and, on the latter's recommendation, selects the other Ministers. The Prime Minister must be able to command the support of the majority of the House, to which the Cabinet is responsible.

Economic Affairs

Tourism is the main economic activity. Antigua was one of the first Caribbean states actively to encourage tourism in the early 1960s and by 1980 the industry accounted for 60 per cent of employment and 25 per cent of G.D.P. The 1981-84 public sector development plan envisages further expansion.

Fears of over-reliance on tourism have led to the revival of Antigua's traditional sugar crop and diversification of fruit and vegetable production. A modest sugar harvest, the first since 1972, was expected in 1981 but about 1,100 acres were to be brought under cultivation for the 1982/83 season. After refurbishment, the sugar factory at Gunthorpes, on Antigua, will eventually produce 5,000 metric tons per year, replacing a large proportion

of sugar imports. The Government is also hoping to increase the area currently under sea island cotton, the main export crop. Much of the fishing catch is exported to Guadeloupe, Martinique and the U.S.A.

There are a number of light industries manufacturing rum, garments, household appliances and motor vehicles for export. The West Indies Oil Refinery near St. John's, which is partly government-owned, was under rehabilitation in 1981 and it is hoped that, after coming back on stream in 1982, the refinery will process supplies of petroleum obtained at concessionary rates from Mexico and Venezuela for all seven members countries of the Organisation of Eastern Caribbean States (OECS—see p. 147) and possibly supply petroleum to neighbouring French dependencies. The Government is holding negotiations with several companies to begin offshore oil exploration in the near future. The establishment of offshore banks in Antigua and Barbuda is being encouraged to provide an additional source of revenue.

Between 1977 and 1979 growth in G.D.P. averaged 7.5 per cent annually, falling to 3 per cent in 1980. The rate of inflation was estimated at 16 per cent and the unemployment rate at 19 per cent in 1981. These figures nonetheless compare favourably with those of neighbouring East Caribbean economies.

Transport and Communications

There are about 240 km. (150 miles) of all-weather roads on Antigua. The modern deep-water harbour at St. John's is served by several major shipping lines and is a port of call for many cruisers. Coolidge airport, 7 km. north-east of St. John's, can accommodate jet aircraft. There is a landing strip at Codrington on Barbuda. Scheduled and chartered flights operated by LIAT, the Antigua-based airline owned by East Caribbean governments, link Barbuda with the mainland.

Education

There are some 72 schools providing primary and secondary education, the majority government-run. Teacher training and technical training are available at the State Island College. An extra-mural department of the University of the West Indies offers several foundation courses leading to higher study at branches elsewhere.

Tourism

With a pleasant climate, reputedly over 365 beaches and excellent facilities for sailing and water sports, Antigua and Barbuda draw an increasing number of tourists from the U.S.A., Canada, the United Kingdom and other Caribbean countries. The annual international sailing regatta and Carnival week are major attractions. The capital and "Nelson's Dockyard" in English Harbour are of interest for their colonial architecture. Tourists visiting Antigua numbered 97,901 (excluding cruise ship visitors) in 1980, compared with 56,398 in 1976.

Public Holidays

1982: April 9th–12th (Easter), May 3rd (Labour Day), May 31st (Whit Monday), June 13th (Queen's Official Birthday), August 2nd and 3rd (Carnival), November 1st (State Day), December 25th–27th (Christmas).

1983: January 1st (New Year's Day).

Weights and Measures

The imperial system is in use but a metrication programme is to be introduced.

THE CONSTITUTION

The constitution came into force at the independence of Antigua and Barbuda on November 1st, 1981. Its main provisions are summarized below:

FUNDAMENTAL RIGHTS AND FREEDOMS

Regardless of race, place of origin, political opinion, colour, creed or sex, but subject to respect for the rights and freedoms of others and for the public interest, every person in Antigua and Barbuda is entitled to the rights of life, liberty, security of the person, the enjoyment of property and the protection of the law. Freedom of movement, of conscience, of expression (including freedom of the press), of peaceful assembly and association is guaranteed and the inviolability of family life, personal privacy, home and other property is maintained. Protection is afforded from discrimination on the grounds of race, sex, etc. and from slavery, forced labour, torture and inhuman treatment.

THE GOVERNOR-GENERAL

The Queen, as Head of State, is represented in Antigua and Barbuda by a Governor-General.

PARLIAMENT

Parliament consists of the Queen, a 17-member Senate and the House of Representatives composed of 17 elected members. Senators are appointed by the Governor-General, 11 on the advice of the Prime Minister (one of whom must be an inhabitant of Barbuda), four on the advice of the Leader of the Opposition, one at his own discretion and one on the advice of the Barbuda Council. The life of Parliament is five years.

Each constituency returns one Representative to the House who is directly elected in accordance with the Constitution.

The Attorney-General, if not otherwise a member of the

ANTIGUA AND BARBUDA

House, is an *ex-officio* member but does not have the right to vote.

Every citizen over the age of 18 is eligible to vote.

Parliament may alter any of the provisions of the Constitution.

THE EXECUTIVE

Executive authority is vested in the Queen and exercisable by the Governor-General. The Governor-General appoints as Prime Minister that member of the House who, in his view, is best able to command the support of the majority of the members of the House, and other Ministers on the advice of the Prime Minister. The Governor-General may remove the Prime Minister from office if a resolution of "no confidence" is passed by the House and the Prime Minister does not either resign or advise the Governor-General to dissolve Parliament within seven days.

The Constitution, The Government, Legislature, etc.

The Cabinet consists of the Prime Minister and other Ministers and the Attorney-General.

The Leader of the Opposition is appointed by the Governor-General as that member of the House who, in his view, is best able to command the support of a majority of members of the House who do not support the Government.

CITIZENSHIP

All persons born in Antigua and Barbuda before independence who, immediately prior to independence, were citizens of the United Kingdom and Colonies automatically become citizens of Antigua and Barbuda. All persons born outside the country with a parent or grandparent possessing citizenship of Antigua and Barbuda automatically acquire citizenship as do those born in the country after independence. Provision is made for the acquisition of citizenship by those to whom it would not automatically be granted.

ARGENTINA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Argentine Republic occupies almost the whole of South America south of the Tropic of Capricorn and east of the Andes. It has a long Atlantic coastline stretching from Uruguay and the River Plate to Tierra del Fuego. To the west lie Chile and the Andes mountains, to the north are Bolivia, Paraguay and Brazil. Argentina also claims the Falkland Islands, the Falkland Islands Dependencies and part of Antarctica. The climate varies from sub-tropical in the north to sub-arctic in Patagonia, generally with moderate summer rainfall. The language is Spanish. Over 90 per cent of the population are Roman Catholic and about 2 per cent Protestant. The national flag (proportions 2 by 1) has three horizontal stripes of light blue, white and light blue. The state flag (proportions 3 by 2) has the same design with, in addition, a gold "Sun of May" on the white stripe. The capital is Buenos Aires.

Recent History

Argentina became an independent republic in 1816. For the next century there was much internal conflict between federalists and unitarists. From 1916 to 1930 the Unión Cívica Radical held power but lost it in the military uprising of 1930. Another military coup in 1943 made way for the emergence in 1946 of Lt.-Gen. Juan Domingo Perón Sosa, whose position was greatly enhanced by the popularity among workers of his wife, Eva Duarte Perón (died 1952). As President, Gen. Perón pursued a policy of extreme nationalism and social improvement, and founded the Peronista party. In 1955 he was overthrown and went into exile in Spain, from where he continued to direct the Peronista movement and to influence Argentine politics.

In 1966 a military coup overthrew Argentina's civilian administration and began seven years of government by the armed forces. In 1973 the Frente Justicialista de Liberación (Peronista) won the elections and Dr. Héctor Cámpora was elected President. After three months he resigned to make way for the election of Gen. Perón as President, with his second wife, María Estela Martínez de Perón, as Vice-President.

General Perón died in July 1974 and was succeeded as President by his widow, who was unable to control the upsurge in violence between left- and right-wing groups. The Government moved further to the right and in November declared a state of siege. The left-wing *Montoneros* guerrillas were officially outlawed in September 1975 but violence continued unabated. The Government's economic austerity programme and the soaring rate of inflation caused widespread strikes and dissension among industrial workers. This increasingly chaotic situation resulted in demands for the resignation of President Perón. On March 24th, 1976, the military, led by Lt.-Gen. Jorge Rafael Videla, Commander of the Army, overthrew the President and installed a three-man junta. Five days later Gen. Videla was sworn in as President. The junta dissolved Congress, suspended all political and trade union activity and removed most government officials from their posts. Several hundred people were arrested and Señora Perón was put into preventive detention.

In an effort to contain political violence, the Government launched a successful anti-guerrilla offensive and reformed the penal code to reintroduce the death penalty for kidnapping, subversion and terrorism. The severity of the military action provoked many protests over human rights violations within Argentina and from abroad. The number of people who disappeared after the coup was set at between 5,000 and 15,000.

In March 1981 Gen. Roberto Viola, a former member of the junta, succeeded President Videla. Gen. Viola was reputed to be a moderate within the forces and promised to extend the dialogue with the political parties as a prelude to an eventual return to democracy. Final authority, however, rested with the junta, which favoured extending the *proceso de reorganización nacional* before considering transition to civilian rule. In November Gen. Viola suffered a heart attack and was replaced in December by Lt.-Gen. Leopoldo Fortunato Galtieri, who retained his position on the junta and his title of Commander-in-Chief of the Army.

Argentina has two territorial disputes: one with the United Kingdom over the Falkland Islands/Islas Malvinas (see British Dependent Territories, p. 1721) and one with Chile over ownership of the islands of Picton, Lennox and Nueva in the Beagle Channel. Argentina rejected the ruling of the International Court of Justice awarding them to Chile, and on occasions the two countries have been on the verge of war. In December 1978 the case was referred to Papal mediation and the resultant proposals were presented to the governments in December 1980. The proposals were unofficially said to have awarded the islands to Chile and designated the surrounding sea waters under shared sovereignty. Chile accepted the terms in February 1981, but Argentina had made no formal reply by December.

Government

Argentina is a Republic composed of a Federal District, 22 Provinces and the National Territory of Tierra del Fuego.

In 1976 Congress was dissolved and a three-member military junta (the commanders-in-chief of the armed forces) took power, with a commission established to advise it on legislative matters. In August 1978 the office of President, the executive power, was separated from the military junta. The President is elected unanimously by the junta at least six months before the expiry of the presidential mandate, serves a three-year term with the possibility of a further term if re-elected, and is responsible for choosing the Cabinet. A military committee, comprising the President and the junta, co-ordinates national security. Each Province is administered by a Governor appointed by the President, in consultation with the junta.

Defence

A period of national service is compulsory between the ages of 18 and 45, either one year being spent in the army

or air force or fourteen months in the navy. The total strength of the regular armed forces in July 1981 was 185,500, of which the army had 130,000 with a further 250,000 trained reservists, the navy had 36,000 and the air force 19,500 men. There were also para-military forces numbering 43,000 men. Defence expenditure for 1980 was 7,242,031 million pesos.

Economic Affairs

Argentina is rich in natural resources. The agricultural sector contributes 13 per cent of G.D.P. and over 70 per cent of exports. The main crops are wheat, maize, oilseeds, sorghum and soybeans, while beef is also a major export commodity. The U.S. embargo on grain sales to the U.S.S.R. in 1980 led to the U.S.S.R.'s becoming Argentina's greatest single meat and grain purchaser. Grain and oilseed exports to the U.S.S.R. totalled 7.6 million tons in 1980 and were expected to reach 12 million tons in 1981. Further guaranteed sales have been agreed up to 1984. The other main purchaser is the EEC, although its share declined from 50 to 30 per cent of total exports between 1971 and 1980.

Industry, accounting for 40 per cent of the G.D.P. and 30 per cent of employment in 1980, covers a wide variety of products but has been one of the sectors most severely affected by the recession. The sector grew by 0.2 per cent in 1980, compared with 8.4 per cent the previous year. 1980 was a serious year for many industrial concerns; interest rates stood at over 30 per cent and nearly 20 financial institutions and several firms became bankrupt. In 1981 several foreign motor manufacturers reduced Argentine production and many industrial workers lost their jobs. In July official sources reported that 40 per cent of the workforce was unemployed, worked for only a few hours a week or worked in economically negligible activities.

Argentina produces 92 per cent of its petroleum requirements and is expected to become self-sufficient in the 1980s. Foreign companies were allowed to drill for oil for the first time in 1978 and foreign investment in hydrocarbons has been encouraged. The real growth area of discovery is thought to be in the southern basin around the Falkland Islands, where conditions may prove too difficult for viable commercial exploitation, but large petroleum and gas deposits have also been found in the Golfo San Jorge near Comodoro Rivadavia. Argentina's ambitious hydro-electric plan is under way: the Nihuil, Chocón and Futaleufu dams are capable of producing 20 per cent of the nation's requirements. The Yacyretá hydro-electric project on the Paraná, jointly undertaken with Paraguay, will have a capacity of 2,700 MW and should be the sixth largest hydro-electric scheme in the world when it starts generating in 1988. Nuclear energy is growing in importance: Argentina's uranium deposits are equivalent to a third of its oil reserves. The Atucha nuclear power station has a 340 MW potential and in 1979 the Government announced plans for four more stations to be built, with foreign technical assistance, by 1997. Priority has been given to reducing the generation of thermal energy from 70 to 46 per cent by 1985 and to increasing the generation of hydro-electricity from 5 to 42 per cent and that of nuclear energy from 10 to 12 per cent.

When the military government took over in 1976, the economy was in a state of crisis, with an annual inflation

rate of 444 per cent. The new Minister of the Economy, Dr. José Martínez de Hoz, based his programme of economic reorganization on the reduction of inflation. His measures included the introduction of wage controls, cuts in government spending, improved terms for foreign investors and unsuccessful attempts to control the money supply. Between December 1978 and March 1981 the monthly rate of currency devaluation was set at one per cent.

Although the rate of inflation had fallen to just under 100 per cent by the time Dr. Martínez de Hoz left office in March 1981, it was still a great deal higher than anticipated, and many businessmen and financiers felt that the peso was over-priced. His more cautious successor, Dr. Lorenzo Sigaut, immediately devalued the peso by 23 per cent. In May a freeze on government projects was announced and a reorganization of the bureaucracy was promised. A particular instance of state mismanagement was the state petroleum company, which made an embarrassing loss of U.S. \$6,000 million in 1980. In June the peso was devalued again, this time by 30 per cent, and a panic dollar-buying period ensued, during which the peso rate in relation to U.S. dollar, which had stood at 1,993 at the end of 1980 and 2,368 at the end of March 1981, fell to nearly 9,000. A two-tier rate of exchange was introduced, with a "crawling peg" devaluation rate of 6 per cent per month.

The question of confidence remains vital for the Government. In 1981 it was feared that the inflation rate might again reach 150 per cent, and G.D.P. fell by 11 per cent in the first months of the year. In July reserves were unofficially said to stand at only \$1,000 million, compared with \$7,200 million at the end of 1980. The external debt, which stood at \$2,700 million in December, had reached \$27,000 million (over a quarter of G.N.P.) by mid-1981, with most of it on short-term loan.

The economy faces serious problems, particularly that of high public expenditure, of which a large proportion is consumed by the armed forces.

Transport and Communications

Although only 22 per cent of the road network was paved in 1978, Argentina's roads carry a large percentage of freight and passenger traffic. The railway system has become more viable since 1976 due to the Government's extensive rationalization programme. The area within a 600 km. radius of Buenos Aires has the best transportation system and there are road and rail links with all of Argentina's neighbours. The major seaports are Buenos Aires, La Plata, Rosario and Bahía Blanca, and a new deep-water port at Punta Médanos is planned. Internal air services are well developed and Aerolíneas Argentinas operate international schedules.

Social Welfare

Social welfare benefits fall into three categories: retirement, disability and survivors' pensions; family allowances; health insurance. The first is administered by the *Subsecretaría de Seguridad Social* (part of the Ministry of Social Welfare) and funded by compulsory contributions from all workers, employed and self-employed, over 16 years of age. The second is supervised by the *Subsecretaría* and funded by employers. The third is run on public funds and may be provided only by authorized public

ARGENTINA

institutions. Work insurance is the responsibility of the employer.

Legislation promulgated in 1980 ended exclusive control of social security funds by trade unions, although they continue to provide some services.

Education

Education is free from pre-school to university level and compulsory for all children at primary level, between the ages of six and 14 years. Secondary education lasts for between four and six years depending on the type of course: the normal *bachillerato* takes five years whereas a course leading to a commercial *bachillerato* can last four or five years, and one leading to a technical or agricultural *bachillerato* takes six years. Non-university higher education, usually leading to a teaching qualification, is for three or four years and university courses last for four years or more. There are 29 state universities and 23 private universities.

The adult literacy rate reached 93 per cent in the 1970 census.

Tourism

attractions. The principal ones are the Andes mountains, the lake district of Patagonia, centred on Bariloche, where there is a National Park, the Atlantic beaches, the Iguazú falls, the Pampas, the city of Buenos Aires and Tierra del Fuego.

Public Holidays

1982: April 9th (Good Friday), May 1st (Labour Day), May 25th (Anniversary of the 1810 Revolution), June 20th (Flag Day), July 9th (Independence Day), August 17th (Death of Gen. José de San Martín), December 8th (Immaculate Conception), December 25th (Christmas).

1983: January 1st (New Year's Day).

100 centavos=1 Argentine peso.

Coins: 1, 5, 10, 50 and 100 pesos.

Notes: 500, 1,000, 5,000, 10,000, 100,000, 500,000 and 1,000,000 pesos.

Exchange rates (October 1981): £1 sterling=14,251 new pesos; U.S. \$1=7,625 new pesos.

100,000 Argentine pesos=£7.02=\$13.11.

Note: The new peso was introduced in January 1970, replacing the old peso (official exchange rate: U.S. \$1=350 old pesos since March 1967) at the rate of 1 new peso=100 old pesos. From January to June 1970 the exchange rate remained at U.S. \$1=3.50 new pesos. Between June 1970 and April 1971 the rate was \$1=4.00 new pesos. After six more devaluations the official rate was fixed at \$1=5.00 new pesos in August 1971. The next month a two-tier system was introduced, with a commercial rate (remaining at \$1=5.00 pesos until March 1975) and a financial rate, beginning at \$1=6.70 pesos (selling rate). The financial rate was revised several times and stood at \$1=9.98 pesos from August 1972 to March 1975, when the commercial rate was fixed at \$1=10.00 new pesos, with financial rates of \$1=15.05 pesos (buying) or 15.10 pesos (selling). The peso has since been devalued on several occasions. In August 1975 a special financial rate was introduced and in November the commercial rate was discontinued, leaving the two financial rates in operation. In January 1976 a free rate (beginning at \$1=150.0 pesos) was added. In March a new official rate of \$1=140 pesos was established, the financial rates were discontinued but the free rate (then \$1=258.0 pesos) remained. In November 1976 the official rate was abolished, leaving all transactions to be settled on the free market. The average market rate (pesos per U.S. dollar) was: 3.78 in 1970; 4.62 in 1971; 8.17 in 1972; 9.35 in 1973; 8.87 in 1974; 36.6 in 1975; 140.0 in 1976; 407.6 in 1977; 795.8 in 1978; 1,317.0 in 1979; 1,837.2 in 1980. In terms of sterling, the official exchange rate was £1=8.40 new pesos from November 1967 to June 1970; £1=9.00 new pesos from June 1970 to April 1971; and £1=13.03 new pesos (commercial rate) from December 1971 to June 1972.

THE CONSTITUTION

The 1853 Constitution, with amendments, remains partially in force. On March 24th, 1976, following a military coup, a series of laws was promulgated which substantially altered the legislative and executive system. They are incorporated in the *Acta para el Proceso de Reorganización Nacional, Propósitos y Objetivos Básicos del Proceso de Reorganización Nacional and the Estatuto para el Proceso de Reorganización Nacional*. In July 1978 further amendments to the *Proceso de Reorganización Nacional* were promulgated with regard to the relations between the President and the Junta, and the functions of the President, Junta and *Comisión de Asesoramiento Legislativo*. The summary below is an amalgamation of the constitution and the new laws of 1976 and 1978.

Declarations, rights and guarantees

Each province has the right to exercise its own administration of justice, municipal system and primary education. The Roman Catholic religion, being the faith of the majority of the nation, shall enjoy State protection; freedom of religious belief is guaranteed to all other denominations. All the inhabitants of the country have the right to work and exercise any legal trade; to petition the authorities; to leave or enter the Argentine territory; to

use or dispose of their properties; to associate for a peaceable or useful purpose; to teach and acquire education, and to express freely their opinion in the press without censorship. The State does not admit any prerogative of blood, birth, privilege or titles of nobility. Equality is the basis of all duties and public offices. No citizens may be detained, except for reasons and in the manner prescribed by the law; or sentenced other than by virtue of a law existing prior to the offence and by decision of the competent tribunal after the hearing and defence of the person concerned. Private residence, property and correspondence are inviolable. No one may enter the home of a citizen or carry out any search in it without his consent, unless by a warrant from the competent authority; no one may suffer expropriation, except in case of public necessity and provided that the appropriate compensation has been paid in accordance with the provisions of the laws. In no case may the penalty of confiscation of property be imposed.

The *Acta* states that the Chiefs of Staff of the army, navy and air force establish a *Junta Militar*. The following officials are removed from their posts: the President; governors and vice-governors; Federal *interventores*; members of Congress, provincial legislatures, municipal councils, the

Supreme Court and provincial courts, and the Attorney-General. All political and trade union activity is suspended.

The basic objectives and aims for national reorganization are to restore essential values, eliminate subversion, promote economic development, strengthen political sovereignty, uphold Christian moral values and tradition, enforce national security, promote general welfare and set up an education system in accordance with the needs of the country. The Junta has stated that it intends to restore a democratic representative and republican government when the *Proceso de Reorganización Nacional* has been completed.

Junta Militar

The *Junta Militar* comprises the Chiefs of Staff of the army, navy and air force. It shall be the supreme organ of State and its members shall remain in office for a maximum of three years. It may meet when one of its members requests it to do so but to meet in full session all members must be present. Decisions shall be made by simple majority.

The Junta appoints and dismisses the President of the Republic. The appointment must take the form of a unanimous decision by the Junta and be finalized within 30 days, six months before the expiry of the outgoing President's mandate. The Junta also appoints members of the Supreme Court and the *Tribunal de Cuentas*, as well as the Procurator-General and the Fiscal-General, from a list of names submitted by the President. The Junta must also approve appointments made by the President with regard to the Cabinet, provincial governors, ambassadors and *chargés d'affaires*. It is also responsible for appointments within the armed forces and for concluding peace treaties, border and neutrality agreements and concordats. It will be able to summon through the Executive the members of the National and Provincial governments for information and advice.

President of the Republic

The President must have been born on Argentine soil or be the son of an Argentine national, belong to the Catholic faith, be over 30 years of age and be a retired high-ranking military officer. He is elected unanimously by the Junta at least six months before the expiry of the outgoing President's mandate. He serves one three-year term of office with the possibility of one further term of office if re-elected by the Junta. He may be dismissed by the unanimous decision of the Junta. In the case of death, temporary absence or illness, executive power shall be assumed by the Minister of the Interior.

The President shall have the following powers: to appoint and dismiss ministers, provincial governors, ambassadors and *chargés d'affaires*, subject to the approval of the Junta; to present a list of candidates to the Junta for appointment to the Supreme Court, and the *Tribunal de Cuentas* and to the posts of Procurator-General and Fiscal-General, and confirm the choice of the Junta; to appoint members of the lower courts; to conclude and sign trade and economic agreements; to issue instructions and regulations necessary for the implementation of laws; to approve and promulgate laws; to grant pardons and commute sentences; to supervise the collection of taxes; to regulate foreign trade; to fix import and export duties; to contract loans on the nation's credit; to regulate the internal and external debt and the currency system; to fix the budget and to issue instructions to the provincial governments.

The President must make a report each year in March to the Junta on the results of his work during the year in

government and on the general lines for the government's plans in the current year.

Comisión de Asesoramiento Legislativo (CAL)

The CAL is a deliberative body and acts as an adviser to the *Junta Militar* and President on legislative matters. It comprises nine officers of the three branches of the armed forces. Its president is elected from among its members in yearly rotation in the manner established by the Junta. Its secretary shall come from the same branch of the armed forces as the current president. It shall have eight working committees responsible for defence and foreign affairs; the interior and justice; social welfare and labour; education; the budget, finance, industry and natural resources; agriculture and livestock; public works and transport; energy, fuel and communications. Decisions shall be made by absolute majority.

Bills must be approved by the relevant working committee and a plenary session of the CAL before they can be approved and promulgated by the executive. A bill must first be considered to be of fundamental importance by the working committee and the CAL before it can be dealt with. If the executive does not agree with the CAL on any issue, the bill is passed to the Junta for final decision.

The preparation of bills is the responsibility of the Government, the President and the Chiefs of Staff. They are then passed to the CAL via the President or the Junta, which can also prepare laws.

Military Committee

A military committee, comprising the President of the Republic and the three Chiefs of Staff, is established to deal with all matters affecting national security. Its work is carried out by the existing joint Chiefs of Staff and a temporary body known as the Chiefs of Staff of the Armed Forces which carries out the functions hitherto exercised by the President in his capacity as Commander of the Armed forces.

Judiciary

Judicial power is exercised by the Supreme Court and all other competent tribunals. The members of the Supreme Court are appointed and dismissed by the *Junta Militar* from a list of names submitted by the President. Judges of the lower courts are appointed by the President.

The executive is to pass a law by which a special court shall be established to institute legal proceedings against high officials who have committed any crimes whilst in office. This was previously the responsibility of the legislature.

In the provinces, the provincial governors shall appoint the members of the provincial courts who shall enjoy those guarantees established in the provincial constitutions.

Provincial Government

The twenty-two provinces retain all the power not delegated to the Federal Government. They are governed by their own constitutions and must adapt their action to comply with the Junta's basic objectives and aims and the *Estatuto para el Proceso de Reorganización Nacional*. The President appoints the provincial governors, subject to the approval of the Junta. The mandate of the heads of the provincial governments is three years and they may be re-elected only once for a further three-year term. They are dismissed by the President subject to the approval of the Junta.

The principal Federal Court of Appeal in Buenos Aires has three courts: civil and commercial, criminal, and administrative. There are six other courts of appeal in Buenos Aires: civil, commercial, criminal, special civil and commercial, labour, and monetary. There are also federal appeal courts in: La Plata, Bahía Blanca, Paraná, Rosario, Córdoba, Mendoza, Tucumán and Resistencia.

The provincial courts each have their own Supreme Court and a system of subsidiary courts. They deal with cases originating within and confined to the provinces.

RELIGION

In February 1978 all religions other than the Roman Catholic Church were required to register with the Ministry of Foreign Affairs within three months. Religious faiths or sects may be banned if they are considered to be "injurious to public order, national security, morality and customs". In 1976 and 1977 the Government banned the Jehovah's Witnesses, the Divine Light Mission, the Children of God, Hare Krishna and Umbanda.

Four-digit figures indicate city postal code.

ROMAN CATHOLIC CHURCH

There were 23,671,345 Roman Catholics in 1976.

THE PRESS

(four-digit figures denote city post-code)

In 1976 there were 297 daily newspapers (350 in 1978), 765 periodicals and 960 weeklies being published. The major Buenos Aires newspapers then had a total circulation of approximately two million, but the figure has since fallen. The five most important newspapers, which have a semi-national circulation, are: *La Razón*, *Clarín*, *La Prensa*, *La Nación* and *La Opinión*.

Although there is no official censorship of the press, editors and journalists have been arrested for printing articles on "subversive" activities, and sales of some publications have been banned for being morally threatening to the family or for supporting communism.

TRADE UNION

Immediately after the military takeover in March 1976 the Junta Militar took control of the *Confederación General del Trabajo*—CGT, and prohibited another important labour organization, *Las 62 Organizaciones*. The Junta also suspended the *Fuero Sindical* (Special Labour Law) as being unconstitutional and temporarily suspended the right to strike or any action which could interrupt or reduce production both on the part of workers and management. Prison sentences were established for anyone found guilty of stopping industrial production.

The Professional Associations Law of November 1979 prohibited the formation of any central union body and union activity in politics. The two main union groups are the Peronist CGT (Sec.-Gen. SAUL UBALDINI) and the CNT—Comisión Nacional de Trabajo.

AUSTRALIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Australia occupies the whole of the island continent of Australia in the South Pacific and its offshore islands, principally Tasmania to the south-east. Australia's nearest neighbour is Papua New Guinea. In the summer there are tropical monsoons in the northern part of the continent (except for the Queensland coast), but the winters are dry. Both the north-west and north-east coasts are liable to experience tropical cyclones between December and April. In the southern half of the country, winter is the wet season; rainfall decreases rapidly inland. Very high temperatures are experienced during the summer months over the arid interior and for some distance to the south, as well as during the pre-monsoon months in the north. More than 98 per cent of the population are of European origin. English is the official language. Over 88 per cent of the population were Christian in 1966. The national flag (proportions 2 by 1) is blue with a Union Jack in the upper hoist, a large seven-pointed white star in the lower hoist and five smaller white stars in the form of the Southern Cross in the fly. The capital, Canberra, lies in one of two enclaves of Federal Territory known as the Australian Capital Territory (A.C.T.).

Recent History

Since the Second World War Australia has taken an important place in Pacific and Asian affairs and has strengthened its political and economic ties with India, South-East Asia and Japan. The country co-operates more closely than formerly with the U.S.A., and contributed troops to the war in Viet-Nam until 1972. As a founder-member of the Colombo Plan it has given much aid in money, materials and training to Asian countries.

In 1966 Sir Robert Menzies resigned after sixteen years as Prime Minister, and was succeeded by Harold Holt, who died the next year. His successor, Senator John Gorton, resigned after a vote of no confidence and William McMahon was Prime Minister from March 1971 until December 1972, when, after 23 years in office, the Liberal-Country Party Coalition was defeated by the Labor Party, led by Gough Whitlam.

In May 1974 elections were held for both Houses after a crisis concerning supply funds split the Parliament. Labor was returned but lost its majority in the Senate and had its majority in the House of Representatives reduced. In mid-1975 the Whitlam government narrowly survived accusations of unorthodox international loan-raising activities. Resistance to the Government's monetary policy became more strenuous in October when the Opposition in the Senate exercised a constitutional right in blocking Budget Bills concerning money supply. The Government was not willing to consent to a general election over the issue but in November 1975 the Governor-General, Sir John Kerr, intervened and took the unprecedented step of dismissing the Government and installing a caretaker ministry, under Malcolm Fraser, the Liberal leader, to govern until elections. Despite widespread strikes and demonstrations in favour of Mr. Whitlam, the

elections in December produced a large Liberal majority and Mr. Fraser formed a coalition government with the National Country Party (NCP). His subsequent policies encountered strong opposition from trade unions, following which Mr. Fraser called a general election for December 1977, when his coalition was returned with a greatly increased majority. Opposition to the Government's economic policies and those covering the mining and export of uranium continued and led to a series of serious strikes in mid-1979, particularly in the docks, in the telecommunications, transport and civil services and in the iron ore workings in Western Australia. During 1980 Liberal-NCP coalitions retained power after State elections in Western Australia (February) and Queensland (November). Mr. Fraser's coalition won the Federal general elections of October 1980 but with a reduced majority in the House of Representatives.

The Aboriginal Land Rights Act was passed in January 1977 as part of a scheme to establish aboriginal land trusts to hold title to land in the Northern Territory on behalf of the traditional owners. The Trusts are administered by land councils which by 1978 had grouped together into the 42-member Northern Lands Council.

The Northern Territory acceded to self-governing status in 1978.

Government

Australia comprises six states and two territories. Executive power is vested in the British monarch and exercised by her appointed representative, the Governor-General. He normally acts on the advice of the Federal Executive Council, led by the Prime Minister. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers.

Legislative power is vested in the Federal Parliament. This consists of the Queen, represented by the Governor-General, and two chambers elected by universal adult suffrage (voting is compulsory). The Senate has 64 members (10 from each State and two from each of the territories) elected by proportional representation for six years, with half the seats renewable every three years. The House of Representatives has 125 members elected for three years (subject to dissolution) from single-member constituencies. The Federal Executive Council is responsible to Parliament.

Each State has a Governor, representing the Queen, and its own legislative, executive and judicial system. The State Governments are autonomous except for certain powers placed under the jurisdiction of the Federal Government. All except Queensland and the Northern Territory have an Upper House, the Legislative Council, and a Lower House, the Legislative Assembly or House of Assembly. The chief ministers of the States are known as Premiers, as distinct from the Federal Prime Minister.

Defence

Australia's defence policy is based on collective security and it is a member of the British Commonwealth Strategic

Reserve and ANZUS, with New Zealand and the U.S.A. (see p. 124). Australia's armed forces numbered 72,464 at August 1981 (army 32,845, navy 17,298, air force 22,333). The estimated expenditure on defence for 1981/82 was set at \$A4,150.0 million, an increase of 13.8 per cent over 1980/81. Service in the armed forces is voluntary.

Economic Affairs

It has widely been predicted that Australia is entering a period of considerable economic prosperity. Greatly accelerated development of mineral and energy resources followed a four-fold increase in foreign investment from \$A1,270 million in 1979/80 to \$A6,500 million in 1980/81, although the rate of increase has since declined. Australia has vast reserves of coal, petroleum, natural gas, nickel, iron ore and bauxite, and a major diamond field was discovered at Smoke Creek, in Western Australia, in 1980. In addition, the Government lifted the ban on uranium exports in 1977, subject to stringent nuclear safeguards. Gold, silver, lead, zinc and copper are also exploited. About 70 per cent of Australia's petroleum requirements are now met by domestic sources. Petroleum and natural gas production totalled 23.7 million and 9,000 million cubic metres respectively during 1979/80. Coal production is being raised for export and to provide for an increase in the domestic aluminium smelting capacity from 257,000 metric tons per year in 1980 to 2.5 million tons per year by the end of the 1980s. Work on a \$A5,000 million liquefied natural gas project on the North-West Shelf was under way in 1981.

In 1980/81 minerals accounted for about 35 per cent of export revenue. Many of these minerals are being exploited as raw materials for Japan's industries. The pattern of Australia's dependence on foreign trade has thus undergone a change, with Japan overtaking Western countries as the major market, taking 27.2 per cent of Australian exports in 1980/81, although the EEC is still the largest supplier of imports (20.3 per cent in 1980/81). Relations with the EEC have been strained since 1980, owing to the fact that the subsidized prices of certain EEC products, particularly meat and sugar, make Australian goods uncompetitive in their traditional markets.

The manufacturing sector of the economy has become very diversified under the protection of tariffs, currently standing at an effective rate of 27 per cent, and employs 20 per cent of Australia's labour force, mainly in the iron and steel and engineering industries. Other important industries are food processing, machinery, motor vehicles, chemicals, electrical and electronic equipment. Plans to lower the high levels of protection for the textile, clothing and footwear industries were shelved in 1980 for fear of making thousands more unemployed.

Australia's traditional reliance on the agricultural sector has been eroded by the phenomenal mineral discoveries of recent years. However, although it contributes only 7 per cent of G.D.P., agricultural produce earns 45 per cent of Australia's export income. Agricultural production fell by 11 per cent in 1980/81, mainly owing to a drought. Wool, wheat, meat, sugar and dairy products are major export items.

The Fraser Government initiated a policy of wage restraint and cuts in public spending in 1976. In April

1981 it announced plans to cut 16,000 of the 150,000 Civil Service jobs by the end of 1982. Unemployment in mid-1981 was about 7 per cent of the labour force, although industry reported a significant shortage of skilled labour. On July 31st, 1981, after average wage rises of 13.3 per cent in 1980/81 (compared with an inflation rate of 8.8 per cent), the system of wage indexation was abandoned in favour of free collective bargaining. In 1980/81 imports rose by 21 per cent and exports by only 2 per cent to produce a trade deficit of \$A208 million, Australia's first in over a decade; however, this deficit was expected to be compensated for by heavy foreign investment in the country. Gross Domestic Product rose by 2.9 per cent in 1980/81 and was expected to increase by at least 3.5 per cent in 1981/82.

Transport and Communications

Australia has a well developed transport system with 41,602 km. of railway in 1981 and 816,832 km. of roads in 1978. In the thinly populated areas of Central and Western Australia air transport is extremely important and Australia has pioneered services such as the Flying Doctor Service to overcome the problems of distance. Australia is well served by international shipping and air lines.

Social Welfare

Australia provides age, invalid and widows' pensions, unemployment, sickness, special and supporting parents' benefits and family allowances. Reciprocal welfare agreements operate between Australia and New Zealand and the United Kingdom. About 28 per cent of Federal budget expenditure is allocated to welfare and 7 per cent to health. The Government pays medical benefits to Australian residents insured with registered medical benefits organizations to cover 30 per cent of approved medical fees. Pensioners with pensioner health benefit entitlement and people who satisfy Commonwealth Government-defined criteria as being in special need are eligible for free public hospital treatment and medical services. Others must meet the costs either personally or through health insurance.

Education

Education is the responsibility of each of the States and the Federal Government. It is free and compulsory from the ages of 6 to 15. In 1980 there were 2,318,077 children enrolled in government primary and secondary schools, and 666,485 attending private schools. Special services have been developed to meet the needs of children living in the outback, notably Schools of the Air, using two-way receiver sets. A system of one-teacher schools and correspondence schools also helps meet these needs. Australia has 19 universities with (in 1980) 163,156 students.

Tourism

Australian tourism is developing with quicker and cheaper air transport. The main attractions are swimming and surfing on the Pacific beaches, sailing from Sydney and other harbours, skin-diving along the Great Barrier Reef, winter sports in the Australian Alps and summer sports in the Blue Mountains.

Reserve and ANZUS, with New Zealand and the U.S.A. (see p. 124). Australia's armed forces numbered 72,464 at August 1981 (army 32,845, navy 17,298, air force 22,333). The estimated expenditure on defence for 1981/82 was set at \$A4,150.0 million, an increase of 13.8 per cent over 1980/81. Service in the armed forces is voluntary.

Economic Affairs

It has widely been predicted that Australia is entering a period of considerable economic prosperity. Greatly accelerated development of mineral and energy resources followed a four-fold increase in foreign investment from \$A1,270 million in 1979/80 to \$A6,500 million in 1980/81, although the rate of increase has since declined. Australia has vast reserves of coal, petroleum, natural gas, nickel, iron ore and bauxite, and a major diamond field was discovered at Smoke Creek, in Western Australia, in 1980. In addition, the Government lifted the ban on uranium exports in 1977, subject to stringent nuclear safeguards. Gold, silver, lead, zinc and copper are also exploited. About 70 per cent of Australia's petroleum requirements are now met by domestic sources. Petroleum and natural gas production totalled 23.7 million and 9,000 million cubic metres respectively during 1979/80. Coal production is being raised for export and to provide for an increase in the domestic aluminium smelting capacity from 257,000 metric tons per year in 1980 to 2.5 million tons per year by the end of the 1980s. Work on a \$A5,000 million liquefied natural gas project on the North-West Shelf was under way in 1981.

In 1980/81 minerals accounted for about 35 per cent of export revenue. Many of these minerals are being exploited as raw materials for Japan's industries. The pattern of Australia's dependence on foreign trade has thus undergone a change, with Japan overtaking Western countries as the major market, taking 27.2 per cent of Australian exports in 1980/81, although the EEC is still the largest supplier of imports (20.3 per cent in 1980/81). Relations with the EEC have been strained since 1980, owing to the fact that the subsidized prices of certain EEC products, particularly meat and sugar, make Australian goods uncompetitive in their traditional markets.

The manufacturing sector of the economy has become very diversified under the protection of tariffs, currently standing at an effective rate of 27 per cent, and employs 20 per cent of Australia's labour force, mainly in the iron and steel and engineering industries. Other important industries are food processing, machinery, motor vehicles, chemicals, electrical and electronic equipment. Plans to lower the high levels of protection for the textile, clothing and footwear industries were shelved in 1980 for fear of making thousands more unemployed.

Australia's traditional reliance on the agricultural sector has been eroded by the phenomenal mineral discoveries of recent years. However, although it contributes only 7 per cent of G.D.P., agricultural produce earns 45 per cent of Australia's export income. Agricultural production fell by 11 per cent in 1980/81, mainly owing to a drought. Wool, wheat, meat, sugar and dairy products are major export items.

FINANCE

100 cents = 1 Australian dollar (\$A).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10, 20 and 50 dollars.

Exchange rates (October 1981): £1 sterling = \$A1.616; U.S. \$1 = 86.7 Australian cents.

\$A100 = £61.88 = U.S. \$115.31.

Note: The Australian dollar was introduced in February 1966, replacing the Australian pound (exchange rate: £A1 = U.S. \$2.24 from September 1949) at the rate of \$A2 = £A1. From February 1966 to August 1971 the exchange rate remained at \$A1 = U.S. \$1.12 (U.S. \$1 = 89.29 Australian cents). Between December 1971 and December 1972 the par value of the Australian dollar was U.S. \$1.216 (U.S. \$1 = 82.24 Australian cents), though the effective mid-point exchange rate was \$A1 = U.S. \$1.191. Revaluations were made in December 1972 (\$A1 = U.S. \$1.275), in February 1973 (\$A1 = U.S. \$1.4167) and in September 1973 (\$A1 = U.S. \$1.4875). This last valuation remained in effect until September 1974, when the direct relationship with the U.S. dollar was ended and the Australian dollar was linked to a weighted "basket" of the currencies of Australia's main trading partners. The Australian dollar's value immediately fell to U.S. \$1.31, representing an effective devaluation by 11.9 per cent. The currency maintained its weighted value until November 1976, when it was devalued by 17.5 per cent. The average value of the Australian dollar in U.S. dollars was: 1.1923 in 1972; 1.4227 in 1973; 1.4408 in 1974; 1.3102 in 1975; 1.2252 in 1976; 1.1090 in 1977; 1.1447 in 1978; 1.1179 in 1979; 1.1395 in 1980. In terms of sterling, the average exchange rate was £1 = \$A1.469 in 1976; \$A1.573 in 1977; \$A1.676 in 1978; \$A1.895 in 1979; \$A2.042 in 1980.

THE CONSTITUTION

PARLIAMENT

The legislative power of the Commonwealth of Australia is vested in a Federal Parliament, consisting of H.M. the Queen, represented by the Governor-General, a Senate, and a House of Representatives. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives. This power is limited by strict, although unwritten, constitutional convention, and it is rare for such decisions to be made at the sole discretion of the Governor-General. After any general election Parliament must be summoned to meet not later than thirty days after the day appointed for the return of the writs.

THE SENATE

The Senate is composed of ten Senators from each State, two Senators representing the Australian Capital Territory and two representing the Northern Territory. The Senators are directly chosen for a period of six years by the people of the State or Territory, voting in each case as one electorate, and are elected by proportional representation. They retire by rotation, half from each State or Territory, on June 30th of each third year. In the case of a State, if a Senator vacates his seat before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, in joint session, choose a person to hold the place until the expiration of the term or until the election of a successor. If the State Parliament is not in session, the Governor of the State, acting on the advice of the State's Executive Council, may appoint a Senator to hold office until Parliament reassembles, or until a new Senator is elected.

The Senate may proceed to the dispatch of business notwithstanding the failure of any State to provide for its representation in the Senate.

THE HOUSE OF REPRESENTATIVES

In accordance with the Australian Constitution, the total

number of members of the House of Representatives must be as nearly as practicable double that of the Senate. The number in each State is in proportion to population, but under the Constitution must be at least five. The House of Representatives is composed of 124 members, which includes two members for the Australian Capital Territory and one member for the Northern Territory.

Members are elected by universal adult suffrage and voting is compulsory. Qualifications for Commonwealth franchise are possessed by any British subject, not under 18 years of age, subject to certain disqualifications (e.g. if of unsound mind), who has lived in Australia for six months continuously.

Members are chosen by the electors of their respective electorates by the preferential voting system.

The duration of the Parliament is limited to three years.

Qualification for membership of the House of Representatives is possessed by any British subject 18 years of age or over who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth.

THE EXECUTIVE GOVERNMENT

The executive power of the Federal Government is vested in the Queen, and is exercised by the Governor-General, assisted by an Executive Council of Ministers of State, known as the Federal Executive Council. These Ministers are, or must become within three months, members of the Federal Parliament.

The Australian Constitution is construed as subject to the principles of responsible government and the Governor-General acts on the advice of his Ministers in relation to most matters.

THE JUDICIAL POWER

See Judicial System, p. 1557.

THE STATES

The Australian Constitution safeguards the Constitution of each State by providing that it shall continue as

AUSTRALIA

at the establishment of the Commonwealth, except as altered in accordance with its own provisions. The legislative power of the Federal Parliament is limited in the main to those matters which are listed in section 51 of the Constitution, while the States possess, as well as concurrent powers in those matters, residual legislative powers enabling them to legislate in any way for "the peace, order and good Government" of their respective territories. When a State law is inconsistent with a law of the Commonwealth, the latter prevails, and the former is invalid to the extent of the inconsistency.

The States may not, without the consent of the Commonwealth, raise or maintain naval or military forces, or impose taxes on any property belonging to the Commonwealth of Australia, nor may the Commonwealth tax State property. The States may not coin money.

The Federal Parliament may not enact any law for establishing any religion or for prohibiting the exercise of any religion, and no religious test may be imposed as a qualification for any office under the Commonwealth.

The Commonwealth of Australia is charged with protecting every State against invasion, and, on the application of a State Executive Government, against domestic violence.

Provision is made under the Constitution for the admission of new States and for the establishment of new States within the Commonwealth of Australia.

ALTERATION OF THE CONSTITUTION

Proposed laws for the amendment of the Constitution must be passed by an absolute majority in both Houses of the Federal Parliament, and not less than two or more than six months after its passage through both Houses the proposed law must be submitted in each State to the qualified electors.

In the event of one House twice refusing to pass a proposed amendment which has already received an absolute majority in the other House, the Governor-General may, notwithstanding such refusal, submit the proposed amendment to the electors. If in a majority of the States a majority of the electors voting approve the proposed law and if a majority of all the electors voting also approve, it shall be presented to the Governor-General for Royal Assent.

No alteration diminishing the proportionate representation of any State in either House of the Federal Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing or altering the limits of the State, or in any way affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

NEW SOUTH WALES

The State's executive power is vested in the Governor, appointed by the Crown, who is assisted by a Cabinet.

The State's legislative power is vested in a bicameral Parliament, the Legislative Council and the Legislative Assembly. The Legislative Council, formerly consisting of 60 members, began, in late 1978, a process of reconstitution at the end of which it will consist of 45 members directly elected for a term of nine years, fifteen members retiring every three years. The Legislative Assembly consists of ninety-nine members and sits for three years.

VICTORIA

The State's legislative power is vested in a bicameral Parliament: the Upper House, or Legislative Council, of forty-four members, elected for six years, and the Lower House, or Legislative Assembly, of eighty-one members,

The Constitution

elected for three years. One-half of the members of the Council retire every three years.

In the exercise of the executive power the Governor is assisted by a Cabinet of responsible Ministers. Not more than five members of the Council and not more than thirteen members of the Assembly may occupy salaried office at any one time.

The State has eighty-one electoral districts, each returning one member, and twenty-two electoral provinces, each returning two Council members.

QUEENSLAND

The State's legislative power is vested in a unicameral Parliament composed of eighty-two members who are elected from eighty-two districts for a term of three years.

SOUTH AUSTRALIA

The State's Constitution vests the legislative power in a Parliament elected by the people and consisting of a Legislative Council and a House of Assembly. The Council is composed of twenty-two members, half of whom retire every three years. Their places are filled by new members elected under a system of optional proportional representation, with the whole State as a single electorate. The executive has no authority to dissolve this body.

The forty-seven members of the House of Assembly are elected for three years from forty-seven electoral districts.

The executive power is vested in a Governor, appointed by the Crown, and an Executive Council consisting of thirteen responsible Ministers.

WESTERN AUSTRALIA

The State's administration is vested in the Governor, a Legislative Council and a Legislative Assembly.

The Legislative Council consists of thirty-two members, each of the sixteen provinces returning two members. Election is for a term of six years, one-half of the members retiring every three years.

The Legislative Assembly consists of fifty-five members, elected for three years, each representing one electorate.

TASMANIA

The State's executive authority is vested in a Governor, appointed by the Crown, who acts upon the advice of a Legislative Council and House of Assembly. The Council consists of nineteen members who sit for six years, retiring in rotation. There is no power to dissolve the Council. The House of Assembly has 35 members elected for four years.

NORTHERN TERRITORY

On July 1st, 1978, the Northern Territory was established as a body politic with executive authority for specified functions of government. Most functions of the Government were transferred to the Territory Government in 1978, and all other functions except Aboriginal Affairs and uranium mining were transferred in 1979.

The Territory Parliament consists of a single house, the Legislative Assembly, with 19 members. The first Parliament stayed in office for three years, but as from the election held in August 1980 members are elected for a term of four years.

The Office of Administrator continues. The Northern Territory (Self-Government) Act provides for the appointment of an Administrator by the Governor-General charged with the duty of administering the Territory. In respect of matters transferred to the Territory Government, the Administrator acts with the advice of the Territory Executive Council; in respect of matters retained by the Commonwealth, he acts on Commonwealth advice.

AUSTRALIA

AUSTRALIAN CAPITAL TERRITORY

The Australian Capital Territory, within which the Federal Seat of Government is situated, is administered by the Federal Government. Under legislation passed by the Parliament the Governor-General is given power to

The Constitution, The Government, Legislature

make ordinances for the peace, order and good government of the Territory. There is established in the Territory an elected Legislative Assembly, consisting of 18 elected members, which may advise the Government on matters affecting the Territory.

JUDICIAL SYSTEM

The judicial power of the Commonwealth of Australia is vested in the High Court of Australia, in such other Federal Courts as the Federal Parliament creates, and in such other courts as it invests with Federal jurisdiction.

The High Court consists of a Chief Justice and six other Justices, each of whom is appointed by the Governor-

General in Council, and has both original and appellate jurisdiction.

The High Court's original jurisdiction extends to all matters arising under any treaty, affecting representatives of other countries, in which the Commonwealth of Australia or its representative is a party, between States or

AUSTRALIA

between residents of different States or between a State and a resident of another State, and in which a writ of *mandamus*, or prohibition, or an injunction is sought against an officer of the Commonwealth of Australia. It also extends to matters arising under the Constitution or involving its interpretation, and to any other matters empowered by the Federal Parliament.

The High Court's appellate jurisdiction extends to appeals from all judgments, decrees, orders and sentences of its own Justices exercising original jurisdiction, and, in a limited way, to appeals from any other Federal Court or court exercising Federal jurisdiction, and from the Supreme Court of any State or any other State court from which an appeal lies to the Queen in Council.

Legislation enacted by the Federal Parliament in 1976 substantially changed the exercise of Federal and Territory judicial power, and, by creating the Federal Court of Australia in February 1977, enabled the High Court of Australia to give greater attention to its primary function as interpreter of the Australian Constitution. The Federal Court of Australia has assumed, in two divisions, the jurisdiction previously exercised by the Australian Industrial Court and the Federal Court of Bankruptcy and has additionally been given jurisdiction not previously exercised by any other court in the developing field of administrative law. It also hears appeals from the Court constituted by a single Judge, from the Supreme Courts of the Territories, and in certain specific matters from State Courts, other than a Full Court of the Supreme Court of a State, exercising Federal jurisdiction. The Federal Court is composed of a Chief Judge and twenty-four other Judges.

THE PRESS

Australia's legislation relating to the Press varies in different States.

Under the law concerning contempt of court, to publish names or photographs before proceedings begin may draw heavy penalties. Though accurate reporting of a case while it is being tried is privileged, a judge is empowered to ban all reports until the conclusion of the case.

Each state has its legislation against obscene publications, which is particularly severe in the State of Queensland, whose broadly defined Objectionable Literature Act of 1954 covers a wide range of offences.

The libel law ranges from seditious libel for matter liable to cause a breach of the peace, or for excessive abuse of government officials, to defamatory libel. Certain government agencies have privilege. A journalist, if prosecuted, is obliged to justify every material part of an allegedly defamatory statement, and this has led to a marked tendency not to publish outspoken comment where there is a risk of prosecution. In all States the author, editor, owner, publisher, printer and, to some extent, the distributor of a publication are liable for damages to the person defamed.

The total circulation of Australia's daily newspapers is very high but in the remoter parts of the country weekly papers are even more popular. Most of Australia's newspapers are published in sparsely populated rural areas where the demand for local news is strong. The only news-

papers which may fairly claim a national circulation are the dailies *The Australian* and *Australian Financial Review*, and the weeklies *The Bulletin*, the *National Times* and the *Nation Review*, the circulation of most newspapers being almost entirely confined to the State in which each is produced.

All newspapers in the state capitals are owned by limited companies. The trend towards concentration of ownership has led to the development of three principal groups of newspapers. Economic conditions have necessitated the extension of the activities of newspaper companies into related spheres, magazine and book publishing, radio and television, etc. The main groups are as follows:

The John Fairfax Group: 235 Jones St., Broadway, P.O.B. 506, Sydney, N.S.W. 2001; f. 1841; Chair. J. O. FAIRFAX; with its subsidiary Associated Newspapers Ltd., controls *The Sydney Morning Herald*, *The Sun*, *National Times*, *Australian Financial Review* and the *Sun-Herald* (Sydney), *The Age* (Melbourne), *The Canberra Times* (Canberra), *Illawarra Mercury* (Wollongong), and *The Newcastle Herald* (Newcastle); also has radio and television interests.

The Herald and Weekly Times Ltd. Group: 44 Flinders St., Melbourne, Vic. 3000; Chair. Sir KEITH MACPHERSON; controls, among other publications, *The Herald*, *The Sun News-Pictorial*, *The Bendigo Advertiser* and *The Geelong Advertiser* (Melbourne), *The West Australian*, *Daily News* (Perth), *Kalgoorlie Miner*, *Papua New Guinea Post-*

CHRISTMAS ISLAND

COCOS (KEELING) ISLANDS

NORFOLK ISLAND

OTHER TERRITORIES

CHRISTMAS ISLAND

Christmas Island covers an area of about 135 square kilometres and lies 360 kilometres south of Java Head in the Indian Ocean. The nearest point on the Australian coast is North West Cape, 1,408 kilometres to the south-east.

Administration was transferred from Singapore to Britain on January 1st, 1958, pending final transfer to Australia. It became an Australian territory on October 1st, 1958. An Administrator, appointed by the Governor-General of Australia and responsible to the Minister for Home Affairs and the Environment, is the senior government representative on the island. Christmas Island has no indigenous population. At March 31st, 1981, the estimated population was 3,214 (1,854 Chinese, 859 Malays, 369 Europeans and 132 others). Residents consist of employees of the Phosphate Mining Company of Christmas Island and the Administration and their families. The recovery of phosphates is the sole economic activity, and exports were 1,254,350 metric tons of phosphate rock, 96,393 tons of phosphate dust and 8,800 tons of citraphos dust for the year ending June 30th, 1981. In 1980 it was estimated that there were sufficient recoverable reserves to ensure the continuation of mining for eight years.

Administrator: The Hon. R. McN. HOLTON, C.M.G.

Supreme Court: Judge: The Hon. Mr. Justice W. E. S.

FORSTER; Additional Judges The Hon. Mr. Justice E. A. DUNPHY, The Hon. Mr. Justice J. F. GALLOP.

Christmas Island Broadcasting Service: Christmas Island 6798; f. 1967; owned and operated by Australian Administration; daily broadcasting service by Radio VLU-2 on 1422 KHz. in English, Malay, Mandarin and Cantonese; on air Monday to Saturday 23.00-15.00 G.M.T., Sunday 01.00-14.00 G.M.T.; Broadcasting Officer MICHAEL TAFT.

There were about 3,800 radio sets in 1981.

Christmas Island Phosphate Commission: 515 Collins St., Melbourne, Vic. 3000, Australia; f. 1948. The Commission is responsible to the Australian and New Zealand Governments for the mining and distribution of phosphate from Christmas Island and the purchase of phosphate for Australia and New Zealand from other world sources. The Commission's operations are performed by the Phosphate Mining Company of Christmas Island.

Transport: Australian Government charter aircraft operate a fortnightly service from Perth via the Cocos (Keeling) Islands. The Phosphate Mining Company of Christmas Island conducts a cargo-shipping service to Singapore and to New Zealand, Malaysian and Australian ports. They also operate flights from Singapore and Malaysia to Christmas Island.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands are 27 in number and lie 2,768 kilometres north-west of Perth in the Indian Ocean. The islands, which have an area of 14 square kilometres, form two low-lying coral atolls, densely covered with coconut palms. The population on June 30th, 1979, was 560, comprising 250 Australian Administration employees and their families on West Island and 310 Cocos Malays and 5 Europeans on Home Island, the only inhabited islands in the group. The Cocos Malays are descendants of the original labourers brought to the islands in the early nineteenth century by John Clunies-Ross.

The islands were declared a British possession in 1857 and came successively under the authority of the Governor of Ceylon (1878) and the Governor of the Straits Settlements (1886); they were annexed to the Straits Settlements and incorporated with the Settlement (later Colony) of Singapore in 1903. Administration of the islands was transferred to the Commonwealth of Australia in November 1955.

An Administrator, appointed by the Governor-General of Australia and responsible to the Minister for Home Affairs, is the senior government representative in the islands.

The Government announced new policies concerning the islands in June 1977 which resulted in the Commonwealth's purchase from Mr. John Clunies-Ross of the whole of his interests in the Cocos (Keeling) Islands with the exception of his residence and an associated dwelling. The purchase took effect on September 1st, 1978.

In July 1979 the Cocos (Keeling) Islands Council was established, with a wide range of functions in the Home Island village area, which the Government has transferred to the Council on trust for the benefit of the Cocos community. All proposed ordinances, regulations, rules and by-laws for the Territory must be furnished to the Council for its consideration. The Administrator may seek the advice of the Council, and the Council may advise the Administrator, on any matter relating to the peace, order and good government of the Territory.

Although fish are caught locally and the Cocos Malay community is largely self-sufficient, other foodstuffs, fuels and consumer items are imported from mainland Australia. A Cocos Postal Service (including a philatelic bureau) came into operation in September 1979 and revenue from the Service is to be used for the benefit of the community.

The main economic activity is the production and export of copra. Total exports in 1980/81 were 187 metric tons.

Primary education is provided at the schools on Home and West Islands. Secondary education is provided to year 10 on West Island.

Administrator: CHARLES I. BUFFETT, O.B.E.

Supreme Court, Cocos (Keeling) Islands: Judge: The Hon. Mr. Justice WILLIAM E. D. FORSTER; Senior Additional Judge: The Hon. Mr. Justice EDWARD A. DUNPHY; Additional Judge: The Hon. Mr. Justice JAMES H. MUIRHEAD.

Radio Cocos: daily broadcasting service from 07.00 to 23.30 by Radio VKW, West Island; Man. DENIS CARTLEDGE.

Australian Government charter aircraft from Perth carry passengers, supplies and mail to and from the Cocos every fortnight. Cargo vessels from Perth deliver supplies, at intervals of several months.

NORFOLK ISLAND

Norfolk Island lies off the eastern coast of Australia, about 1,400 km. east of Brisbane. It is about 8 km. long and 4.8 km. wide and was discovered by Captain Cook in 1774. The island was used as a penal settlement from 1788 to 1813 and again from 1825 to 1855. It was a separate Crown Colony until 1897, when it became a Dependency of New South Wales. In 1913 it was transferred to the Australian Government.

In 1978 the Australian Government announced that it would develop for the island a form of elected government which would be responsible for raising the necessary revenue under its own system of law.

Under the Norfolk Island Act 1979, Norfolk Island progressed to responsible legislative and executive government, enabling it to run its own affairs to the greatest practicable extent. Wide powers are exercised by the Norfolk Island Legislative Assembly and by an Executive Council comprising the executive members of the Legislative Assembly who have ministerial-type responsibilities. The Act preserves the Commonwealth's responsibility for Norfolk Island as a Territory under its authority, with the Minister for Home Affairs and the Environment as the responsible Minister. The Act indicates Parliament's intention that consideration would be given to an extension of the powers of the Legislative Assembly and the political and administrative institutions of Norfolk Island within five years.

About 405 hectares are arable. The main crops are Kentia palm seed, cereals, vegetables and fruit. Some flowers and plants are grown commercially. The Administration is increasing the area devoted to Norfolk Island pine and hardwoods. Seed of the Norfolk Island pine is exported. Tourism is the island's main industry.

EDUCATION

Education is free and compulsory for all children between the ages of 6 and 15. Pupils attend the government school from infant to secondary level. Students wishing to follow higher education in Australia are eligible for bursaries and scholarships.

OTHER TERRITORIES

AUSTRALIAN ANTARCTIC TERRITORY

The Australian Antarctic Territory was established by Order in Council, proclaimed in August 1936, subsequent to the Australian Antarctic Territory Acceptance Act (1933). It consists of the portion of Antarctica (divided by the French territory of Adélie Land) lying between longitudes 45°E and 136°E, and between longitudes 142°E and 160°E. The Australian National Antarctic Research Expeditions (ANARE) maintains three permanent scientific stations, Mawson, Davis and Casey, in the territory. The area of the territory is 6,120,000 sq. kilometres.

HEARD ISLAND AND McDONALD ISLANDS

These islands are situated 4,000 km. south-west of Perth, Western Australia, and have been administered by the Australian Government since 1947, when it established a scientific research station on Heard Island (which functioned until 1955). The area is 370 sq. kilometres. There are no permanent inhabitants, but Australian expeditions visit the island from time to time. Heard Island is about 44 kilometres long and 20 wide. The McDonald Islands, with an area of about one sq. kilometre, lie approximately 40 km. to the west of Heard Island.

CORAL SEA ISLANDS TERRITORY

The Coral Sea Islands Territory was created in May 1969 and is composed of a number of islands situated east of Queensland between the Great Barrier Reef and 157° 10'E longitude. The islands had been acquired by the Commonwealth by acts of sovereignty over a number of years. All are very small and they include Cato Island, Chilcott Islet in the Coringa Group, and the Willis Group. Apart from a manned station belonging to the Commonwealth Bureau of Meteorology on one of the Willis Group, the islands are uninhabited.

The Act constituting the Territory did not establish an administration on the islands but provides means of controlling the activities of those who visit them. The possibility of exploration for oil on the continental shelf and the increasing range and scope of international fishing enterprises made desirable such an administrative framework and system of law. The Governor-General is empowered to make ordinances for the peace, order and good government of the Territory, and the Supreme Court and Court of Petty Sessions of Norfolk Island have jurisdiction in relation to the Territory. The Minister for Home Affairs and the Environment is responsible for matters affecting the Territory.

THE BAHAMAS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of the Bahamas consists of about 700 islands and over 2,000 cays and rocks extending from off the Florida coast of the U.S.A. to just north of Cuba and Haiti. The climate is mild and sub-tropical with average temperatures of about 30°C (86°F) in summer and 20°C (68°F) in winter. Average annual rainfall is about 1,000 mm. (39 inches). English is the official language. The population is mainly Christian, the largest denominations being the Anglicans, Baptists, Roman Catholics and Methodists. The flag has three equal horizontal stripes of blue, gold and blue, with a black triangle at the hoist extending across half the width of the flag. The capital, Nassau, stands on the island of New Providence.

Recent History

A former British colonial territory, the Bahamas attained internal self-government in January 1964. The first elections under universal adult suffrage were held in January 1967 for an enlarged House of Assembly. The Progressive Liberal Party (PLP), supported mainly by Bahamians of African origin and led by Lynden Pindling, won 18 of the 38 seats, as did the ruling United Bahamian Party (UBP), dominated by Europeans. With the support of another member, the PLP formed a government and Pindling became Premier. At another election in April 1968 the PLP won 29 seats and the UBP only seven.

Following a constitutional conference in September 1968, the Bahamas was given increased responsibility for internal security, external affairs and defence in May 1969. In the elections of September 1972, which were dominated by the issue of independence, the PLP maintained its majority, and on July 10th, 1973, the Bahamas became an independent nation within the Commonwealth. In the elections of July 1977, which were fought on the issues of unemployment and corruption, the PLP increased its majority.

Constitutional amendments have been proposed, depriving over 1,000 people of British and Commonwealth origin, who had settled in the Bahamas before independence, of the right to citizenship. The U.S.A. is co-operating in a drive to reduce drug trafficking through the Bahamas. The policy of steady repatriation of illegal Haitian immigrants in the Bahamas led to strained relations with Haiti in 1981.

Government

There is a 16-member Senate, nine members appointed by the Governor-General on the advice of the Prime Minister, four by the Leader of the Opposition and three after consultation with the Prime Minister. Together with the 38-member House of Assembly, elected for five years (subject to dissolution) by universal adult suffrage, it forms a bicameral Parliament to which the Cabinet is responsible. Executive power is vested in the Queen, represented by a Governor-General who is advised by the Cabinet.

Defence

The Royal Bahamas Police Force is a paramilitary

organization numbering 1,218 in 1979. A defence force was established in 1977.

Economic Affairs

Tourism is the main source of revenue, accounting for about 75 per cent of G.N.P. and employing over half of the working population. The tourist industry was severely affected by the world-wide recession of 1974-75, but its recovery during 1978-80 led to a corresponding increase in real G.N.P. A 10-year Tourism Development Plan aims to attract more tourists to the less-developed Family Islands. The Government is attempting to broaden the country's economic base by linking the development of agriculture and industry specifically to tourism.

Approximately 80 per cent of food supplies are imported. The reduction of these imports, which are mainly required for the tourist trade, is a primary aim of the Government's 1980-90 Master Plan to promote economic growth. The plan provides for improvements to agricultural and fisheries infrastructure and the expansion of job capacity in the primary sector; the unemployment rate of the Bahamas was 13 per cent in 1980. Agricultural development, research and training, carried out under a government project (BARTAD), have led to increased local production, and the cultivation for export markets of crops such as citrus fruits and avocados is now being encouraged.

Industrial development is based on petroleum refining although the cement, pharmaceuticals and spirits industries are also expanding. The distillery at Nassau is the largest exporter of light rums in the Caribbean. The Government aims to attract light manufacturing and assembly industries through special tax incentives. The economy has suffered from the oil crisis. The oil transshipment terminal completed in 1974 is dealing with only 80 million barrels per year, compared with its capacity of 150 million, and a 250,000-barrel oil refinery was refining only 17,000 barrels per day in 1981. Mexico and Venezuela were to supply all domestic oil needs on special credit terms from late 1981. The Bahamas set up its own shipping registry in 1976.

Although the Government is committed to retaining the Bahamas' status as a tax haven, recent measures to "Bahamianize" the companies registered in the Bahamas have resulted in higher stamp, property, immigration and company registration fees and a new business licence fee. The Bahamas has become a leading offshore financial centre. The financial sector is estimated to pay over BS\$50 million per year into the economy in salaries, licence fees, immigration fees, stamp duties, etc., making it the largest private contributor to budget revenue. This industry also provides employment for over 2,000 Bahamians.

The Government's "social revolution plan" for the 1980s takes account of an annual population growth rate of nearly 4 per cent and includes legislation controlling the sale of land to foreigners.

Transport and Communications

Inter-island transport is by aircraft and boat and on the larger islands there are excellent roads for motor traffic. A submarine 1,380-channel telecommunications system extending 362 km. (225 miles) has been installed between the Bahamas and the U.S.A., and there are radio telephone connections between the islands. Grand Bahama has two deep water ports.

Social Welfare

The health service is centralized in Nassau, although cottage hospitals and health centres exist in several of the Family Islands. A Flying Doctor Service supplies medical attention to islands not already provided for. A National Insurance Scheme, established in 1972, provides a wide range of benefits including sickness, maternity, retirement and widows' pensions as well as social assistance payments. An Industrial Injuries Scheme has been set up.

Education

Education is free and compulsory between the ages of 5 and 14. There is an extensive primary and secondary school system as well as several private and denominational schools. The University of the West Indies has an extra-mural department in Nassau and in 1979 opened a branch in the Bahamas offering degree courses in hotel management and tourism. Technical, teacher-training and

professional qualifications can be obtained at the two campuses of the College of the Bahamas and the University of Miami also runs a degree programme. In 1980 education received B\$30.7 million, representing 19.5 per cent of the total budgetary expenditure.

Tourism

The mild climate and beautiful beaches attract many tourists to the Bahamas and tourism is the principal source of income. In 1980 there were 1,904,560 tourist arrivals (1,262,330 by air and 642,230 by sea).

Public Holidays

1982: April 9th (Good Friday), April 12th (Easter Monday), May 31st (Whit Monday), June 4th (Labour Day), July 10th (Independence Day), August 2nd (Emancipation Day), October 12th (Discovery Day/Columbus Day), December 25th, 26th (Christmas).

1983: January 1st (New Year).

B\$ 100=£53.50=U.S. \$ 100.00.

Note: The Bahamian dollar was introduced in May 1966, replacing the Bahamian pound (at par with the pound sterling) at the rate of B\$1=B£0.35 or 7 shillings. The new currency had an initial value of 98 U.S. cents (U.S. \$1=B\$1.0204), which remained in effect until February 1970. Since February 1970 the Bahamian dollar has been at par with the U.S. dollar, despite two devaluations of U.S. currency (in December 1971 and February 1973). In terms of sterling, the exchange rate was £1=B\$2.4490 (B\$1=8s. 2d.) from November 1967 to February 1970; £1=B\$2.40 (B\$1=8s. 4d. or 41.67p) from February 1970 to August 1971; and £1=B\$2.6057 (B\$1=38.38p) from December 1971 to June 1972.

THE CONSTITUTION

Parliament consists of a Governor-General, representing the Queen, a nominated Senate and an elected House of Assembly. The Governor-General appoints the Prime Minister and the Cabinet on the advice of the Prime Minister. The Cabinet has not fewer than eight other ministers, of which one is the Attorney-General. The Governor-General appoints a Leader of the Opposition.

The Senate (upper house) consists of 16 members of whom nine are appointed by the Governor on the advice of the Prime Minister, four members on the advice of the

Opposition Leader, and three on the Prime Minister's advice after consultation with the Opposition Leader. The House of Assembly (lower house) has 38 members. A Constituencies Commission reviews numbers and boundaries at intervals of not more than five years and can recommend alterations for approval of the House. The life of Parliament is limited to a maximum of five years.

The constitution provides for a Supreme Court and a Court of Appeal.

JUDICIAL SYSTEM

The Bahamas Court of Appeal, the Supreme Court, the Magistrates' Courts and the Juvenile Courts are the main courts of the Bahamian judicial system.

All Courts, apart from the Juvenile Courts which are

concerned only with criminal matters, have both a criminal and civil jurisdiction. All but the Supreme Court are of limited jurisdiction. The Magistrates' Courts are presided over by a Commissioner sitting as Magistrate, or by a professionally qualified Stipendiary and Circuit Magistrate in New Providence and Grand Bahama.

Whereas all magistrates are empowered to try offences which may be tried summarily, a Stipendiary and Circuit Magistrate may, with the consent of the accused, also try certain less serious indictable offences. But a Stipendiary and Circuit Magistrate may in no case pass a sentence of imprisonment of more than two years for any one offence and may only in rare cases impose a fine in excess of B\$1,500.

All magistrates may make maintenance orders, and, in certain circumstances, orders for separation and custody of children. Where title to land is not in dispute and the value of the land is B\$142.85 or less they may hear and determine the case.

A lay magistrate has a jurisdiction of up to B\$285.71 for matters of contract or tort. But when a case is remitted to him by the Supreme Court the limit is B\$428.56. The limit for a Stipendiary and Circuit Magistrate is B\$571.42.

Appeals in almost all matters lie from the Supreme Court to the Court of Appeal with further appeal in certain instances to the Judicial Committee of the Privy Council in the United Kingdom.

Justices of the Supreme Court: HARVEY L. DACOSTA, C.M.G., Q.C. (acting Chief Justice), VIVIAN O. BLAKE, Q.C., Sir DENNIS MALONE, CHARLES GRAHAM-PERKINS.

Justices of the Court of Appeal: Sir ALASTAIR BLAIR-KERR, Sir WILLIAM DUFFUS, Prof. TELFORD GEORGES, Sir JOSEPH LUCKHOO, Sir PHILIP GEORGE.

A northern (Grand Bahama) service of Radio Bahamas was established early in 1973 at Freeport. In 1977 there were approximately 100,000 radio receivers.

ZNS-T.V.: f. 1977; Gen. Man. CALSEY JOHNSON.

ZNS-TV covers the Central Bahamas and the main capital of New Providence. Freeport, the second city, is covered by cable television. American television programmes can be received.

In 1980 the Bahamas had approximately 36,000 television receivers in use.

FINANCE

In recent years the Bahamas has developed into one of the world's foremost financial centres, and finance has become a significant feature of the economy. In 1981 there were 318 financial institutions in the Bahamas; 218 dealt with the general public while the remaining 100 were restricted, non-active or nominee institutions. There were 120 Eurocurrency branches of foreign banks, mostly American or Swiss.

There are no corporation, income, capital gains or withholding taxes or estate duty, but higher stamp, property, immigration and company registration fees were introduced for non-Bahamian companies in 1976.

BAHRAIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Bahrain consists of a group of islands situated midway down the Arabian Gulf about 30 km. (18 miles) from the east coast of Saudi Arabia. There are six principal islands in the Bahrain group, of which the largest is Bahrain itself, about 50 km. (30 miles) long and between 13 and 25 km. (8 and 15 miles) wide. The climate is cool and temperate from December to the end of March, becoming very hot and humid during the summer months. In August and September temperatures can rise to 40°C (104°F). The official language is Arabic, but English is widely spoken. Bahrain is a predominantly Muslim country, the population being divided between the Shi'ites (slightly more than 50 per cent) and the Sunnis (less than 50 per cent). The national flag (proportions 5 by 3) is scarlet, with a vertical white stripe at the hoist, the two colours separated by a serrated line. The port of Manama is the capital.

Recent History

Bahrain was a British Protected State from 1816 until 1971. In 1971 the British Government withdrew troops "east of Suez" and on August 15th, 1971, the Amir, Sheikh Isa, declared Bahrain an independent sovereign state. In August 1975 the arrest of left-wing dissidents was followed by the dissolution of the National Assembly, which by late 1981 had not been re-convened. Since the Iranian revolution there has been evidence of tension between the Shi'ites, who form a slender majority, and the Sunnis, the sect to which the Amir belongs. Bahrain was one of the six founder-members of the Gulf Co-operation Council (see p. 170) in March 1981.

Government

Bahrain is an independent sovereign state ruled by an Amir through an appointed Cabinet. In August 1975 the National Assembly was dissolved (see National Assembly, p. 1591). The country is divided into five rural areas administered by Municipalities.

Defence

In July 1981 the Bahrain Defence Force consisted of 2,500 men. Defence expenditure in 1981 was budgeted at BD 51 million.

Economic Affairs

The traditional occupations of cattle breeding, agriculture and fishing are still practised throughout the islands. The main crops are vegetables, lucerne, other fodder crops and some dates.

Oil in commercial quantity was found in 1932 and has since been developed by the Bahrain Petroleum Company. Bahrain became a member of O.A.P.E.C. in May 1970. Although Bahrain's production of crude oil is relatively small and is declining, it has a large refinery whose output in 1980 was 87.7 million barrels.

Good communications facilities and modern port installations encourage Bahrain's transit trade. Bahrain has

a free zone in which many British, American and local concerns have their headquarters. The ALBA aluminium smelter has an annual capacity of more than 170,000 tons and an O.A.P.E.C. dry dock (ASRY), capable of accepting tankers of 500,000 d.w.t., serviced more than 400 ships between December 1977 and July 1981. In early 1982 the construction of the Arab Iron and Steel Company's iron pelletizing plant and the Gulf Petrochemical Industries Company's plant promised a boost to the economy.

In October 1975 the Government began to license "Off-shore Banking Units" (see Banking section), and by July 1981 63 "OBUs" were in operation, with assets of U.S. \$42,900 million.

Transport and Communications

Roads are good and there is a national bus system. In October 1981 work was due to begin on a causeway to link Bahrain with Saudi Arabia. Muharraq Airport has first-class facilities. The port of Mina Sulman is being further developed.

Tourism

There are several archaeological sites of importance. Bahrain is the site of the ancient trading civilization of Dilmun. There is a wide selection of hotels and restaurants.

Social Welfare

The State-run medical service provides comprehensive in-patient and out-patient treatment for all, including expatriates. There are also dentists, doctors and opticians in private practice. A Social Security Law covering pensions, industrial accidents, sickness, unemployment, maternity and family allowances was introduced in October 1976.

Education

Government education is free in Bahrain. In 1980 44,109 children were receiving primary education in 1,227 classes. There were 16,430 pupils at intermediate level and 7,315 at secondary level. Private education is also available.

Public Holidays

1982: July 23rd-25th (Id ul Fitr), September 29th-October 1st (Id ul Adha), October 19th (Muslim New Year), October 28th-29th (Ashoura), December 16th (National Day), December 28th (Mouloud, Birth of the Prophet).

1983: January 1st (New Year's Day).

Weights and Measures

The metric system is being introduced.

Currency and Exchange Rates

1,000 fils = 1 Bahrain dinar (BD).

Exchange rates (October 1981):

£1 sterling = 704.6 fils;

U.S. \$1 = 377.0 fils.

TRANSPORT

ROADS

Most inhabited areas of Bahrain are linked by bitumen-surfaced roads. Public transport consists of taxis and privately owned bus services. A national bus company provides public services throughout the country. A modern network of dual highways is being developed and work on a causeway link with Saudi Arabia was due to begin in October 1981.

SHIPPING

Assistant Under-Secretary for Customs and Ports: Sheikh DAIJ BIN KHALIFA AL-KHALIFA.

Port Director: EID ABDULLA YUSUF.

Harbour Master: JOHN ALAN DUCK.

Numerous shipping services link Bahrain and the Gulf with Britain, Europe, the United States, Pakistan, India, the Far East and Australia.

The deep water harbour of Mina Sulman was opened in April 1962; it has 16 berths capable of taking vessels of draughts up to 10 metres. In the vicinity are two slipways able to take vessels of up to 1,016 tonnes and 73 metres in

BANGLADESH

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Bangladesh is surrounded by Indian territory except for a short south-eastern frontier with Burma and a southern coast fronting the Bay of Bengal. The climate is tropical monsoon with an average temperature of 67°F (19°C) from October to March and 84°F (29°C) from May to September. Three-quarters of the annual average rainfall (74 inches or 188 cm. in Dacca) occurs between June and September. About 95 per cent of the population speak Bengali, the State language, the remainder tribal dialects. The principal religion is Islam but there are small minorities of Hindus, Buddhists and Christians. The national flag is green, with a red disc in the centre. The capital is Dacca.

Recent History

The modern state of Bangladesh began as East Pakistan, one of the five provinces into which Pakistan was divided at its separation from the old Indian Empire in 1947. East Pakistan and the four western provinces were separated by 1,000 miles of Indian territory. Although the East was more populous, government was based in West Pakistan. Dissatisfaction in East Pakistan at its dependence on a remote central government flared up when Urdu was declared Pakistan's official language. Bengali, the main language of East Pakistan, was finally admitted as the joint official language in 1954, and in 1955 Pakistan was reorganized into two wings, east and west, with equal representation in the central legislative assembly. However, discontent continued in the eastern wing and the Awami League, led by Sheikh Mujibur Rahman, demanded autonomy for the East. General elections in December 1970 gave the Awami League a majority in Pakistan's National Assembly, and Sheikh Mujib should have become Prime Minister. The President, Gen. Yahya Khan, would not accept this, however, and on March 26th, 1971, the independence of the People's Republic of Bangladesh was proclaimed.

War followed and Sheikh Mujib was arrested. Refugees fled into India and in December 1971 the Indian army intervened in the fighting. Pakistan surrendered on December 16th and Bangladesh's independence became a reality. Sheikh Mujib was freed by Pakistan's new President, Zulfikar Ali Bhutto, in January 1972 and on his arrival in Dacca he became Prime Minister. Elections held in March 1973 confirmed him in office. The new nation quickly achieved international recognition and was finally recognized by Pakistan in February 1974. Difficulties soon arose as widespread famine sapped the economy which had already been deeply affected by the war. Political stability was threatened by opposition groups which resorted to terrorism and included both political extremes; at the end of December a state of emergency was declared and constitutional rights suspended. In January 1975 parliamentary government was replaced by a presidential form of government. Sheikh Mujib became President, assuming absolute power, and created the Bangladesh Peasants' and Workers' Awami League. In February Bangladesh became a one-party state.

In August 1975 Sheikh Mujib and his family were assassinated in a coup led by a group of army majors. Khandakar Mushtaq Ahmed, the former Minister of Commerce, assumed the Presidency, declared martial law and banned political parties. A counter-coup in November brought Khalid Musharraf to power as Chief of Army Staff, but on November 7th a third coup overthrew Gen. Musharraf's four-day-old regime and power was assumed by the three service chiefs jointly, under a non-political President, Abusadet Mohammad Sayem, the Chief Justice of the Supreme Court. A neutral non-party government was formed, in which the reinstated Chief of Army Staff, Major-Gen. Ziaur Rahman (Gen. Zia), took precedence over his colleagues.

An early return to representative government was promised, but in November 1976 elections were postponed indefinitely and, in a major shift of power, Gen. Zia took over the powers of Chief Martial Law Administrator from President Sayem, assuming the presidency also in April 1977. He amended the Constitution, making Islam instead of secularism its first basic principle. In a national referendum in May 1977, 99 per cent of voters affirmed their confidence in President Zia's policies, and in June 1978 the first presidential elections resulted in victory for Zia, who formed a Cabinet to replace his Council of Advisers. Parliamentary elections followed in February 1979 and, in an attempt to persuade opposition parties to participate in the elections, President Zia met some of their demands by repealing "all undemocratic provisions" of the 1974 constitutional amendment, releasing political prisoners and withdrawing press censorship. Consequently 29 parties contested the elections in which President Zia's Nationalist Party (BNP) came to power with a two-thirds majority. A new Prime Minister was appointed in April. The lifting of martial law in April and the revocation of the state of emergency in November meant that civilian democracy had returned to Bangladesh after an absence of almost five years.

Political instability returned to Bangladesh when Gen. Zia was assassinated on May 30th, 1981, in an attempted military coup, supposedly led by Maj.-Gen. Mohammad Abdul Manzur, an army divisional commander who was himself later killed in confused circumstances. The Vice-President, Justice Abdus Sattar, took over as acting President to face strikes and demonstrations over the execution of several officers involved in the coup, and pressure from opposition parties to have the election date moved. As the only person acceptable to the different groups within the BNP, Sattar was nominated as their presidential candidate. The election, held on November 15th, was in effect contested between the BNP and the Awami League, recently invigorated by the arrival of Sheikh Mujib's daughter, Hasina Wazed, to lead the party, and resulted in an overwhelming victory for the BNP. As Bangladesh's new President, Justice Abdus Sattar announced his intention of carrying on the policies of the late Gen. Zia.

In foreign affairs, Bangladesh has maintained a policy

of non-alignment. Relations with Pakistan improved in 1976: ambassadors were exchanged and trade, postal and telecommunication links were resumed. Relations with India have been strained over the questions of cross-border terrorism and of a barrage on the Ganges built by India, which deprived Bangladesh of water for irrigation and river transport. After many unsuccessful talks, the two countries signed a five-year agreement on the sharing of the Ganges water in November 1977, but disputes still continued and in April 1981 it was decided that the question should be settled "at a high political level". A further problem was the as yet undemarcated borders between the two countries and the disputed ownership of an island in the Bay of Bengal.

Government

Bangladesh is a democratic republic with a presidential form of government. The President is elected by universal suffrage for a five-year term and appoints his Council of Ministers from the 330-member Parliament, 300 members of which are elected by universal suffrage. An additional 30 women members are then elected by the other members. Parliament (*Jatiya Sangsad*) serves a five-year term.

Defence

Military service is voluntary. In July 1981 the army had a total strength of 70,000; the navy 4,000; the air force 3,000. The paramilitary forces included an Armed Police Reserve of 36,000, and the Bangladesh Rifles of 30,000. Budget expenditure on defence was estimated at 2,524 million taka for 1980/81.

Economic Affairs

Apart from small city-states, Bangladesh is the most densely populated country in the world. In terms of average income, it is also among the world's poorest. According to World Bank estimates, G.N.P. per caput was only U.S. \$90 in 1978 and \$105 in 1980.

Agriculture, in which 80 per cent of the working population is employed, accounts for nearly 60 per cent of Gross Domestic Product (G.D.P.). The land is fertile but crops are often destroyed by floods, cyclone and drought, and disruptions caused by the war of independence further depressed production after 1971.

Production of rice, which is grown on 75 per cent of cultivated land, fell sharply after independence and did not regain former levels until 1974. In the following years rice production continued to improve and reached a record level in 1977/78. In the second Five-Year Plan (1980-85) the area producing high-yielding varieties is expected to increase from 3 million to nearly 8 million acres and efforts are being made to increase output of wheat, as it is more nutritious than rice and cheaper to produce. Three years of good harvests led to a decline in necessary food imports to 1.5 million tons in 1977/78, but the poor 1978/79 harvest, caused by a late monsoon season, meant that there was a shortfall between production and consumption, and imports returned to the former level of 2 million tons. The 1980/81 harvest produced a record total of 14.8 million tons of food grains but the lack of adequate storage facilities caused severe problems. In 1978 the Government launched a five-year programme to double food production by bringing more arable land under irrigation (in 1979 only

about 10 per cent was irrigated), encouraging double and triple cropping and increasing the use of fertilizers, and it was planned to increase the area of irrigated land to 10.2 million acres by 1985. The aim was to achieve self-sufficiency in food grains by the mid-1980s.

Jute and tea are the main cash crops. Bangladesh supplies about 90 per cent of world raw jute exports. Because of competition from synthetic substitutes for jute, general world recession and increased competition from India, Nepal and Thailand, production dropped from 7 million bales (each of 400 lb. or 181.4 kg.) in 1969/70 to 4 million in 1974/75, but increased world demand halted this trend and production rose steadily to 5.5 million bales in 1977/78. By 1980/81, however, estimated production had fallen to just over 4 million bales, well below the target figure of 7 million bales. A programme was introduced in 1979 to improve the quality of tea for export, which in that year became Bangladesh's second largest export earner. Potatoes, sugar cane, tobacco, spices and tropical fruits are also produced, while cotton production is being increased to lessen the burden of imports.

Mineral resources are few. There are large gas reserves, estimated at several million million cubic feet, and low-grade coal reserves of 700 million tons have also been discovered. In 1980 there were renewed hopes of on-shore petroleum discoveries.

Industry accounts for under 10 per cent of G.D.P. About 20 per cent of the industrial labour force is employed in the jute-based industries. Other major products are cotton textiles, chemicals and sugar. Production fell in nearly all the main industries after independence in 1971, because of war damage, the departure of the largely non-Bengali financier and managerial class and the loss of many skilled Bengali workers. Most organized industry was nationalized and state corporations were set up for the major commodities. Gen. Zia's Government changed industrial policy, encouraging private investment and compensating foreign investors whose assets had been nationalized in 1971, on condition that the money was reinvested in Bangladesh. Many tea plantations and state-owned industrial units were returned to the private sector during 1976 and 1977, and in 1981 the private sector was permitted to set up cotton textile spinning mills. In mid-1980 Parliament legislated for the establishment of three export-processing zones to increase trade and foreign investment, and it was decided in September 1980 to allow private banks to establish branches in Bangladesh.

Jute and jute-based products provide most of export earnings. Food grains, petroleum products and machinery are the major imports. Trade patterns were disrupted by the separation from Pakistan, to which the tea crop had largely been exported before the war. However, during 1976 direct trade links were re-established with Pakistan: shipping and banking arrangements were agreed and a joint trade committee was set up between the two countries.

Bangladesh is heavily dependent on large amounts of foreign aid, particularly commodity aid, to meet its development and budget requirements and to offset its current account deficit, which was expected to rise from \$1,700 million in 1980/81 to over \$2,000 million in 1981/82. Two major suppliers of funds are the World Bank and the

U.S.A. The U.S. bilateral aid commitment for 1980/81 was \$154.7 million and the World Bank's contribution in soft loans was \$380 million.

The country's first Five-Year Plan (1973-78) aimed at an annual growth of 5.5 per cent in G.D.P. This target was exceeded, with an average annual rate of growth of 6.7 per cent. In 1978 the Government announced its intention to introduce longer-term development planning involving a proposed Twenty-Year Plan starting in July 1980 and initially running concurrently with the second Five-Year Plan. In July 1980 the second Plan was launched with a total proposed outlay of 255,950 million taka, of which 201,250 million was to go to the public sector and 54,700 million to the private sector. An overall annual growth rate of 7.2 per cent was projected. The Plan aims to reduce the level of poverty, to expand employment opportunities and to increase food production.

Transport and Communications

Of some 6,240 km. of roads, about 3,840 km. are metalled. The railway system consists of 2,858 km. of track. Inland water transport is also of major significance and there are 8,430 km. of navigable waterways, on which are located five major river ports. These waterways transport 70 per cent of the overall domestic and foreign cargo. The chief seaports are Chalna and Chittagong. *Bangladesh Biman*, the national airline, operates internal services between major towns and international ones from the airports in Dacca (Zia International Airport), Chittagong and Kurmitola.

Social Welfare

The Government's main task after independence was to prevent epidemics and widespread malnutrition and to treat and rehabilitate war victims. A five-year health programme costing 1,660 million taka began in July 1973 with particular priority being given to the popularization of birth control.

Education

Education is not compulsory but the Government provides free primary schooling for five years. Some pilot schemes for compulsory attendance in primary schools are in progress and there are plans to introduce universal primary education by 1985. Secondary schools and colleges in the private sector vastly outnumber Government institutions: in 1976 Government high schools comprised about 2 per cent of the country's total, while only 48 colleges, out of a total of 626, were Government-owned.

There are six universities, including one for agriculture and one for engineering.

Educational reform is designed to help meet the manpower needs of the country, and most importance is given to primary, technical and vocational education. In 1974 adult illiteracy averaged 74.2 per cent (males 62.7 per cent, females 86.8 per cent) but in 1980 the Government launched a programme for the eradication of illiteracy over a five-year period.

Tourism

Tourist attractions include the cities of Dacca and Chittagong, Cox's Bazar—which has the world's longest beach (120 kilometres)—on the Bay of Bengal and Teknaf at the southernmost point of Bangladesh. The majority of visitors are from India, Japan, the United Kingdom and the U.S.A.

Public Holidays

1982: March 26th (Independence Day), April 9th (Good Friday), April 12th (Easter Monday), May 1st (May Day), May* (Buddha Purnima), July 12th* (Jamat Wida), July 20th-22nd* (Id-ul-Fitr), September* (Shab-i-Bharat), September 26th-28th* (Id-ul-Azha), October 6th-8th* (Durga Puja), October 27th* (Muharram, Muslim New Year), November 7th (National Revolution Day), December 16th (National Day), December 25th (Christmas), December 26th (Boxing Day).

1983: January 1st (New Year's Day), January 7th* (Eid-e-Milad-un-Nabi, Prophet's Birthday), February 21st (National Mourning Day).

* Dates of certain religious holidays are subject to the sighting of the moon and there are also optional holidays for different religious groups.

Weights and Measures

The imperial system of measures is in force pending the introduction of the metric system. The following local units of weight are also used:

- 1 maund = 82.28 lb. (37.29 kg.).
- 1 seer = 2,057 lb. (932 grammes).
- 1 tola = 180 grains (11.66 grammes).

Currency and Exchange Rates

- 100 paisa = 1 taka.
- Exchange rates (October 1981):
- £1 sterling = 34.70 taka;
- U.S. \$1 = 18.57 taka.

FINANCE

100 paise = 1 taka.

Coins: 1, 2, 5, 10, 25 and 50 paise.

Notes: 1, 5, 10, 50, 100 and 500 taka.

Exchange rates (October 1981): £1 sterling = 34.70 taka; U.S. \$1 = 18.57 taka.

1,000 taka = £28.82 = \$53.86.

Note: The taka was introduced in January 1972, replacing the Pakistan rupee. At the same time the currency was devalued by 34.6 per cent, so that the taka would be at par with the Indian rupee. Until May 1975 the link with India was retained and Bangladesh maintained an official exchange rate against sterling at a mid-point of £1 = 18.9677 taka. Before the "floating" of the pound in June 1972 this was equivalent to a rate of U.S. \$1 = 7.279 taka. In May 1975 the currency was devalued by 36.8 per cent against sterling, the new exchange rate being £1 = 30.00 taka. This remained in effect until April 1976, when a new rate of £1 = 28.10 taka was introduced. This was adjusted to £1 = 26.70 taka in June 1976 and to £1 = 25.45 taka in November 1976. In January 1977 the rate reverted to £1 = 26.70 taka but since November 1977 it has been adjusted frequently. The average market rate of the taka per U.S. dollar was 7.595 in 1972; 7.742 in 1973; 8.113 in 1974; 12.019 in 1975; 15.347 in 1976; 15.375 in 1977; 15.016 in 1978; 15.552 in 1979; 15.454 in 1980.

THE CONSTITUTION

(Promulgated November 1972; amended 1973, 1974, 1975, 1977, 1979, 1981.)

SUMMARY

Fundamental Principles of State Policy

The 1977 amendment to the Constitution, which was initially based on the fundamental principles of nationalism, socialism, democracy and secularism, replaced secularism with Islam. The amendment states that the country shall be guided by "the principles of absolute trust and faith in the Almighty Allah, nationalism, democracy and socialism". The Constitution aims to establish a society free from exploitation in which the rule of law, fundamental human rights and freedoms, justice and equality are to be secured for all citizens. A socialist economic system is to be established to ensure the attainment of a just and egalitarian society through state and co-operative ownership as well as private ownership within limits prescribed by law. A universal, free and compulsory system of education shall be established. In foreign policy the State shall endeavour to consolidate, preserve, and strengthen fraternal relations among Muslim countries based on Islamic solidarity.

Fundamental Rights

All citizens are equal before the law and have a right to its protection. Arbitrary arrest or detention, discrimination based on race, age, sex, birth, caste or religion, and forced labour are prohibited. Subject to law, public order and morality, every citizen has freedom of movement, of

assembly and of association. Freedom of conscience, of speech, of the press and of religious worship are guaranteed.

GOVERNMENT

The President

The President is the constitutional Head of State and is elected for a term of five years. He is eligible for re-election. The supreme control of the armed forces is vested in the President. He appoints the Vice-President, the Prime Minister and other Ministers as well as the Chief Justice and other judges. The President is elected by universal adult suffrage.

The Executive

Executive authority shall rest in the President and shall be exercised by him either directly or through officers subordinate to him in accordance with the Constitution.

There shall be a Council of Ministers to aid and advise the President. All ministers shall hold office during the pleasure of the President.

The Legislature

Parliament (*Jatiya Sangsad*) is a unicameral legislature. It comprises 300 members and an additional 30 women members elected by the other members. Members of

Parliament, other than the 30 women members, are directly elected on the basis of universal adult franchise from single territorial constituencies. Persons aged 18 and over are entitled to vote. The parliamentary term lasts for five years unless Parliament is dissolved sooner by the President. War can be declared only with the assent of Parliament. In the case of actual or imminent invasion, the President may take whatever action he may consider appropriate.

THE JUDICIARY

The Judiciary comprises a Supreme Court with High Court and an Appellate Division. The Supreme Court consists of a Chief Justice and such other judges as may be appointed by the President. The High Court division has such original appellate and other jurisdiction and powers as

are conferred on it by the Constitution and by other law. The Appellate Division has jurisdiction to determine appeals from decisions of the High Court division. Subordinate courts, in addition to the Supreme Court, have been established by law.

ELECTIONS

An Election Commission supervises elections for the Presidency and for Parliament, delimits constituencies and prepares electoral rolls. It consists of a Chief Election Commissioner and other Commissioners as may be appointed by the President. The Election Commission is independent in the exercise of its functions. Subject to the Constitution, Parliament may make provision as to elections where necessary.

BARBADOS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Barbados is the most easterly of the Caribbean islands, lying about 200 miles north-east of Trinidad. There is a rainy season from July to November and the climate is cool during the rest of the year. The mean annual temperature is about 26°C (78°F). The language used is English and the majority of the population are Anglicans. The national flag (proportions 3 by 2) has three equal vertical stripes of blue, gold and blue. On the gold band is the head of a black trident. The capital is Bridgetown.

Recent History

A former British colony, Barbados achieved internal self-government in October 1961 and full independence on November 30th, 1966. Barbados was a member of the West Indies Federation from January 1958 until its dissolution in May 1962. Sir Grantley Adams, who became the island's first Premier in 1954, was the first Prime Minister of the Federation. In 1964 it was agreed that Bridgetown should become the capital of a proposed East Caribbean Federation, to include the Windward and Leeward Islands, but this Federation was never established. However, some common services, particularly transport and education, are shared with other Caribbean territories.

In the general election of September 1976 the Barbados Labour Party (BLP), led by Mr. J. M. G. M. Adams (Sir Grantley's son), won a large majority over the Democratic Labour Party (DLP), which had been in power since 1961 under the leadership of Errol Barrow. The BLP is committed to retaining a system of free enterprise and alignment with the U.S.A. In the general election of June 1981 the BLP was returned to office on the strength of its economic achievements in government. Although the party gained the same percentage of the total vote as it had done in the 1976 election, its majority in the newly enlarged House of Assembly was reduced from 10 seats to 7.

Government

The British monarch, represented by a Governor-General, is head of state, and executive power is in the hands of a Cabinet consisting of a Prime Minister and not fewer than five other Ministers. Parliament consists of a Senate of 21 members, appointed by the Governor-General, and a House of Assembly with 27 members elected by universal adult suffrage for five years (subject to dissolution). The Cabinet is responsible to Parliament.

Defence

The Barbados Defence Force, established in April 1978, consists of 154 regular personnel. It is divided into regular defence units and a coast guard service with armed patrol boats; there is also a volunteer force and a reserve. The 1981/82 budget allocates B\$14 million to defence and security.

Economic Affairs

Sugar and tourism are the dominant sectors of the Barbados economy. After independence, sugar production fell steadily. In the late 1970s depressed world prices contributed to the industry's decline and by 1978 sugar

production accounted for only 6.7 per cent of G.D.P. In 1979 and 1980 there was some recovery, with improved yields supported by surges in world prices, but excessive rainfall reduced raw sugar production in 1981 to only 93,000 tons from 130,000 tons in 1980. Barbados absorbs 10 per cent of all food imported within CARICOM, and the introduction of new crops and expansion of fisheries have been carried out both to lessen economic dependence on sugar and reduce the trade deficit. Similarly, agro-industries are being developed. A rural development project which will invest B\$14 million to increase agricultural production was announced in 1980.

Tourism has also been affected by the world recession. The steady expansion which had been maintained since the 1960s slowed in 1974 and, even further, in 1975. After a steady growth in the number of visitors between 1977 and 1979, the rate began to slow again in 1980 (with earnings from tourism nonetheless reaching a record B\$502 million) and a real decline of 2 per cent was expected in 1981. In contrast to its previous policy, the Government is now actively encouraging foreign investment in tourism.

Government policy is to reduce dependence on agriculture and tourism and to diversify industry. It has succeeded in attracting light manufacturing industry through tax incentives and this sector generated over 11 per cent of G.D.P. in 1979. However, these industries have suffered the effects of recession in the U.S.A., the main market for their products, resulting in production cutbacks and layoffs and closures in the electronics industry in 1981. Construction was to begin on a new cement plant, jointly financed by Barbados and Trinidad and Tobago, in late 1981.

Reserves of petroleum and natural gas have been discovered. In 1981 petroleum was being exploited at the rate of approximately 700 barrels per day and a number of new potentially important offshore fields have been located. The discovery of petroleum should reduce oil imports and thus lower the country's trade deficit (a record B\$593.7 million in 1980). Under an agreement signed in 1980, Barbados will import 50 per cent of its oil needs from Mexico and Venezuela on special credit terms.

Barbados has the most developed infrastructure in the Caribbean and the Government plans to deal with the unemployment problem, which is serious (12-15 per cent) outside the harvest season, by continuing to develop and modernize. A new fishing harbour in Bridgetown, costing B\$40 million, and an ambitious fisheries development project at Oistins Town are planned. The Government's development plan for 1979-83 lays particular emphasis on the expansion of the construction sector. Barbados is establishing itself as a tax haven and prospects of development as an offshore banking centre are good.

Projected growth in G.D.P. for 1981 was 2 per cent, compared with 5 per cent in 1980. A sharp drop in foreign exchange reserves between December 1980 and June 1981, and a worsening balance of payments deficit on current account and a fall in government revenue in 1981, prompted the Government to introduce tough credit and fiscal measures in late 1981.

Transport and Communications

The situation of the island and its good harbour and airport facilities make it a natural entrepôt for the eastern Caribbean. There are 1,020 miles of roads, mostly bitumenized; the Grantley Adams airport near Bridgetown can handle jet aircraft; and the harbour at Bridgetown has berths for eight ships and bunkering facilities for five.

Social Welfare

A social security scheme was established in 1967 and a National Drug Plan, introduced in 1980, is the first stage in a planned national health service. Old age pensions can be drawn and unemployment insurance became available in 1981. The Government has also set up a building scheme of group housing for lower income families. The island has five health centres and 11 government hospitals. Estimated expenditure on health services was BS47.1 million for 1979/80.

Education

Education in all government schools is free and the minimum school-leaving age is 16. The State provides for approximately 86 per cent of those eligible for primary and secondary education. The literacy rate is 97 per cent. In 1980 there were 115 primary schools, 21 secondary schools, 19 private secondary schools, a community college, a teacher training college, a technical institute and a polytechnic. At the Barbados branch of the University of the

West Indies an in-service training programme for graduate teachers in secondary schools is run at the School of Education.

Tourism

The natural attractions of the island consist chiefly of the healthy climate and varied scenery. In addition, there are many facilities for outdoor sports of all kinds. Bathsheba on the east coast is a well-known health resort. Revenue from tourism increased from BS13 million in 1960 to an estimated BS502 million in 1980.

Public Holidays

1982: April 9th-12th (Easter), May 1st (May Day), May 31st (Whit Monday), July 7th (Kadooment Day), August 3rd (Caricom Day), October 5th (for United Nations Day), November 30th (Independence), December 25th, 26th (Christmas).

1983: January 1st (New Year).

FINANCE

100 cents = 1 Barbados dollar (B\$).

Coins: 1, 5, 10 and 25 cents; 1 dollar.

Notes: 1, 2, 5, 10, 20 and 100 dollars.

Exchange rates (October 1981): £1 sterling = B\$3.759; U.S. \$1 = B\$2.011.

B\$100 = £26.60 = U.S. \$49.72.

Note: The Barbados dollar was introduced in November 1973, replacing the East Caribbean dollar (EC\$) at par. The East Caribbean dollar, replacing (at par) the West Indian dollar, was introduced in Barbados and other islands in October 1965, with an exchange rate of £1 sterling = EC\$4.80 (EC\$1 = 4s. 2d. or 20.83p). This valuation in terms of sterling remained in effect until July 1975, when the Barbados dollar was linked to U.S. currency with a central exchange rate of U.S. \$1 = B\$2.00 and a market rate of U.S. \$1 = B\$2.0038 (adjusted to U.S. \$1 = B\$2.0113 in August 1977). Previously the rate had been U.S. \$1 = EC\$2.00 from November 1967 to August 1971; and U.S. \$1 = EC\$1.842 from December 1971 to June 1972. The average exchange rate (B\$ per U.S. \$) was 1.959 in 1973; 2.053 in 1974; 2.020 in 1975; 2.004 in 1976; 2.007 in 1977.

THE CONSTITUTION

The Constitution came into force in November 1966. Under its terms protection is afforded to individuals from slavery and forced labour, from inhuman treatment, deprivation of property, arbitrary search and entry, and racial discrimination; freedom of conscience, of expression, assembly, and movement are guaranteed.

Her Majesty's representative in Barbados is the Governor-General, who appoints the Prime Minister and, on the advice of the Prime Minister, appoints Ministers and some Senators.

The executive consists of the Prime Minister, appointed by the Governor-General as being the person best able to command a majority in the House of Assembly, and not fewer than five other Ministers. Provision is also made for a Privy Council, presided over by the Governor-General.

Parliament consists of two houses, the Senate and the House of Assembly. The Senate has 21 members, 12 appointed by the Governor-General on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition, and 7 as representatives of such interests as the Governor-General considers appropriate. The House of Assembly has 24 members, elected by universal adult suffrage for a five-year term. The minimum voting age is 18.

The Constitution also provides for the establishment of Service Commissions for the Judicial and Legal Service, the Public Service, the Police Service and the Statutory Boards Service. These Commissions are exempt from legal investigation; they have executive powers to deal with appointments, dismissals and disciplinary control of the services for which they are responsible.

Note: The British Honduras (now Belizean) dollar was at par with the U.S. dollar until December 1949, when it was devalued to 70 U.S. cents (U.S. \$1=BH\$1.429). At the same time the currency was linked to the pound sterling (at the rate of £1=BH\$4.00). This valuation in terms of sterling remained in effect until May 1976. When the pound was devalued in November 1967 the BH dollar's value fell to 60 U.S. cents (U.S. \$1=BH\$1.667). Since June 1972 sterling has been allowed to "float". The average value of the Belizean dollar was 57.74 U.S. cents in 1972; 61.30 U.S. cents in 1973; 58.42 U.S. cents in 1974; 59.82 U.S. cents in 1975. In May 1976 the Belizean dollar's link with sterling was broken and the currency was pegged to the U.S. dollar at the rate of U.S. \$1=BZ\$2.00 (BZ\$1=50 U.S. cents.).

THE CONSTITUTION

The constitution came into effect at the independence of Belize on September 21st, 1981. Its main provisions are summarized below:

FUNDAMENTAL RIGHTS AND FREEDOMS

Regardless of race, place of origin, political opinions, colour, creed or sex, but subject to respect for the rights and freedoms of others and for the public interest, every person in Belize is entitled to the rights of life, liberty, security of the person, and the protection of the law. Freedom of movement, of conscience, of expression, of assembly and association and the right to work are guaranteed and the inviolability of family life, personal privacy, home and other property and of human dignity is upheld. Protection is afforded from discrimination on the grounds of race, sex, etc., and from slavery, forced labour and inhuman treatment.

CITIZENSHIP

All persons born in Belize before independence who, immediately prior to independence, were citizens of the United Kingdom and Colonies automatically become citizens of Belize. All persons born outside the country having a husband, parent or grandparent in possession of Belizean citizenship automatically acquire citizenship, as do those born in the country after independence. Provision is made which permits persons who do not automatically become citizens of Belize to be registered as such.

THE GOVERNOR-GENERAL

The Queen, as Head of State, is represented in Belize by a Governor-General, who holds office during her pleasure.

THE EXECUTIVE

Executive authority is vested in the Queen and exercised by the Governor-General. The Governor-General appoints as Prime Minister that member of the House of Representatives who, in his view, is best able to command the support of the majority of the members of the House, and appoints a Deputy Prime Minister and other Ministers on the advice of the Prime Minister. The Governor-General may remove the Prime Minister from office if a resolution of "no confidence" is passed by the House and the Prime Minister does not, within seven days, either resign or advise the Governor-General to dissolve the National Assembly.

The Cabinet consists of the Prime Minister and other Ministers.

The Leader of the Opposition is appointed by the Governor-General as that member of the House who, in his view, is best able to command the support of a majority of the members of the house who do not support the Government.

THE LEGISLATURE

The Legislature consists of a National Assembly comprising two Houses: an eight-member Senate and the House of Representatives, made up of 18 elected members. The Assembly's normal term is five years. Senators are appointed by the Governor-General: five on the advice of the Prime Minister, two on the advice of the Leader of the Opposition or on the advice of persons selected by the Governor-General, and one after consultation with the Belize Advisory Council. If any person who is not a Senator is elected to be President of the Senate, he shall

be an *ex-officio* Senator in addition to the eight provided for.

Each constituency returns one Representative to the House who is directly elected in accordance with the Constitution.

If a person who is not a member of the House is elected to be Speaker of the House, he shall be an *ex-officio* member in addition to the 18 members provided for. Every citizen over the age of 18 is eligible to vote. The National Assembly may alter any of the provisions of the Constitution.

BENIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Benin is a narrow stretch of territory in West Africa, flanked by Nigeria to the east and Togo to the west; its northern borders are with Upper Volta and Niger. The climate is tropical in the north, with one rainy season and a maximum temperature of 46°C (115°F), and equatorial in the south, with average temperatures of 20°–34°C (68°–93°F) and two rainy seasons. French is the official language but each tribe has its own tongue. The majority of the people follow traditional beliefs and customs. Christians, mainly Roman Catholics, make up 15 per cent of the population and Muslims 13 per cent. The national flag is green and bears a five-pointed red star in the upper hoist. The capital is Porto-Novo.

Recent History

Benin, called Dahomey until 1975, was formerly part of French West Africa. It became a self-governing republic within the French Community in December 1958, and an independent state on August 1st, 1960. Since independence there have been five successful coups involving the army. Hubert Maga was overthrown in 1963 by Gen. Christophe Soglo, who installed Justin Ahomadegbé and Souru Apithy in a coalition. Soglo himself assumed power in December 1965 but was in turn overthrown in December 1967 by Major Maurice Kouandété. Lt.-Col. Alphonse Alley presided over the return to civilian rule and a strong presidential constitution was adopted. The disqualification of the main presidential candidates resulted in the annulment of the elections called in 1968 and Dr. Emile Zinsou was appointed President in July. Deposed in December 1969, he was succeeded by a Military Directorate. The 1970 elections led to violence and a Presidential Council was formed consisting of the three candidates, MM. Maga, Apithy and Ahomadegbé, with the post of President rotating. In October 1972 the army, led by Major (now Lt.-Col.) Mathieu Kerekou, overthrew the Council and established a military Government. He proclaimed a resolutely progressive policy and in September 1973 the National Council of the Revolution (CNR) was established to carry it out.

In November 1974 Kerekou announced that the country would follow the path of "scientific socialism" based on Marxist-Leninist principles. The vital sectors of the economy, including the banks and the distribution of petroleum products, were taken over by the state. In February 1975 Benin's co-operation agreements with France were renegotiated. Between 1974 and 1978 a decentralized local administration was set up, the education system taken over and the legal system put under review. The army and the gendarmerie were merged to form a National Defence Force. In November 1975 the *Parti de la Révolution Populaire du Bénin* (PRPB) was established as the "highest expression of the political will of the people of Benin" and in December the country's name was changed from Dahomey to the People's Republic of Benin.

All this has not been achieved without opposition. On several occasions Benin has accused foreign powers,

including France, Togo, Gabon and Morocco, of conspiring with internal opposition to overthrow the regime, notably in 1977, when an airborne mercenary attack was made on Cotonou. In August 1977 the CNR adopted a *Loi Fondamentale* which decreed new structures in government. Under its terms a National Revolutionary Assembly was instituted as the supreme authority of the state, following an election held in November 1979 for the 336 members of the Assembly; a single list of candidates was presented and approved by 97.5 per cent of the voters. The CNR was disbanded and Kerekou's Government thus converted itself into a civilian body. At the first Ordinary Congress of the PRPB, held in December, it was decided that Lt.-Col. Kerekou would be the sole candidate for President of the Republic; the Assembly unanimously elected him as President in February 1980. Before the election, an open meeting was held for 400 civil servants who were invited to criticize the Government's policies. The new Cabinet showed a shift towards more moderate policies, with representation from groups previously excluded, and contained fewer military men. This relaxation of Kerekou's regime has improved Benin's international standing, particularly its relations with France.

Government

In accordance with the *Loi Fondamentale*, adopted in August 1977, a National Revolutionary Assembly, a body of 336 People's Commissioners representing socio-professional classes was elected by universal adult suffrage in November 1979. The Assembly in turn elects the President of the Republic. The Central Committee of the *Parti de la Révolution Populaire du Bénin* plays a leading role in government.

Local administration is based on six provinces, divided into 84 districts. Each province is governed by a Prefect and a Secretary-General, assisted by a Provincial Revolutionary Council, a Regional Planning and Development Committee and a Conference of Heads of Regional Departments. There is a considerable degree of decentralization and financial autonomy.

Defence

Citizens of both sexes are liable for military service between the ages of 18 and 51. The army strength in July 1981 was 3,000, the air force 60 and in addition there were paramilitary forces numbering 1,100 men. There is a small navy comprising 40 men and seven patrol boats. France provides technical assistance and equipment. In 1977 a central organization, the Headquarters People's Armed Forces of Benin, was established to unify the police, customs, armed forces and gendarmerie. It comprises three units: national defence, public security and people's militia.

Economic Affairs

By 1980, for the first time in two decades of independence, Benin was experiencing a spell of stable government and relative prosperity, although it remains one of the poorest countries in Africa. In 1978 its G.D.P. was 148,500

million francs CFA, with an average annual growth rate of 3.8 per cent in 1970-78. G.N.P. per head was estimated at the equivalent of \$230 in 1980 (\$770 million in total). The economy is dependent on the primary sector; about 46 per cent of Benin's working population is employed in agriculture, which accounts for about 33 per cent of G.D.P. Benin is almost self-sufficient in foodstuffs and diversification programmes have been implemented. In 1977 about 800,000 hectares were under cultivation for food crops, much of it as collective farms since the launching in 1975 of a co-operative scheme which has reformed the agricultural system. The principal food crops are cassava (manioc), yams, maize and sorghum. The major cash crops are the oil palm and cotton. In spite of the Government's attention to the agricultural sector, production of cash crops fell in 1977/78 to a total of 22,633 metric tons, compared with 83,703 tons in 1974/75; the decline can be attributed to inadequate extension services and a high degree of theft from the co-operative farms. Production in 1978/79, however, increased to 43,681 tons.

The industrial sector, based on small-scale processing of primary production, contributed only 13 per cent of G.D.P. in 1978 but the 1977-80 three-year plan provided for the development of this sector. Though many sectors of industry and commerce have been nationalized since December 1974, this has mainly affected Benin's external trade and in 1978 60 per cent of internal trade was conducted privately. Limestone is the only mineral exploited, supplying the 300,000 tons-per-year cement factory at Onigbolo, but reserves of gold, phosphates (5 million tons) and marble have been discovered. Petroleum has been discovered offshore and there are estimated recoverable reserves of about 22 million barrels. Production should start by 1982, with the Norwegian Government furnishing 90 per cent of the \$100 million needed to finance the project. In 1979 Nigeria agreed to finance two important development projects, the sugar complex at Savé and a cement factory at Porto Novo; other projects include the extension of Cotonou port and the construction of an oil refinery.

Benin is dependent on foreign aid, especially from France, which has provided annual aid worth about 3,000 million francs CFA since 1974 (5,000 million francs CFA in 1980), to subsidize the budget and permanent balance of payments deficit which reached 52,700 million francs CFA in 1977. Budget spending rose from 16,100 million francs

CFA in 1976 to an estimated 33,800 million francs CFA in 1980. The trade deficit reached 54,436 million francs CFA in 1978.

Transport and Communications

Transport infrastructure is relatively good. Road and rail links have been developed to service trade between Nigeria and Togo and Ghana, as well as the external trade of Niger, which passes through Cotonou, the only international port.

Education

In 1975 an estimated 44 per cent of children aged 6 to 11 received primary education, while 11 per cent of those aged 12 to 17 received secondary education. Following legislation in 1975, the State took control of all education, which is free, public, compulsory and secular. Secondary school pupils and students must undertake nine months' teaching and three months' military and ideological training. The University of Benin was founded in 1970 and has 2,578 students.

Tourism

There is little tourism but safaris can be arranged to the two National Parks and the numerous hunting reserves.

Public Holidays

1982: May 1st (Labour Day), August 1st (National Day), October 26th (Féles Revolution), November 30th (Féles Revolution), December 31st (Harvest Day).

1983: January 1st (New Year), January 16th (Anniversary of Mercenary Attack on Cotonou).

All religious holidays have been abolished and are replaced by five secular public holidays.

Weights and Measures

The metric system is in force.

Coins: 1, 2, 5, 10, 25, 50 and 100 francs CFA.

Notes: 50, 100, 500, 1,000 and 5,000 francs CFA.

Exchange rates (October 1981): 1 franc CFA=2 French centimes;

£1 sterling=519.5 francs CFA; U.S. \$1=278.1 francs CFA.

1,000 francs CFA=£1.925=\$3.596.

Note: Between December 1958 and August 1969 the value of the franc CFA was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. \$1=246.853 francs CFA). Since January 1960 the franc CFA has been equivalent to 2 French centimes (1 French franc=50 francs CFA). In August 1969 the franc CFA was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 franc CFA=0.3601 U.S. cent (\$1=277.71 francs CFA) until August 1971. From December 1971 to February 1973 the official rate was 1 franc CFA=0.3909 U.S. cent (\$1=255.785 francs CFA). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the franc CFA has fluctuated on foreign exchange markets in line with the French franc. The average market rates of francs CFA per U.S. dollar were: 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; 214.3 in 1975; 239.0 in 1976; 245.7 in 1977; 225.6 in 1978; 212.7 in 1979; 211.3 in 1980. In terms of sterling, the exchange rate between August 1969 and June 1972 was £1=666.503 francs CFA (1 franc CFA=0.15004p).

THE CONSTITUTION

From his assumption of power in 1972 to September 1973 President Kerekou governed through a Military Council of the Revolution, based on the "revolutionary movement of national liberation". From 1973 to August 1977 the country was governed by institutions which included civilians, the highest of which was the National Revolutionary Council, directed by a National Political Bureau. On May 23rd, 1977, a *Loi Fondamentale* was announced by the *Parti de la Révolution Populaire du Bénin* (PRPB) as preparation for the "people's democratic revolution". In August the *Loi Fondamentale* was approved by the National Revolutionary Council. It was announced

that, under the terms of the *Loi Fondamentale*, the Council was to be disbanded. In its place a National Revolutionary Assembly was elected in November 1979, comprising People's Commissioners elected directly, who in turn elect the President and Head of State. The People's Commissioners represent socio-professional classes, not geographical constituencies. At local levels, state powers are exercised by elected provincial district town and village councils. The judiciary is responsible to the National Revolutionary Assembly and the Armed Forces are under the control of the PRPB.

THE GOVERNMENT

(December 1981)

HEAD OF STATE

LEGISLATURE

ASSEMBLÉE NATIONALE RÉVOLUTIONNAIRE

In August 1977 the *Loi Fondamentale* provided for the disbandment of the National Revolutionary Council, which was to be replaced by a National Revolutionary

Assembly. The Assembly was elected by direct universal suffrage in November 1979 and consists of 336 People's Commissioners, who in turn elect the President.

POLITICAL PARTIES

Parti de la Révolution Populaire du Bénin (PRPB): Cotonou; f. 1975; Marxist-Leninist ruling party; at the first Ordinary Congress of the party, held in December 1979, a Central Committee of 45 members was elected, which in turn elected from its members the 13-member

Politburo; Chair of Central Committee Lt.-Col. MATHIEU (AHMED) KEREROU.

There are illegal opposition groups, including the *Front de Libération et de Réhabilitation de Dahomey*, which was blamed for an unsuccessful coup in January 1977.

JUDICIAL SYSTEM

THE CENTRAL PEOPLE'S COURT: Cotonou

Chairman of the Central People's Court (*Cour populaire centrale*): LÉANDRE AMLON.

The Central People's Court controls the judicial activities of all the People's Courts at various levels. It is responsible to the National Revolutionary Assembly and to the National Executive Council.

At the lowest level, each commune, village and city ward has its own court, which does not, however, have executive powers. There is a court in each district, which

has the power to try cases. There is also a court in each province which acts as an appeals court and an assizes court. The Central Court is composed of a chairman, three divisional chairmen who are professional judges, six judges and 12 lay people's judges who have the same powers as the professional judges and magistrates in judicial decision making. The professional judges are appointed by the National Executive Council. The lay people's judges are elected for three years by the National Revolutionary Assembly on the advice of the Central Committee of the ruling party.

RELIGION

According to the 1961 census 65 per cent of the population hold animist beliefs, 15 per cent are Christians (12 per cent Catholics, 3 per cent Protestants) and 13 per cent Muslims. There are 257 Protestant mission centres with a personnel of about 120. There were 206,987 Roman Catholics in Benin in 1980.

Since 1975, religious and spiritual cults have been discouraged.

BHUTAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Bhutan lies in the Himalayas, with the People's Republic of China to the north and India to the south. Average monthly temperature ranges from 4.4°C (40°F) (mean January) to 17°C (62°F) (mean July). Rainfall is heavy, ranging from 150 cm. (60 inches) to 300 cm. (120 inches) in a year. The official language is Dzongkha, spoken mainly in western Bhutan. Written Dzongkha is based on the Tibetan script. The State religion is Mahayana Buddhism, mainly the Drukpa school of the Kagyupa sect. The national flag (proportions 5 by 4) is divided diagonally to form two triangles, one yellow and the other maroon, with a white dragon superimposed in the centre. The capital is Thimphu.

Recent History

The first hereditary King of Bhutan was installed on December 17th, 1907. An Anglo-Bhutanese Treaty signed in 1910 placed all Bhutan's foreign relations under the supervision of the Government of British India. When India became independent, that treaty was replaced by the Indo-Bhutan Treaty of Friendship of 1949, under which Bhutan agrees to seek the advice of the Government of India with regard to its foreign relations, but remains free to decide whether or not to accept such advice. Bhutan has asserted itself as a fully sovereign, independent state, becoming a member of the UN in 1971 and of the non-aligned movement in 1973.

King Jigme Dorji Wangchuk, installed in 1952, established the National Assembly (*Tsogdu*) in 1953 and a Royal Advisory Council in 1965. He formed the country's first Cabinet in May 1968. He died in July 1972 and was succeeded by the Western-educated 17-year-old Crown Prince, Jigme Singye Wangchuk. The new King stated his wish to maintain the Indo-Bhutan Treaty and to further strengthen friendship with India. In 1979, however, during the Non-Aligned Conference and later at the UN General Assembly, Bhutan voted in opposition to India, in favour of Chinese policy. King Singye stated that the Treaty needed up-dating.

When Chinese authority was established in Tibet in 1959, Bhutan granted asylum to about 4,000 Tibetan refugees. Because it had been discovered that many refugees were engaged in spying and subversive activities, the Bhutan Government decided in 1976 to disperse them in small groups, introducing a number of Bhutanese families into each settlement. In early 1978 four-year-long discussions with the Dalai Lama of Tibet broke down. The National Assembly passed a directive in June 1979 giving the refugees until the end of the year to decide whether to take out Bhutanese citizenship or accept repatriation to Tibet. In October India announced that it would not be able to accept refugees who refused Bhutanese nationality as there were still 10,000 Tibetans in India awaiting rehabilitation. By July 1980, however, most of the Tibetans had chosen Bhutanese citizenship and the rest were to be accepted by India.

Government

Bhutan is an absolute monarchy. The system of government is unusual in that power is shared between the monarchy (assisted by the Royal Advisory Council), the Council of Ministers, the National Assembly (*Tsogdu*) and the monastic head (*Jey Khempo*) of Bhutan's 6,000 Lamas. The National Assembly, which serves a three-year term, has 150 members, including 110 indirectly elected by village headmen, 10 representing monastic bodies and 30 appointed officials.

Defence

The strength of the Royal Bhutanese Army, which is under the direct command of the King, is classified information. As well as the regular standing army, there is a large militia. Army training facilities are provided by an Indian military training team. Though India is not directly responsible for the country's defence, the Indian Government has indicated that any act of aggression against Bhutan would be regarded as an act of aggression against India.

Economic Affairs

In terms of average income, Bhutan is one of the poorest countries in the world. According to World Bank figures, G.N.P. per caput was U.S. \$60 in 1974, rising to \$70 in 1975 and an estimated \$100 in 1980.

The economy is predominantly agrarian. An estimated 93.4 per cent of the economically active population was employed in agriculture in 1980. Forests cover about 65 per cent of the country's area, and further afforestation is envisaged. Timber and fruit, including apples, are exported. There is some small-scale industry, producing, for example, textiles, soap, matches, candles and carpets. Centres for the production of traditional handicrafts, such as bamboo-work, lacquer woodwork and woven carpets, have been set up. Several minerals of economic importance have been discovered, and small mineral-based units have been set up, such as the graphite beneficiation plant at Paro. The Government is encouraging private entrepreneurs to set up small units and a number of small industrial estates have been established, producing a variety of consumer goods and industrial raw materials. Being under-populated, Bhutan is dependent on foreign labour. To lessen this dependence on imported labour, many construction activities are to be mechanized.

A series of Five-Year Economic Plans began in 1961, the first two being financed entirely by India. India provided Nu 410 million of the Nu 500 million development expenditure in 1978/79. The UN Development Programme was to provide U.S. \$12.25 million for the 1976-81 Five-Year Plan. The UN Children's Fund, the UN Fund for Population Activities and the World Food Programme agreed to give assistance for other projects during the plan period. Considerable improvements have been brought about in roads, animal husbandry,

irrigation, forestry and electricity generation. Six hydro-electricity stations have been set up and Bhutan expects to export a surplus of energy in the future. The Indian Government is financing the establishment of an east-west link and the Indo-Bhutanese microwave link to provide Bhutan with instant communication internally and abroad. Fifty per cent of expenditure under the fourth Five-Year Plan (1976-81) was allocated to agriculture, particularly irrigation projects.

Since the 1960 ban on trade with Tibet, Bhutan's main trading partner has been India, although timber, liquor and cardamom are also exported to the Middle East and Western Europe. More transit trade facilities are now required. After the inauguration of the postal system in 1972, Bhutan's postage stamps became the main earner of foreign exchange, but in 1976 were superseded by tourism, which brought in an estimated U.S. \$1 million in 1979.

Transport and Communications

By 1978 1,775 kilometres of roads, most of which are surfaced, linked different parts of the kingdom, and further surfaced roads connected main towns in Bhutan with the Indian states of West Bengal and Assam. There is a shortage of road transport. The chief airport is at Paro while one at Yangphulla serves the east. Druk Airways is expected to become operational by 1982.

Social Welfare

In 1981 the country had 15 hospitals and a mobile hospital unit was operating in the remote central areas. Because of the shortage of doctors and lack of funds, local dispensaries are being converted into basic health units, providing basic medical services. Smallpox has been eradicated, but malaria and tuberculosis are still widespread.

Education

Free education is available. In 1975 it was estimated that only 8 per cent of children aged 6 to 11 years received primary education. Some of the schools are co-educational

and run along the lines of an American private school but using a British syllabus. There are no mission or private schools in Bhutan, all schools being subsidized by the Government. In 1981 there were over 150 schools, including six central schools, one junior college (to be upgraded to a three-year degree college), two technical schools, one Buddhist grammar school, one painting and one sculpture school, two teacher training schools and a number of monastic schools. A number of Bhutanese students were receiving higher education in India, Australia, New Zealand, Japan, Singapore, the United Kingdom, Switzerland, Austria and the U.S.A.

Tourism

Bhutan was opened to tourism in the autumn of 1974 and hotels, transport and other facilities were created in the west. Foreign tourists may visit Bhutan in package or trekking tours, or individually, accompanied by guide/interpreters.

In 1976 tourists from the Federal Republic of Germany, the U.S.A., Belgium, Italy, France, Australia and Japan numbered 1,500.

Public Holidays

The usual Buddhist holidays are observed, as well as the National Day of Bhutan (December 17th) and the Birthday of H.M. Jigme Singye Wangchuk (November 11th).

Weights and Measures

The metric system is in operation.

Currency and Exchange Rates

100 chetrums = 1 ngultrum (Nu).

Exchange rates (October 1981):

£1 sterling ≈ 16.95 ngultrums;

U.S. \$1 ≈ 9.07 ngultrums.

Indian currency is also legal tender.

(November 1981)

Representative of His Majesty in the Ministry of Finance: H.R.H. Princess SONAM CHHODEN WANGCHUK.

Representative of His Majesty in the Ministry of Development: H.R.H. Princess DECHEN WANGMO WANGCHUK.

Minister of Trade, Industry and Forests: H.R.H. NAMGYEL WANGCHUK.

Home Minister: LYONPO TAMJI JAGAR.

Minister of Foreign Affairs: LYONPO DAWA TSERING.

Minister of Communications and Tourism: LYNPO SANGAY PENJOR.

LEGISLATURE

TSOGDU

A National Assembly (*Tsogdu*) was established in 1953. The Assembly has a three-year term and meets twice yearly in spring and autumn. There are 150 members, of whom 101 are directly elected by the public. Ten seats are reserved for religious bodies and the remainder are occupied by officials, the ministers and members of the Royal Advisory Council. The Assembly enacts laws, advises on constitutional and political matters and debates all important issues. Both the Royal Advisory Council and the Council of Ministers are responsible to it. In 1979 the Assembly accepted its first woman member.

LOCAL ADMINISTRATION

There are 18 districts, each headed by a Dzongda (in charge of administration and law and order) and a Thrimpon (in charge of judicial matters). Land revenue is collected by the village headmen and remitted to the Dzongda. Under the proposed Fifth Five-Year Plan (1982-86), with the introduction of decentralization, there will be 17 districts, as Punakha and Thimphu will be merged as one district.

POLITICAL PARTIES

There are no political parties in Bhutan.

DIPLOMATIC REPRESENTATION

EMBASSIES ACCREDITED TO BHUTAN

Bangladesh: Thorilam, Thimphu; *Ambassador:* AMINUL ISLAM.

India: Lungtenzampa, Thimphu; *Ambassador:* SALMAN HAIDAR.

JUDICIAL SYSTEM

Bhutan has a Civil and a Criminal Code.

High Court: Established 1968 to review appeals from Lower Courts; 6 Judges.

Appeal Court: The Supreme Court of Appeal is H.M. the King.

Magistrates Courts: All cases are heard by the Thrimpon (District Magistrates). Appeals are made to the High Court.

RELIGION

The State religion is Mahayana Buddhism. Buddhism was introduced into Bhutan in the eighth century A.D. by the Indian saint Padma Sambhava, known in Bhutan as Guru Rimpoche. In the thirteenth century Phajo Dugom Shigpo made the Drukpa school of Kagyupa Buddhism dominant in Bhutan and this sect is still supported by the dominant race in Bhutan, the Bhutias. Monasteries are numerous. The chief monastery is situated at Tashichhodzong and contains 2,000 Lamas. There are 6,000 state-supported Lamas in the kingdom, with the *Jey Khempo* as their head.

TRADE AND INDUSTRY

Food Corporation of Bhutan (FCB): f. 1974; activities include retailing, marketing, storage, import and export of agricultural products; operates a rural finance scheme, receiving loans from the Bank of Bhutan and the Royal Insurance Corporation, to assist farmers.

National Commission for Trade and Industry: regulates the type, quality and quantity of industrial projects to be set up in Bhutan; Chair. H.M. Druk Gyalpo JIGME SINGYE WANGCHUK.

TRANSPORT

ROADS AND TRACKS

In 1978 there were 1,775 km. of roads (most of which are surfaced). In addition, surfaced roads link the important border towns of Phuntsholing, Gaylephug, Sarbhang and Samdrup Jongkhar in southern Bhutan to towns in

Finance, Trade and Industry, Transport, Tourism

West Bengal and Assam in India. Yaks, ponies and mules are still the chief means of transport on the rough mountain tracks.

State Transport Department (*Bhutan Government Transport Corporation*): Phuntsholing; f. 1962; operates a fleet of 90 buses (1977).

Lorries for transporting goods are operated by the private sector.

CIVIL AVIATION

The main airport is at Paro; an airport at Yangphulla serves the east of the country. There are numerous helicopter landing pads. Druk Airways is expected to become operational with the help of Indian Airlines by 1982 and will link Paro with Calcutta.

TOURISM

Bhutan Travel Agency: P.O. Thimphu; government-run.

The Kingdom was opened to tourism in the autumn of 1974 and the tourist seasons are from March to June and September to December. Tourists travel in organized package or trekking tours, or individually, accompanied by guides. Hotels have been constructed by the Department of Tourism at Phuntsholing, Paro and Thimphu. There are also many small privately run hotels.

BOLIVIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Bolivia is a landlocked Andean state in South America, bordered by Chile and Peru to the west, Brazil to the north and east and Paraguay and Argentina to the south. Climate varies according to altitude from humid tropical below 500 metres to the cool and cold zones above 3,500 metres. The official languages are Spanish, Quechua and Aymará. Roman Catholicism is the principal religion. The national flag (proportions 3 by 2) has equal horizontal stripes of red, yellow and green. The state flag has, in addition, the national emblem in the centre. The legal capital is Sucre. The administrative capital and seat of government is La Paz.

Recent History

The Incas of Bolivia were conquered by Spain in 1538 and, although there were many revolts against Spanish rule, independence was not achieved until 1825. Bolivian history has been characterized by internal strife, resulting in a succession of presidents, and territorial disputes with its neighbours, including the 1879-83 War of the Pacific between Bolivia, Peru and Chile, and the Chaco Wars of 1928-30 and 1933-35 against Paraguay.

In 1952 a popular revolution overthrew the military junta in power, and Dr. Víctor Paz Estenssoro, elected President in 1951 but prevented from returning from exile in Argentina, was installed as President. His government, a coalition of the Movimiento Nacionalista Revolucionario (MNR) and the Labour Party, committed itself to profound social revolution; it nationalized the tin mines and introduced universal suffrage and land reform. Hernán Siles Zuazo was elected President for the 1956-60 term and Dr. Paz Estenssoro was again elected President in 1960, but in November 1964 he was overthrown by the Vice-President, Gen. René Barrientos Ortuño.

In April 1969 Dr. Luis Adolfo Siles Salinas, the Vice-President, succeeded to the presidency on the death of Gen. Barrientos, but in September Gen. Alfredo Ovando Candía assumed power by *coup d'état*. In October 1970 he was deposed and Gen. Juan José Torres González emerged as President, pledging support for agrarian reform and worker participation in management. A "People's Assembly" was allowed to meet and called for extreme socialist measures, causing disquiet in right-wing circles. President Torres was deposed in August 1971 by Col. (later Gen.) Hugo Banzer Suárez, who drew support from the right-wing Falange Socialista Boliviana and a section of the MNR, as well as from the army. In June 1973 President Banzer announced an imminent return to constitutional government but elections were later postponed to June 1974. The MNR withdrew its support and entered into active opposition.

Following an attempted military coup in June 1974, the cabinet was replaced by an all-military one. After an attempt to overthrow him in November 1974, President Banzer declared that elections had been postponed indefinitely and that his military regime would retain power

until at least 1980. All political and union activity was banned. Political and industrial unrest in 1976 led President Banzer to announce that elections would be held in July 1978. Allegations of fraud rendered the elections void but Gen. Juan Pereda Asbún, the government candidate in the elections, staged a successful military coup. In November 1978 his right-wing government was overthrown in another coup, led by Gen. David Padilla Arancibia, with the support of national left-wing elements.

The elections held in July 1979 resulted in a split presidential vote between Hernán Siles Zuazo and Dr. Paz Estenssoro, leading rival factions of the MNR, which Congress was unable to resolve. An interim government was formed under Walter Guevara Arce, President of the Senate, but was overthrown in November by a right-wing army officer, Col. Alberto Natusch Busch. Fighting ensued in La Paz, in which over 600 people were killed, and, after failing to gain the support of Congress, Col. Natusch withdrew. Congress elected Lidia Gueiler, President of the Chamber of Deputies, as President pending elections scheduled for June 1980.

These elections also yielded no clear winner and, before Congress could meet to decide between the two main presidential contenders (again Siles Zuazo and Paz Estenssoro), the army commander, Gen. Luis García Meza, staged a coup—the 189th in Bolivia's 154 years of independence. Opposition, in the form of a general strike and armed resistance (notably by the miners), was crushed by the armed forces. The final toll for the whole coup is unknown but as many as 3,000 people may have died and many more were arrested or went into exile.

The new Government proved little more stable than its predecessors despite a virtually leaderless civilian opposition and Gen. García's attempts to purge the army command of his opponents. Its heavy implication in the cocaine trade and the violence of the armed forces during and after the coup prevented its recognition by the U.S.A. and the EEC countries and caused them to stop their financial aid. Apart from some financial assistance from Argentina, it appeared that the Government depended upon the proceeds of drug trafficking for much of its revenue. In August 1981, after four unsuccessful coups, a military uprising forced Gen. García to resign and hand power back to the junta. In September the presidency was taken over by the army commander, Gen. Celso Torrelio Villa, chosen chiefly for being one of the few generals not known to be involved in the drugs trade or to be otherwise corrupt.

The long-standing matter of Bolivian access to the Pacific through Chilean territory, tension over which caused a break in diplomatic relations between the two countries in 1978, has yet to be resolved.

Government

Executive power is vested in the President, the junta (which consists of the three military commanders) and the Cabinet, which the President appoints. Government is by

decree and is executed by the armed forces. The country is divided, for administrative purposes, into nine departments, each of which is governed by a prefect appointed by the President.

Defence

Military service for one year is compulsory for all males at nineteen. In July 1981 the armed forces numbered 26,600 men, of whom the army had 20,000, the air force 4,000, and the navy 2,600. Defence expenditure for 1981 was 4,400 million pesos.

Economic Affairs

Agriculture employs almost half of the labour force but contributes only about 15 per cent of the G.D.P. Although subsistence farming predominates in the central highlands, agricultural production is more effective in the tropical lowlands. Potatoes, maize, rice and wheat are the principal agricultural products for domestic consumption, while sugar, cotton, coffee and, increasingly, timber are the principal agricultural exports. Political turbulence has seriously affected agriculture and the only crop to have increased in production between 1976 and 1980 was coca, the source of the stimulant drug cocaine, which is traded illicitly. The value of coca exports in 1981 was estimated at \$1,600 million and in November a state monopoly in coca leaf trading was established. Over the same years, potato production fell below the level of domestic consumption, wheat production fell by 30 per cent and raw cotton production by 46 per cent.

Bolivia is the world's second largest producer of tin and the economy still depends largely on the export of tin. Mining accounted for 7.3 per cent of the G.D.P. and 60.8 per cent of official export earnings in 1980. Bolivia is a leading world producer of tin, antimony and tungsten (wolfram), but it is a high-cost producer and therefore vulnerable to changes in market demand. Lead, gold, silver, zinc, etc. are also mined. Mineral production fell by 15 per cent in 1979, largely as a result of strikes, and political unrest in 1980 and 1981 was expected to cause a further reduction. The sector is also hampered by high taxes and capricious world demand. Crude petroleum and natural gas have become of increasing importance since 1972, but petroleum production has fallen steadily since 1973, dropping by 8.5 per cent in 1979 and 14 per cent in 1980, owing to well depletion and lack of exploration investment. In 1981 production fell to 22,201 b.p.d., while domestic consumption reached 27,092 b.p.d. The outlook for natural gas is more promising: production rose by 14 per cent in 1980. Argentina imports 230 million cubic feet per day and in 1981 Brazil agreed to buy 400 million cubic feet per day for 20 years. The gas will flow 1,600 km. from Santa Cruz de la Sierra to São Paulo along a pipeline which is due for completion in 1985.

The embryonic industrial sector has received some impetus from Andean Pact agreements and a substantial petrochemical sector has been assigned to Bolivia. In August 1979 the Instituto Nacional de Inversiones approved 18 new industrial projects, including ones for mineral and agricultural product processing and textile and engineering plants. Industrial production has, however, suffered from social unrest and government instability; it declined by 1.1 per cent in 1980 and by 26 per cent in the

first half in 1981, when sales of industrial goods fell by 31 per cent.

After an average economic growth rate of 6.3 per cent annually between 1973 and 1977, the G.D.P. increased by 2.1 per cent in 1979 and by only 0.8 per cent in 1980, as a result of declines in petroleum, gas and agricultural production. By 1981 Bolivia's financial problems had reached crisis level. The willingness shown by international and foreign banks to invest in Bolivia in the 1970s had waned and in July the foreign debt reached \$3,700 million. The rescheduling of a payment of an outstanding \$460 million took several months to settle because of the Government's objection to the programme proposed by the IMF. By June 1980 the obligations on the foreign debt totalled \$626 million, over 60 per cent of official export earnings in 1980. The inflation rate rose from single figures in 1976 to 45 per cent in 1980. Inflation was exacerbated by the withdrawal of food and fuel subsidies early in 1981 and has a disproportionate effect on the poorest sectors of society. Bolivia still has one of the lowest per caput incomes in Latin America: in 1981 it fell to an estimated \$416.

In September 1981 the Government announced a plan to restructure the economy. The general proposals were to streamline the public sector, encourage foreign capital investment and private sector activity, and to improve the education, social security and health systems. No details were given of how these aims are to be achieved or financed and the chances of their implementation are slight.

Bolivia is a member of ALADI (formerly LAFTA) and the Andean Group.

Transport and Communications

In 1980 there were 3,772 km. of railways, linking the main towns, and there were 38,866 km. of roads in 1978. A 560-km. highway runs from Santa Cruz to Cochabamba, serving a colonization scheme on virgin lands around Santa Cruz. The Pan-American highway, linking Argentina and Peru, crosses Bolivia from south to north-west. Bolivia also has over 14,000 km. of navigable rivers which connect with the Amazon basin. In 1976 Argentina gave Bolivia free-port facilities at Rosario on the Paraná River. This gave Bolivia an independent Atlantic outlet. There are hopes of securing a Pacific outlet from Chile. Internal and international air services are provided by Lloyd Aéreo Boliviano and Transportes Aéreos Militares.

Social Welfare

There are benefits for unemployment, accident, sickness, old age and death. In 1978 the Government established a social security and health scheme covering 1.66 million rural workers. In 1978 there were 1,158 hospitals, clinics and medical posts, with 3,410 doctors.

Education

The illiteracy rate was 40 per cent in 1980, despite a literacy campaign begun in the 1960s. Education is free and, where possible, compulsory between the ages of 7 and 14. There are one private and seven state universities which were closed indefinitely after the 1980 coup, pending government restructuring.

BOLIVIA

Tourism

Lake Titicaca, at 3,810 metres above sea-level, offers excellent fishing and the "reed" island of Suriqui, and on its shore stands the famous Catholic sanctuary of Copacabana. The Andes peaks include Chacaltaya, which has the highest ski-run in the world. Tourists come from the U.S.A., Europe and South American countries.

THE CONSTITUTION

The constitution was suspended in July 1980. The *Consejo Nacional de Asesoramiento y Legislación* was established to study Bolivia's sixteen past constitutions and recommend the adoption of one of them, with suitable modifications.

Bolivia became an independent republic in 1825 and received its first Constitution in November 1826. Since that date a number of new Constitutions have been promulgated. Following the *coup d'état* of November 1964 the Constitution of 1947 was revived. Under it the executive power is vested in the President and members of his cabinet. In the revised Constitution the President is elected by direct suffrage for a four-year term and is not eligible for immediate re-election. In the event of his death or failure to assume office, the Vice-President takes his place and, failing the Vice-President, the President of the Senate.

The President has power to appoint members of the cabinet, diplomatic representatives, and archbishops and bishops from a panel proposed by the Senate. He is responsible for the conduct of foreign affairs and is also empowered to issue decrees, and initiate legislation by special messages to Congress.

Congress consists of a Senate and Chamber of Deputies and meets annually on August 6th at La Paz. Its ordinary sessions last only 90 working days, which may be extended to 120. Each of the nine departments (La Paz, Chuquisaca, Oruro, Beni, Santa Cruz, Potosí, Tarija,

Cochabamba and Pando), into which the country is divided for administrative purposes, elects three senators to serve for a period of four years. The 157 deputies are elected for four years.

The supreme administrative, political and military authority in each department is vested in a prefect appointed by the President. The sub-divisions of each department, known as provinces, are administered by sub-prefects. The provinces are further divided into cantons. There are 94 provinces and some 1,000 cantons. The capital of each department has its autonomous municipal council and controls its own revenue and expenditure.

Public order, education and roads are under national control.

A decree issued in July 1952 conferred the franchise on all persons who had reached the age of 21, whether literate or illiterate. Previously the franchise had been restricted to literate persons.

The death penalty was restored in October 1971 for terrorism, kidnapping and crimes against government and security personnel. In 1981 its scope was extended to drug trafficking.

Bolivia also has diplomatic relations with Algeria, Bulgaria, the German Democratic Republic, Grenada, Sri Lanka and Viet-Nam. Diplomatic relations were broken off with Chile in March 1978, with Ecuador in July 1980 and with Nicaragua in August 1980. By the end of 1981 many countries had not yet officially recognized any Bolivian government since the 1980 coup.

JUDICIAL SYSTEM

President of the Supreme Court: Dr. REMBERTO PRADO MONTAÑO.

Attorney-General: Dr. JOSÉ HUGO VILAR TUFINO.

Judicial power is vested in the **Supreme Court** which sits at Sucre. There are 12 members, appointed by Congress for a term of ten years. The court is divided into four chambers of three justices each. Two chambers deal with civil cases, the third deals with criminal cases and the fourth deals with administrative, social and mining cases.

The President of the Supreme Court presides over joint sessions of the courts and attends the joint sessions for cassation cases.

There is a **District Court** sitting in each Department, and additional provincial and local courts to try minor cases.

In addition to the Attorney-General at Sucre (appointed by the President on the proposal of the Senate), there is a District Attorney in each Department as well as circuit judges.

RELIGION

The majority of the population is Roman Catholic; there were an estimated 5,141,000 adherents in 1976 (provisional figure, not revised in the light of the 1976 census result). Religious freedom is guaranteed and there is a small Jewish community as well as various protestant denominations in existence in Bolivia.

INLAND WATERWAYS

By agreement with Paraguay in 1938 (confirmed in 1939) Bolivia has an outlet on the River Paraguay. This arrangement, together with navigation rights on the

Paraná, gives her access to the River Plate and the sea. The River Paraguay is navigable for vessels of 12-foot draught for 288 km. beyond Asunción in Paraguay and for smaller boats another 960 km. to Corumbá in Brazil.

In 1974 Bolivia was granted free duty access to the Brazilian coastal ports of Belém and Santos and the inland ports of Corumbá and Port Velho. In 1976 Argentina granted Bolivia free port facilities at Rosario on the River Paraná. Most of Bolivia's foreign trade is handled through the ports of Matarani (Peru), Antofagasta and Arica (Chile), Rosario and Buenos Aires (Argentina) and Santos (Brazil).

Bolivia has over 14,000 km. of navigable rivers which connect most of Bolivia with the Amazon basin.

BOTSWANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Botswana lies between South Africa to the south and east, Zimbabwe to the north-east and Namibia (South West Africa) to the west and north. A short section of the northern frontier adjoins Zambia. The climate is generally sub-tropical, with hot summers and an average rainfall of 450 mm. The territory is largely near-desert, and most of the population lives along the eastern border by the main railway line. The languages used are Setswana and English. Most of the population follow African religions, but several Christian churches are also represented. The national flag (proportions 3 by 2) consists of a central horizontal band of black edged with white, between bands of azure above and below. The capital is Gaborone.

Recent History

Formerly one of the British High Commission Territories in southern Africa, the Bechuanaland Protectorate became internally self-governing in March 1965 and, as Botswana, attained full independence within the Commonwealth on September 30th, 1966. The Prime Minister, Sir Seretse Khama, became the country's first President at independence.

Political life has been dominated by the Botswana Democratic Party (BDP) which won general elections in 1965, 1969, 1974 and 1979, with little opposition. A liberal conservative, Sir Seretse consolidated his leadership of the country over the years while pursuing a national programme of democracy, development, self-reliance and unity, and Botswana won increasing international respect for its stability of government, non-racialism and democratic practice.

New-found mineral wealth is stimulating the transition from a predominantly rural to a mixed economy, as well as creating new problems for the country. Growth of the urban at the expense of the rural sector, unequal distribution of capital and increasing unemployment, and the general security problems of southern Africa present obstacles for development. There is a highly unequal distribution of wealth among the rural population, who are also victims of factors beyond their control, such as cattle disease and the weather.

In southern African politics, Botswana occupies a delicate position which is reflected in a foreign policy of moderation and non-alignment. Although Botswana does not have diplomatic links with South Africa, and is openly critical of apartheid, it depends heavily on its neighbour for trade and communications. Sir Seretse chaired the Lusaka summit of April 1980 which established the Southern African Development Co-ordinating Conference (SADCC), an economic union of nine southern African states committed to reducing their dependence on South Africa. In July 1981 the SADCC decided to establish a permanent secretariat in Gaborone (see p. 275).

As one of the five "front-line" states, Botswana played a leading role in the attempts to encourage a peaceful solution to the constitutional problems of Zimbabwe, and

continues to do so for Namibia. Following the Rhodesian internal settlement of March 1978, there was an influx of about 25,000 black refugees who were a heavy burden on the limited resources of Botswana. The Botswana Defence Force (BDF) was formed in 1977, mainly to handle security problems spilling over from Botswana's neighbours, and is a growing burden on development funds. Although Botswana accepts political refugees from neighbouring countries, it refuses to allow its territory to be used for bases to launch guerrilla operations. This did not prevent sporadic attacks by Rhodesian troops and, for the first time in 1981, minor clashes between the South African army and the BDF.

Sir Seretse Khama died in July 1980 and was much mourned in Botswana and throughout the world. He was succeeded as President by Dr. Quett Masire, previously Vice-President and Minister of Finance. Both Presidents have played important roles in international relations, in disproportion to the population and economic strength of Botswana.

Government

Legislative power is vested in the National Assembly, with 38 members holding office for five years, including 32 elected by universal adult suffrage. Executive power is vested in the President, elected by the Assembly for its duration. He appoints and leads a Cabinet which is responsible to the Assembly. The President has powers to delay implementation of legislation for six months and certain matters also have to be referred to the 15-member House of Chiefs for approval though they have no power of veto. Local government is effected through nine district councils and four town councils.

Defence

Botswana established a permanent *Defence Force* in 1977 and by July 1981 its total strength was some 2,000 men, including 50 in an air arm. In addition there was a paramilitary force of over 1,200 men.

Economic Affairs

The economy is based chiefly on livestock raising and agriculture which provide a livelihood for nearly 90 per cent of the population and which, until about 1971, were the source of almost all the country's exports. In normal years the cattle industry is the second largest contributor to foreign exchange earnings. Following the signing of the Lomé Convention and the United Kingdom's entry into the EEC, Botswana was granted a 90 per cent levy abatement on beef exports to the EEC which is periodically renegotiated. The national herd (about 3 million head) is very unevenly distributed among the rural population, almost half of whom have no direct access to cattle. The Government's Tribal Land Grazing Programme, started in 1975 to protect small cattle owners and prevent erosion of rangeland, has had little success. The number of cattle slaughtered at the Lobatse abattoir was 229,000 in 1979, but only 141,000 in 1980 because of a ban on beef exports to the EEC after a serious outbreak of foot-and-mouth.

disease, which was not lifted until June 1981. It is planned to build a second abattoir near Francistown. Arable farming is largely undeveloped and extremely vulnerable to adverse weather conditions. The total production of the four major crops (maize, sorghum, millet and beans) was only 8,500 metric tons in 1979, owing to drought, but rose to 45,000 tons in 1980.

The fastest growing economic sector is mining, which is now the major source of exports and revenues. In addition to the established extraction of diamonds, copper-nickel and coal, there are also deposits of asbestos, chromite, copper, fluorspar, iron, manganese, talc and uranium. There have been large finds of salt and soda ash in the Sua Pan brines in the north-east, and indications of the presence of petroleum and natural gas in south-western Botswana.

The Selebi-Phikwe copper and nickel operation, in which the Government has a 15 per cent share, began production in 1974. More than 40 million metric tons of ore were located and potential output was estimated at 46,000 tons of copper-nickel matte per year; production was over 40,000 tons in 1980, in spite of a temporary shut-down due to technical problems. Low metal prices in 1981 aggravated the financial problems of the mining company, Botswana Roan Selection Trust.

Diamonds are the largest export sector, earning an estimated P224 million of foreign exchange in 1980, 61 per cent of the total. Output rose from 2.4 million carats in 1976 to 5.1 million carats in 1980. The Orapa field, where production started in 1971, is the second largest in the world, but the smaller Letlhakane mine, which opened in 1977, produces higher quality gems. A third mine, at Jwaneng, was due to start production in January 1982 and was expected to double the total production by 1986. All current diamond mining is by Debswana, which is owned equally by the Botswana Government and De Beers, although Botswana takes about 70 per cent of the profits. Falconbridge has also made kimberlite finds in western and north-eastern Botswana.

Coal mining started in 1972 and 350,000 metric tons were produced in 1980. It is believed that there may be reserves of 17,000 million tons in the east of the country, which could be exploited only after a trans-Kalahari railway, passing through Namibia to the port of Walvis Bay, had been built, which is unlikely before a peace settlement is reached in Namibia. A feasibility study has calculated that Botswana would need to produce 10 million tons per year to make the project viable.

Since independence the Government has concentrated on improving Botswana's infrastructure so that industrial development has been limited. Development has also been hampered by frequent drought (particularly severe in 1979), inadequate internal and external communications, the smallness of the domestic market and a shortage of trained manpower.

Botswana, with Lesotho and Swaziland, is linked to South Africa in a customs union but the establishment of its own currency and central bank in August 1976 is an indication of its growing economic self-confidence. The budget has shown a deficit since 1977 and revenues of P265.4 million and expenditure totalling P271.6 million were announced for the 1980/81 budget. Expenditure in the Fifth National Development Plan (1979-85) is esti-

mated to be P970 million, and will be funded by diamond revenues and foreign aid. The main themes are employment creation and rural development. Gross Domestic Product rose from P345 million in 1977/78 to P502 million in 1978/79 and, grew by a further 14.4 per cent in real terms in 1980.

Botswana's trade deficit, which goes back to 1962, remains considerable, as the rapid growth of mineral exports has been accompanied by an increased demand for imported manufactured goods and machinery. However, the trade deficit is largely offset by investment income and migrants' remittances. In the long term, the economic outlook is promising, despite the uncertain political situation in southern Africa, in view of Botswana's highly developed beef industry and its vast mineral resources which offer excellent prospects for the growth of ancillary industries, employment opportunities and economic diversification.

Transport and Communications

Communications are largely undeveloped and the lifeline of the country is the 960-km. railway between Mafikeng in South Africa and Bulawayo, Zimbabwe, which is owned and operated by National Railways of Zimbabwe. It is planned that Botswana Railways should take over the 714 km. of line within the country by 1986. A trans-Kalahari rail link may eventually be built. There are several airfields served by government and private charter companies, and the international airport at Gaborone was expected to open in 1984. A large road development plan is under way. In 1977 the Botswana-Zambia (Bot-Zam) highway from Nata to Kazungula was completed, providing an important link between Zambia, the remote north of Botswana, and the more prosperous south and east. There are plans to upgrade the road.

Social Welfare

Health services are being developed, and in 1980 there were 13 general hospitals, one mental hospital, 7 health centres, 104 clinics and 533 health posts, with 108 registered doctors, nine dentists and 1,022 nurses. Treatment is free for children under 11 years of age.

Education

In 1980 there were 170,847 pupils in primary schools, mostly financed by district councils, assisted by Government grants in aid. In addition, there were 18,325 secondary students, 1,800 vocational students, and over 900 students received higher education at the University of Botswana and Swaziland in Botswana. Literacy in Setswana is about 45 per cent, and in English 30 per cent. Free primary education from the age of six was introduced in 1980. A major problem remains the shortage of jobs in Botswana for skilled workers, despite the present mining boom.

Tourism

There are six game reserves, including Chobe, only a short drive from Victoria Falls by first-class roads. Most of the main centres of population have hotels, and photographic and big-game safaris can be organized. Despite lack of infrastructure and the security problems associated with southern Africa, Botswana attracted 58,100 holiday visitors and 18,400 day trippers in 1979, mostly from South Africa.

100 pula = £60.31 = \$112.72.

Note: The pula was introduced in August 1976, replacing (at par) the South African rand, which from September 1975 had a value of U.S. \$1.15. On April 30th, 1977, the pula was revalued at U.S. \$1.2075. This remained in effect until September 1979, when a new rate of 1 pula = \$1.2679 was established. Since June 1980 the pula's value has been linked to a weighted "basket" of currencies. The average value of the pula was \$1.1883 in 1977; \$1.2276 in 1979; \$1.2890 in 1980. For details of previous changes in the exchange rate, see the chapter on South Africa.

THE CONSTITUTION

The current Constitution of Botswana came into operation at independence on September 30th, 1966.

EXECUTIVE

President

Executive power lies with the President of Botswana, who is also Commander-in-Chief of the armed forces. Election for the office of President is linked with the election of members of the National Assembly. Presidential candidates must be over 30 years of age and receive at least 1,000 nominations. If there is more than one candidate for the Presidency, each candidate for office in the Assembly must declare which presidential candidate he supports. The candidate for President who commands the votes of more than half the elected members of the Assembly will be declared President. If the Presidency falls vacant the members of the National Assembly will themselves elect a new President. The President will hold office for the duration of Parliament. After the 1974 elections the President became an ex-officio member of the Assembly.

Cabinet

There is also a Vice-President, whose office is Ministerial. The Vice-President is appointed by the President, and acts as his deputy in the absence of the President. The Cabinet consists of the President, the Vice-President, and ten other Ministers appointed by the President. Every member of the Cabinet accepts responsibility before the National Assembly for the policies of the Government.

LEGISLATURE

The legislative power is vested in Parliament, consisting of the President and the National Assembly, acting after consultation in certain cases with the House of Chiefs. The President may withhold his assent to a Bill passed by the National Assembly, but if it is again presented to him after six months, he is required to assent to it unless he dissolves Parliament within 21 days.

House of Chiefs

The House of Chiefs has the Chiefs of the eight principal tribes of Botswana as *ex officio* members, 4 members

elected by sub-chiefs from their own number, and 3 members elected by the other 12 members of the House. Bills and motions relating to chieftaincy matters and alterations of the Constitution must be referred to the House, which may also deliberate and make representations on any matter, including Bills affecting tribal interests.

National Assembly

The National Assembly consists of the Speaker, the Attorney-General, who does not have a vote, 32 elected members and 4 specially elected members. There is universal adult suffrage. The life of the Assembly is five years.

The Constitution also contains a code of human rights, enforceable by the High Court.

TRANSPORT

RAILWAYS

The main railway line from Mafikeng, South Africa, to Bulawayo, Zimbabwe passes through the country. There is 710 km. of track within Botswana, including two railway lines to serve the Selebi-Phikwe mining complex and the Morupule colliery.

BOTSWANA

National Railways of Zimbabwe: P.O.B. 596, Bulawayo; operates the railway system in Botswana, although plans to nationalize the line are gradually being put into effect.

ROADS

In 1981 there were about 15,000 km. of roads. Of the 8,015 km. officially maintained by the Government, 1,115 km. were bitumen-surfaced, 1,606 km. gravel-surfaced, and 5,294 km. earth or sand roads. There is a good road from Gaborone, via Francistown, to Kazungula, where the borders of Botswana, Namibia, Zambia and Zimbabwe meet. However, in 1981 it was still only possible to cross the Zambezi river into Zambia by pontoon, after the ferry installations were damaged by a Rhodesian bombing raid in April 1979. Plans to build a bridge at the crossing were being considered.

BRAZIL

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federative Republic of Brazil, the fifth largest country in the world, lies in central and north-eastern South America. To the north are Venezuela, Colombia, Guyana, Suriname and French Guiana, to the west Peru and Bolivia, with Paraguay, Argentina and Uruguay to the south. Climatic conditions vary from the tropical rain forest of the Amazon basin to the savannah grasslands of the central and southern uplands. The language is Portuguese. Over 90 per cent of the population is Roman Catholic. The national flag (proportions 10 by 7) is green with a yellow diamond in the centre charged with a blue celestial globe. The capital is Brasília, though some administrative offices still remain in Rio de Janeiro, which was the capital of Brazil until 1960.

Recent History

A Portuguese colony from the sixteenth century, Brazil became independent in 1822 under the Portuguese Crown Prince, who took the title Pedro I. His son, Pedro II, was styled emperor, but encouraged constitutional practices and was deposed in 1889. A republican constitution was promulgated in 1891, but military leaders, in and out of office, have retained decisive influence in Brazilian politics. The economic crisis of 1930 fostered a coup which installed Dr. Getúlio Vargas as President, and he ruled as a benevolent dictator until 1945. Despite Fascist and Communist opposition, Vargas maintained stability and the state made steady economic progress. He resigned in 1945 and in 1946 Eurico Dutra was elected President. Vargas was re-elected President in 1950, but failed to create the necessary stability and committed suicide in 1954. The next President was Dr. Juscelino Kubitschek, the founder of Brasília. President Kubitschek was succeeded briefly by Dr. Jânio Quadros in 1961 and then by the left-wing President João Goulart, who was overthrown by a military coup, led by Gen. Humberto Castelo Branco, in April 1964. All political parties were banned in October 1965 but later that year two parties (one pro-government, one against) were granted recognition. Marshal Artur da Costa e Silva, who was elected President in October 1966, took office for a four-year term in March 1967, but resigned in September 1969. At this time a series of Institutional Acts was promulgated giving the President wide-ranging powers of government by decree.

In October 1969 Lieut.-Gen. Emílio Garrastazú Médici took office as President, having been elected by Congress under the new Constitution passed by the Government junta. Urban guerrilla activity was widespread during 1970 but was largely eliminated by stern security measures. General Ernesto Geisel, chosen by an electoral college as President, took office in March 1974. Despite his more liberal outlook, the opposition party, the *Movimento Democrático Brasileiro* (MDB), made sweeping gains in the congressional elections of November 1974, and calls were made for an end to military government. Although General Geisel reaffirmed his intention to re-establish stable democratic institutions and considerably relaxed

press censorship, political arrests and torture continued. In April 1977 he closed Congress for ten days and used his powers under Institutional Act 5 to reform the judiciary and institute various constitutional amendments by decree.

In January 1978 President Geisel's choice of Gen. João Baptista de Figueiredo as his successor was endorsed by the national convention of the government party, the *Aliança Renovadora Nacional* (ARENA). Gen. Figueiredo was duly elected President by an electoral college in October 1978 and took office in March 1979 with a promise to continue the *abertura*, or opening to democratization, begun by President Geisel. In the face of growing political agitation, including the first strikes for 10 years, Congress approved various political reforms proposed by President Geisel, notably the repeal of Institutional Act 5, although certain safeguards to defend public order remained in force (see Constitution). In November 1979 Congress approved legislation to end the controlled two-party system and the new parties subsequently formed included the first independent labour party.

Criticism of the Government, coming increasingly from the unions and the Church, focused on two issues in 1981: allegations of the use of torture by the armed forces in their campaign against urban guerrillas in the early 1970s, and the arrest of 13 union leaders for inciting the 1980 strikes in São Paulo. Eleven of the leaders, including the highly popular Luis Inácio da Silva ("Lula"), were sentenced to imprisonment under the national security laws.

In August 1981 the Head of the President's Household, Gen. Golbery do Couto e Silva, long a powerful *aberturista* influence in both government and the armed forces, resigned and was succeeded by the more hard-line Gen. João Leito de Abreu. President Figueiredo suffered a heart attack in September and was replaced, until November, by Vice-President Antônio Aureliano Chaves, the first civilian to hold presidential office since 1964.

Government

Brazil has had a military-backed Government since the 1964 coup. Under the 1969 constitution, amended by presidential decree in 1977 and 1978, the country is a federal republic comprising 22 States, four Territories and a Federal District (Brasília). Legislative power is exercised by the bicameral National Congress, comprising the Chamber of Deputies (members elected for four years) and the Federal Senate (members elected in rotation for eight years). The number of deputies is based on the size of the population. Election is by universal suffrage of literate adults (aged 18 or over) and voting is compulsory. Executive power is exercised by the President, elected for six years by an electoral college comprising all members of the National Congress and delegates from State legislatures. He appoints and leads the Cabinet. Each State has a directly elected Governor and an elected legislature.

Defence

Military service is compulsory for one year between the ages of 18 and 45. In July 1981 the armed forces comprised

BRAZIL

272,550 men: army 182,750, navy 47,000 and air force 42,800. Public security forces number about 185,000 men. Defence expenditure in 1980 was 71,920 million cruzeiros.

Economic Affairs

Agricultural production forms 11 per cent of G.D.P. and provides nearly half of Brazil's export earnings, and in 1977 Brazil became the world's second largest exporter of agricultural products. In 1979 the Government declared agriculture to be the priority sector of its economic policy, chiefly to offset the rising trade deficit. The principal agricultural exchange earners are coffee, sugar and soya beans, and other crops include cocoa, sisal, tobacco, maize and cotton. The fluctuations of the coffee market were well demonstrated by the 1981 harvest. At 32 million bags (each of 60 kg.) it was the best harvest for 16 years and it was expected that prices would fall. Subsequent frosts, which reduced the next crop by up to 50 per cent, sent world prices up again as they had done in 1975. Brazil is the world's foremost supplier of orange juice and castor oil, and aimed to become the same in cocoa by the mid-1980s.

Industrial production, which accounted for 36 per cent of the G.D.P. in 1980, is concentrated on machinery, construction materials, rubber, sugar and wood processing, and vehicle production. The wood pulp industry is expanding, with the volume of exports rising by 64 per cent in 1980, and in that year Brazil became the world's seventh largest arms exporter. In other sectors the situation was less encouraging, with workers laid off in the shipbuilding, motor and steel industries. The Açominas steelworks project in Minas Gerais, the largest in Latin America with a planned capacity of 10 million tons per year, has been subject to frequent delays and in 1981 government funds were curtailed. All industries are threatened by soaring inflation, a credit squeeze and the rising cost of energy.

Brazil possesses vast mineral reserves, particularly in Minas Gerais and the Amazon area, and in 1981 the Grand Carajás project (in Amazonia) was opened. Investment in the project was expected to be about U.S. \$61,000 million and the value of the Carajás minerals was set at \$543,000 million. The leading mineral export is iron ore and Brazil hoped to become the leading exporter in 1981, with total shipments of 85 million tons. New mineral discoveries, including phosphates, uranium, manganese, titanium, copper and coal, are constantly being made and gold deposits found in 1980 at Serra Pelada were expected to raise annual national gold production from 14 tons in 1980 to 100 tons in 1985, making Brazil the third largest gold producer in the world. In 1979 a coal plan was approved, calling for 29 mines, with an estimated output of 35 million metric tons, to be opened by 1985. Recent discoveries of platinum could contain half the world's known reserves of the mineral. Only 15 per cent of Brazil's petroleum requirements are produced locally and, in the face of an oil bill which is nearly half the total import bill, an energy plan has been devised, aiming to replace 40 per cent of petrol consumption by combustible alcohol based on sugar and cassava by 1985. A setback to the alcohol programme was an acute fall in 1981 in the sale of alcohol-fuelled cars. An unfortunate consequence of the programme has been the tendency of farmers to replace badly needed food crops by

fuel crops in order to take advantage of government financial incentives.

In 1977 about 90 per cent of all electric power was hydro-generated and several important hydro-electric projects are under way. The Itaipú project on the Paraná river, undertaken with Paraguay and due for completion in 1983, will increase Brazil's installed capacity to 77,500 MW by 1990. The estimated total hydro-electric potential is 213,000 MW. It is estimated that the nuclear programme will be producing 2.5 per cent of the nation's requirements by the late 1980s. In 1977, following the discovery of two large uranium deposits, Brazil signed a nuclear agreement with the Federal Republic of Germany to build eight nuclear power stations by the year 2000. The programme has been delayed and in 1981 the first two stations had not begun to operate.

A major part of government policy has been to increase exports in order to offset the huge fuel import bill and debt-service requirements. The trade deficit was slightly lower than expected in 1980, at U.S. \$2,829 million, and there were signs that the trade balance might break even in 1981. The policy to diversify exports gained a \$600 million contract in 1978 to supply the People's Republic of China with iron ore and steel. Other exports to China include cotton, soya beans and military aircraft. The search for alternative oil supplies led to new trade deals, concluded in 1979, with Nigeria, Angola, Mexico and Venezuela, and many engineering contracts have been gained in South America, the Middle East and the developing African countries. There is also considerable trade with South Africa.

The "Brazilian miracle" of the 1960's has given way to a less flourishing economy, although the country still possesses great resources. Brazil has become the largest foreign borrower in the world; at the end of 1980 the external debt stood at \$54,500 million and the debt service consumed 64 per cent of total export revenue. In 1980 the rate of inflation reached 110.2 per cent and its reduction became the target of the tough 1982 budget, in which the rise in government spending was held at 72 per cent. The load of this effective cut was not evenly distributed: the military allocation increased by 113 per cent and that of social welfare by only 20 per cent. Another result of inflation has been to exaggerate the concentration of wealth, and the minimum wage has been eroded to one of the lowest levels in Latin America.

Transport and Communications

Transport services are limited by jungles, rivers and mountains. Over large areas the aeroplane is the only practicable means of transport and Brazil has a large domestic network of internal air services. Highways are the principal mode of transport, accounting for 70 per cent of freight and 97 per cent of passenger traffic, including long-distance bus services, in 1979. Major projects include the 5,000-km. Trans-Amazonian Highway, running from Recife and Cabedelo to the Peruvian border, the 4,136-km. Cuiabá-Santarém highway which will run in a north-south direction and the 3,555-km. Trans-brasiliana project which will link Marabá on the Trans-Amazonian highway with Açuá on the Uruguayan frontier. The length of navigable river is 42,702 km. and the rivers carry 10 per cent of total cargo. The Amazon is navigable for 3,680 km. as far

BRAZIL

as Iquitos in Peru, and ocean-going ships can reach Manaus, 1,600 km. upstream. There are plans to modernize the railway system and 2,645 km. of the total 30,105 km. has been electrified.

Social Welfare

In 1960 the social security system, in existence since 1923, was rationalized and in 1966 the National Institute for Social Security (INPS) was formed.

The INPS is in charge of benefits; the urban scheme covers all employees and their dependents, the former contributing 8 per cent of their salary. An equal amount is paid by the employer and the government contribution is designed to finance the administration of the scheme. Benefits include sickness benefit, invalidity, old age, length of service and widows' pensions, maternity and family allowances and grants.

In response to a highly critical report on the health services, made in 1981, the Government introduced a health and welfare programme, *Prevsaiude*. The report suggested that proper use of resources could raise life expectancy by a third and lower infant mortality by up to 75 per cent in poor areas. *Prevsaiude* should double health services by 1987 by providing a further 7,697 health posts, 13,394 doctors' surgeries, 1,425 casualty departments and 23,510 hospital beds. It also includes plans to improve living conditions by supplying water to a further 14.7 million people and sewerage to 1.3 million homes. The scope of the programme has been limited by the private medical sector which controls 90 per cent of Brazil's 4,000 hospitals.

The welfare of the dwindling Indian population is the responsibility of the National Indian Foundation (FUNAI), which was formed to assign homelands to the Indians, most of whom are landless and threatened by the exploitation of the Amazon forest, and all of whom lack political rights.

Education

Education is free in official primary schools and compulsory between the ages of 7 and 15. Secondary education is for three years and is also free in official schools. The

Federal Government is responsible for higher education and in 1980 there were 65 universities, of which 40 were state-run. There are a large number of private institutions in all levels of education.

Despite an illiteracy drive launched in 1971, the adult illiteracy rate stood at 24.4 per cent in 1981, with regional variations from 15.7 per cent in the south of the country to 44.2 per cent in the north-east.

Tourism

Rio de Janeiro, with its famous beaches, is the centre of the tourist trade. Like Salvador, Recife and other towns, it has excellent examples of Portuguese colonial and modern architecture. The new capital, Brasília, incorporates a new concept of city planning and is the nation's showpiece. Other attractions are the Iguaçu Falls, seventh largest (by volume) in the world, and the tropical forests of the Amazon basin.

Public Holidays

1982: April 9th (Good Friday), April 21st (Tiradentes Day), May 1st (Labour Day), September 7th (Independence Day), November 2nd (All Souls' Day), November 15th (Proclamation of the Republic), December 25th (Christmas Day).

1983: January 1st (New Year's Day), February 14th-16th (Carnival).

Local holidays: Rio de Janeiro: May 20th (Ascension), June 10th (Corpus Christi), December 8th (Immaculate Conception), January 20th (Foundation of Rio de Janeiro). São Paulo: as Rio de Janeiro (except January 20th) and January 25th (Foundation of São Paulo).

THE CONSTITUTION

(Promulgated in 1969, subsequently amended)

SUMMARY

Brazil is a Federative Republic consisting of 22 states, one Federal District and four Territories indissolubly united under a representative form of government to constitute the Union. The Federal District is the capital of the Union.

The Union's competence includes maintaining relations with foreign states and making treaties with them, and taking part in international organizations; declaring war and making peace; decreeing a state of siege; organizing the armed forces, planning and guaranteeing national security, issuing currency; supervising credits, etc.; establishing national services, including communications, development and education services; legislating on the execution of the Constitution and federal services and on civil, commercial, penal, procedural, electoral, agrarian, maritime and labour law. The Union, States, Federal District and Municipalities are forbidden to make any distinction between Brazilians, establish any religious cults or churches against the public interest, and to deny public documents.

The Union may intervene in state affairs only in matters of extreme urgency, such as national security, and then only by Presidential decree. The States are responsible for electing their Governors by universal suffrage by direct secret ballot. The state law will decree the establishment of Municipalities, after due consultation with the local population; it will also decree the division of the States into districts; municipal organization may vary from state to state.

LEGISLATIVE POWER

The legislative power is exercised by the National Congress, which is composed of the Chamber of Deputies and the Federal Senate. Elections for deputies and senators take place simultaneously throughout the country; candidates for Congress must be Brazilian by birth, have full exercise of their political rights and be over twenty-one in the case of deputies and over thirty-five in the case of senators. Congress meets twice a year in ordinary sessions, and extraordinary sessions may be convened on demand of a third of the members of either House or the President. Each Chamber arranges its own internal procedure.

The *Chamber of Deputies* is made up of representatives of the people, elected by direct secret ballot by men and women over 18 years of age, for a period of four years. The number of inhabitants determines the number of deputies per state. Each Territory will have one deputy.

The *Federal Senate* is composed of representatives of the States, elected by direct secret ballot. Each State will elect three senators with a mandate for eight years, with elections after four years of one-third of the members and after another four years of the remaining two-thirds. Each Senator is elected with his substitute. The Senate approves, by secret ballot, the choice of Magistrates, when required by the Constitution; of the Attorney-General of the Republic, of the Ministers of the Accounts Tribunal, of the Governor of the Federal District, of the Territorial Governors and of the permanent heads of diplomatic missions.

The *National Congress* is responsible for legislating on all matters within the competence of the Union; national and regional plans and programmes, the strength of the armed forces in times of peace and territorial limits. Both houses vote on the budget in joint session. It is also responsible for making definitive resolutions on Presidential treaties, authorizing the President to leave the country; to declare war, to approve boundary changes in the States

or Territories. The Executive power must send any bills proposed by the President to the National Congress within fifteen days of signing. Constitutional amendments must be proposed by at least a third of the total number of members of both houses or by the President. Amendments are ratified by a simple majority. No changes may be made to the Constitution during a state of siege. Any Presidential bill must be considered by Congress within forty-five days if so requested by the President. The President is exclusively responsible for legislation concerning finance, creating new public offices, etc., matters concerning the administration of the Federal District and the Territories.

EXECUTIVE POWER

Executive power is exercised by the President of the Republic, aided by the Ministers of State. Candidates for the Presidency and Vice-Presidency must be Brazilian-born, be in full exercise of their political rights and be over thirty-five years of age. The President and Vice-President will be elected by a simple majority in open session by an electoral college composed of all members of the National Congress and delegates appointed by the State Legislatures on the basis of three for each state and one more for each 500,000 voters registered in the state. The President holds office for a term of five years and is not eligible for reelection. If the President violates any of his responsibilities he may be impeached by a two-thirds majority of the Deputies and judged by the Supreme Tribunal or the Senate according to the nature of his crime.

The Ministers of State are chosen by the President and their duties include carrying out the President's decrees, expediting instructions for the enactment of laws, decrees and regulations, and presentation to the President of an annual report of their activities.

National security is the responsibility of every citizen. There is a National Security Council, composed of the President and the Vice-President of the Republic, all the Ministers of State and the Chiefs of Staff of the armed services.

JUDICIAL POWER

Judicial power in the Union is exercised by the Supreme Federal Tribunal; the Federal Appeal Tribunals and federal judges; Military Tribunals and judges; Electoral Tribunals and judges; Labour Tribunals and judges; and State Tribunals and judges. Judges are appointed for life; they may not undertake any other employment, receive any percentages from cases tried by them or engage in any party political activity. The Tribunals elect their own presidents and organize their own internal structure.

The *Supreme Federal Tribunal*, situated in the Union capital, has jurisdiction over the whole national territory and is composed of eleven Ministers. The Ministers are nominated by the President after approval by the Senate, from Brazilian-born citizens, over the age of thirty-five, of proved judicial knowledge and experience.

POLITICAL AND PERSONAL RIGHTS

Registration and voting are compulsory for all Brazilian citizens over the age of eighteen except those who are illiterate or unable to express themselves in the national language or are temporarily or definitively deprived of political rights.* The organization of political parties is

* By virtue of this clause, American Indians are classed as minors and do not, therefore, have any political rights.

regulated by federal law, with the guarantee of the fundamental human rights. Congressional representation is achieved when five per cent of the total electorate votes for one party, with a minimum of seven per cent in each of seven states.

All citizens are equal in the eyes of the law, regardless of sex, race, employment, religion or political convictions; any racialism will be prosecuted; there is no death penalty (except under military legislation in case of external war), no life imprisonment, banishment or confiscation of property. Rights concerning citizens' life, liberty, security and property are inviolable.

The President may declare a state of siege in cases of serious breaches of order or the likelihood of their occurring; or war. Except in cases of war, the state of siege may not last longer than sixty days, with the possibility of extension with the approval of Congress. During a state of siege Congress may suspend constitutional guarantees, and also the immunity of federal deputies and senators.

The Constitution also lays down principles of economic and social order, concerning freedom of enterprise, dignity of human labour, social function of ownership, harmony and solidarity in production, economic development and repression of abuse of economic power. Strikes are not permitted in public services and essential activities, as defined by law. The constitution lays down certain rights for workers, including limited hours of work, paid holidays and social welfare benefits; voting in trade union elections is compulsory.

The law protects family life; education is the right of all, with equal opportunity. Education will be organized by the States and the Federal District and the Union will give technical and financial assistance to develop education.

AMENDMENTS

In April 1977 the following constitutional amendments were promulgated by presidential decree:

1. The presidential term of office was increased from five to six years as from the expiry of the then incumbent's term, March 15th, 1979, and the date for the presidential elections was brought forward from January 1979 to October 1978.

2. Henceforth, constitutional amendments must be approved by Congress by a simple majority, not the two-thirds majority as at present.

3. From 1978 state governors and one-third of the seats in the Senate were to be elected indirectly by electoral colleges comprising members of the state assemblies and

municipal councils. Those elected (including mayors) in November 1976 were to hold office until 1982 instead of 1980. The Government restored direct elections in 1980.

4. Federal deputies to be allocated on the basis of population and not on the number of registered voters as before. Each state elects not less than 6 and not more than 5 representatives.

5. Non-budgetary tax measures will no longer require congressional approval.

6. No election candidates to be allowed to appear on radio or television to discuss campaign issues.

In December 1977 the Senate approved rules for allowing marriages to be dissolved. Brazilian citizens will be able to apply for one divorce only during their lifetime. In the case of a marriage partner becoming mentally ill, divorce proceedings cannot begin until five years after the illness has been proved.

In September further amendments were promulgated which came into force in January 1979:

1. The repeal of Institutional Act 5 which gave the President the power to close Congress, suspend a citizen's political rights for 10 years and remove members of the federal, state or municipal legislatures.

2. The repeal of Article 185 of the Constitution which imposed political ineligibility for life on those citizens penalized under Institutional Act 5.

3. The promulgation of a new National Security Law under which the death penalty, perpetual imprisonment and banishment were abrogated and under which the right of *habeas corpus* was restored for political detainees.

4. The creation of a constitutional council with the President as Chairman and comprising the Vice-President, the President of the Senate and representatives of the armed forces, to approve Presidential decrees with regard to measures designed to safeguard national security:

(a) emergency measures where public order is gravely disturbed in specific regions;

(b) state of emergency for 90 days, renewable, where public security is threatened;

(c) state of siege for 180 days, includes powers of detention, censorship, etc.

5. The creation of a new law on the formation of political parties under which a new party must have 10 per cent of the votes in Congress or the support of 5 per cent of the electorate.

(In 1980 work began on a new constitution which was expected to be promulgated in March 1982.)

POLITICAL PARTIES

In November 1979 Congress passed a bill disbanding the two parties in existence since 1965, the pro-Government ARENA and the opposition MDB, in favour of the formation of new parties. These parties will receive legal recognition if they have the support of 10 per cent of the votes in Congress and of six senators. A bill was presented to Congress in November 1981 to cover the local and general elections due in 1982. If ratified by Congress, the bill would permit voters to vote only for complete lists and would disqualify any party which failed to contest every position in every locality where it had a formal organization.

The Communist parties (PCB, pro-Moscow; PC do B, pro-Beijing) remain outlawed.

Government party:

Partido Democrático Social (PDS): f. 1980; Leader CANTÍDIO SAMPAIO.

Opposition parties:

Partido Democrático Trabalhista (PDT): f. 1980; first called PTB (Partido Trabalhista Brasileiro) but was forbidden to use same name as party of former President Vargas; Leaders LEONEL BRIZOLA, ALCEU COLLARES.

JUDICIAL SYSTEM

The judiciary powers of the State are held by the following tribunals: the Supreme Federal Tribunal, the Federal Tribunal of Appeal, the State Tribunals of Appeals, the Superior Military, the Electoral, and the Labour Tribunals; and by judges of other courts.

The Supreme Federal Court comprises eleven ministers, nominated by the President and approved by the Senate. It judges offences committed by persons exempt from appearing before the normal courts, such as the President, Ministers of State, its own members, judges of other courts, and chiefs of permanent diplomatic missions. It also litigates in disputes between the Union and the states, between the states, or between foreign nations and the Union or the states; disputes as to jurisdiction between justices and/or tribunals of the different states, including

those of the federal district and of the territories; in cases involving the extradition of criminals, in certain special cases involving the principle of *habeas corpus*, and in other cases. It is also empowered to judge ordinary appeals in cases in which the Union is interested as plaintiff or defendant.

The Federal Tribunal of Appeal judges the cases in which the Federal Union has interest.

The Tribunals of Appeals, apart from their normal function as a court of appeal, can sit in judgment on their own members. The number of judges varies according to the judiciary organization of each state.

The organs of the Electoral Tribunal (the Superior Tribunal, the Regional Tribunals, and the electoral judges)

register the names of political parties, fix the date of elections, supervise the listing of voters, and deal with all infractions of the electoral laws. The seven judges of the Superior Electoral Tribunal are chosen: two from the Supreme Federal Tribunal, two from the Tribunal of Appeals, one from the Tribunal of Justice of the Federal District and two by the President.

The functions of the Military Court are no more than the name implies. The Labour Tribunal deals with labour disputes.

Civil offenders usually come before the courts of the separate states and of the Federal District. Each state organizes its own judiciary system on the principles established in the Constitution, and appoints its own judges from those who have passed the State examination in law.

THE PRESS

The most striking feature of the Brazilian press is the relatively small circulation of newspapers in comparison with the size of the population. The newspapers with the largest circulations are *O Dia* (282,000), *Fôlha de São Paulo* (280,000), and *Jornal da Tarde* (250,000). The low circulation is mainly due to high costs resulting from distribution difficulties. In consequence there are no national newspapers. Since 1978 the Government has gradually relaxed press censorship.

In 1979 there were 1,222,869 km. of roads in Brazil, of which 46,227 km. were paved.

Brasília has been a focal point for inter-regional development, and paved roads link the capital with every region of Brazil. The building of completely new roads has taken place predominantly in the north.

INLAND WATERWAYS

River transport plays only a minor part in the movement of goods, although its total rose from 2.7 million tons

in 1975 to 4.4 million tons in 1979. There are three major river systems, the Amazon, Paraná and the São Francisco, only the first of which is easily navigable. Plans have been drawn up to improve the inland waterway system and one plan is to link the Amazon and Upper Paraná to provide a navigable waterway across the centre of the country.

EUGÊNIO MARQUES RODRIGUES FRAZÃO.

SHIPPING

There are 36 deep-water ports in Brazil, five of which, including the port of Santos which handles 30 per cent of all cargo, are privately owned. The largest ports are Santos, Rio de Janeiro, Paranaguá, Recife and Vitória. Tubarão, an iron ore port, and Santana (Amapá) on the Amazon, from where manganese is exported, are among the ports already equipped with automated facilities. Both ports are being expanded, as are Recife and Maceió, the sugar ports, and Ilheus, the cocoa port, on the eastern seaboard. The two main oil terminals, at São Sebastião (São Paulo) and Madre de Jesus (Bahia), are being expanded. Port expansion plans also include the building of terminals at Areia Branca, Paranaguá and Rio Grande. A new iron ore terminal is to be built at Sepetiba and a sugar terminal in São Paulo State. All ports will be deepened to accommodate vessels of over 40,000 tons. Brazil's merchant fleet is the largest in Latin America. In 1977 it comprised 875 vessels (5.61 million tons), of which 151 were oil tankers (98 per cent owned by Petrobrás) and 724 were cargo vessels (51 per cent privately owned and 49 per cent owned by state agencies).

INTRODUCTORY SURVEY

Location, Climate, Capital

Anguilla is the most northerly of the Leeward Islands, lying 113 km. (70 miles) to the north-west of St. Kitts and 8 km. (5 miles) to the north of St. Maarten/St. Martin. Also part of the territory is the island of Sombrero, 48 km. (30 miles) north of Anguilla, and several other uninhabited islands. The climate is sub-tropical, the heat and humidity being tempered by the trade winds. Temperatures average 27°C (80°F) and mean annual rainfall is 914 mm. (36 inches). The capital is The Valley.

Recent History

Anguilla was a British colony from 1650 until 1967. In February 1967 St. Christopher (St. Kitts)-Nevis-Anguilla became a State in Association with the United Kingdom with four other former British colonies in the Eastern Caribbean. Under Associated Statehood the States became independent internally, while the British Government retained responsibility for external affairs and defence. Three months later the Anguillans, under the leadership of Ronald Webster (a local businessman), repudiated government from St. Kitts. After attempts to repair the breach between St. Kitts and Anguilla had failed, British security forces were landed in Anguilla in March 1969 to install a British Commissioner. In July 1971 the Anguilla Act was passed, one clause of which provided that, should the Associated State of St. Kitts-Nevis-Anguilla initiate legislative steps to terminate the status of association, the Monarch in Council might by order direct that Anguilla should be formally separated from that State. In August 1971 the Anguilla (Administration) Order in Council, made under the Anguilla Act, provided for the direct administration of the Island, and in February 1976 a new Constitution was established through the Anguilla (Constitution) Order 1976. In anticipation of the forthcoming independence of St. Kitts-Nevis, Anguilla formally separated from the state, attaining *de jure* status as a British Dependent Territory by the Anguilla Act of December 1980. Constitutional amendments effected in 1981 permitted greater autonomy within this arrangement.

Elections to the Legislative Assembly were held in March 1976, and Ronald Webster was appointed Chief Minister. Following his defeat in a motion of confidence, he was replaced in February 1977 by Emile Gumbs. Ronald Webster was convincingly returned to power at the head of the Anguilla United Party in general elections in May 1980. The dismissal of the Minister of Agriculture in May 1981 led to serious divisions within the Government, and the resignation in sympathy of another Minister forced the collapse of Webster's administration and the calling of fresh general elections. Webster subsequently formed a new political party, the Anguilla People's Party, which won elections held in June, gaining five of the seven seats in the House of Assembly.

Economic Affairs

Livestock raising, salt production, boat building and fishing play a major part in the economy. In recent years efforts have been made to diversify the economy and encourage the development of tourism. A major problem is the high level of unemployment, which in 1977 was 40 per cent. Workers' remittances from abroad form a large part of the island's income.

THE CONSTITUTION

The constitution established in 1976 accorded Anguilla the status of a British Dependent Territory. Amendments introduced in 1981 provided for greater autonomy under this status. The Monarch is represented by a Governor, who presides over the Executive Council and the House of Assembly, and is responsible for defence, external affairs, internal security including the police, the public service, the judiciary and the audit. On matters relating to internal security (including the police), the public service and the appointment of an acting Governor, he is required to consult the Chief Minister. The Executive Council consists of the Chief Minister and not more than three other ministers (appointed by the Governor from the elected members of the Legislative Assembly) and two *ex officio* members (the Attorney-General and the Permanent Secretary for Finance). The ministers have responsibility for all government business except finance, legal affairs and those matters reserved to the Governor. The House of Assembly is elected for five years by universal adult suffrage and consists of seven elected members, three *ex officio* members (the Secretary to the Executive Council, the Attorney-General and the Financial Secretary) and two members nominated by the Governor after consultation with the Chief Minister. There is provision for a Speaker.

The Governor may order the dissolution of the House of Assembly if a resolution of "no confidence" is passed in the Government and elections must be held within two months of the dissolution.

The period of residence required to qualify for "belonger" status is 15 years. Persons born in St. Kitts and Nevis who were domiciled and ordinarily resident in Anguilla before the date of formal separation are regarded as Anguillians.

BERMUDA

INTRODUCTORY SURVEY

Location, Climate, Capital

The Bermudas or Somers Islands are an isolated group of small Atlantic islands about 570 miles off the coast of South Carolina, U.S.A. They have a mild climate. The capital is Hamilton.

Recent History

The Constitution introduced in June 1968 provided for internal self-government, although the British Government retained responsibility in certain areas. Various amendments were made in 1973, the most important being the establishment of the Governor's Council to deal with the Governor's powers over external affairs, defence, internal security and the police. In 1974 the Government Leader was restyled Premier and the Executive Council became the Cabinet. In the general election of May 1976 the United Bermuda Party (UBP), whose policies are based on racial co-operation, was returned to power with a decreased majority.

Although Bermuda is considered to be a model of good race relations, shooting incidents in 1972 and 1973, which resulted in the deaths of five people (including the Commissioner of Police and the Governor), showed underlying tensions. The execution in December 1977 of two convicted murderers (including the Governor's assassin) led to a further outbreak of rioting and arson; a state of emergency was declared, and British troops were flown in from Britain and Belize.

In February 1978 a Royal Commission was established to investigate the causes of this racial violence. In August 1978 the Commission published a report suggesting that the constituency boundaries should be redrawn to improve the position of the mainly black opposition Progressive Labour Party (PLP), which had won 46 per cent of the vote in the 1976 general election. Constitutional amendments introduced in 1979 included provision for closer consultation between the Premier and the Leader of the Opposition on the appointment of members of the Public Service Commission and the Boundaries Commission, and on the appointment of the Chief Justice. The United Bermuda Party won a general election in December 1980 but with a smaller majority than before.

Government

Bermuda is a Crown Colony with a wide measure of internal self-government. The Queen is represented by an

appointed Governor, responsible for external affairs, defence and internal security. The bicameral legislature comprises the Senate (11 nominated members) and the House of Assembly, with 40 members elected for five years by universal adult suffrage. The Governor appoints the majority leader in the House as Premier and the latter nominates other Ministers. The Cabinet is responsible to the legislature.

Defence

The local defence force is the Bermuda Regiment with a strength of some 650 men and women in 1980.

Economic Affairs

The principal economic activity and leading source of foreign exchange is the tourist industry. Bermuda received 609,556 tourists in 1980, the highest figure ever recorded. Between March 1979 and March 1980 earnings from tourism were an estimated U.S. \$245 million. There is also a significant commercial sector where exempted companies enjoy a freedom from most local taxes and constitute an important offshore financial centre, most notably in the field of insurance (900 companies in 1980). Annual foreign exchange earnings associated with this sector approximate U.S. \$150 million.

The chief source of government revenue is customs duties, which in 1980 accounted for about 43 per cent of total revenue. There is no income tax but there are payroll taxes, a land tax, a minor tax on the value of estates and various tourist-related taxes.

Local industries include the manufacture of paint and pharmaceuticals, printing and ship repairing.

Transport and Communications

There are good roads and bus and ferry services, while international lines provide regular sea and air services.

Social Welfare

A wide range of welfare work is undertaken by the Department of Health and the Department of Social Services, as well as by a number of voluntary organizations.

Almost all employees are registered under the Government's contributory pension scheme, and the 1970 Hospital Insurance Act made hospital insurance available for all. It also provided for free hospital care for children and subsidized rates for the elderly. There is one general hos-

pital with 237 beds, and a hospital with 150 beds for the mentally ill.

Education

There is free compulsory education between the ages of 5 and 16, and a number of scholarships are awarded for higher education and teacher training. The Bermuda College was founded in 1972 and accepts students over the age of 16. Extramural degree courses are available through Queen's University, Canada, and Indiana and Maryland Universities, U.S.A.

Tourism

The great attractions of the islands are the climate, scenery, and facilities for outdoor entertainment of all types.

Public Holidays

1983: January 1st (New Year's Day).

Weights and Measures

The metric system has been widely adopted but imperial and U.S. weights and measures are both used in certain fields.

THE CONSTITUTION

Under a Constitution introduced on June 8th, 1968, and amended in 1973 and 1979, there are provisions relating to the protection of fundamental rights and freedoms of the individual; the powers and duties of the Governor; the composition, powers and procedure of the Legislature; the Cabinet; the Judiciary; the Public Service and Finance.

The Queen is represented by the Governor, who retains responsibility for external affairs, defence, internal security and the Police.

The Legislature consists of Her Majesty, the Senate and the House of Assembly. Three members of the Senate are appointed at the Governor's discretion, five on the advice of the Government leader and three on the advice of the Opposition leader. The Senate elects a President and Vice-President. The House of Assembly, consisting of forty members elected under universal adult franchise from twenty constituencies, elects a Speaker and a Deputy Speaker, and sits for a five-year term.

The Cabinet consists of the Premier and at least six other members of the Legislature. The Governor appoints the majority leader in the House of Assembly as Premier, who in turn nominates the other members of the Cabinet. They are assigned responsibilities for government departments and other business and, in some cases, are assisted by Permanent Cabinet Secretaries.

The Cabinet is presided over by the Premier. The Governor's Council enables the Governor to consult with the Premier and two other members of the Cabinet nominated by the Premier on matters for which the Governor has responsibility. The Secretary to the Cabinet, who heads the public service, acts as Secretary to the Governor's Council.

Voters must be British subjects aged 21 years or over, and, if not possessing Bermudian status, must have been registered as electors on May 1st, 1976. Candidates for

election must qualify as electors, and must possess Bermudian status.

BRITISH ANTARCTIC TERRITORY

The British Antarctic Territory lies within the Antarctic Treaty Area (i.e. south of latitude 60° S.). The Territory consists of all lands and islands south of latitude 60° S., between longitudes 20° and 80° W., and includes the South Orkney Islands, the South Shetlands and the Antarctic Peninsula (Graham Land).

Area: 5,425,000 sq. km. (2,095,000 sq. miles), of which land covers about 1,710,000 sq. km. (660,000 sq. miles).

Population: There is no permanent population.

High Commissioner: R. M. HUNT, C.M.G. (Stanley, Falkland Islands).

Director of the British Antarctic Survey: Dr. RICHARD M. LAWS, British Antarctic Survey, Madingley Rd., Cambridge, CB3 0ET, England.

BRITISH INDIAN OCEAN TERRITORY (BIOT)

The Territory was formed in November 1965, through the amalgamation of the former Seychelles islands of Aldabra, Desroches and Farquhar with the Chagos Archipelago, a group of islands 2,300 km. (1,440 miles) north-east of, and previously administered by, Mauritius. Aldabra, Desroches and Farquhar were returned to Seychelles when that country was granted independence in June 1976. Since then the Territory has comprised only the Chagos Archipelago, including the coral atoll Diego Garcia, and a surrounding area of some 54,400 sq. km. (21,000 square miles) of ocean.

BIOT was established to meet U.K. and U.S. defence requirements in the Indian Ocean. Britain has undertaken to return it to Mauritius when it is no longer needed for this purpose. However, Mauritius has campaigned for the immediate return of the Territory, and has received support from the Organization of African Unity and India. The original inhabitants of the islands were evacuated to Mauritius between 1969 and 1971, prior to the construction of the military base. Mauritius has supported the islanders in a long-running dispute with Britain over compensation for those displaced, who may number up to 3,500.

The Anglo-U.S. agreement of 1966 (Command Paper 3231) provides for the Territory to be used by both countries over an initial period of 50 years. All U.S.

activities in the Territory take place in consultation with the British Government. Originally the U.S. military presence was limited to a communications facility. However, in 1971 it was decided that, as a response to the expansion of Soviet military presence in the Indian Ocean, a naval support base should be developed on Diego Garcia. This plan was expanded following the Soviet invasion of Afghanistan in December 1979, and new landing and anchorage facilities are being built to equip the island as a vital link in a Rapid Deployment Force with capability to act in a Middle East crisis.

Civil administration of the Territory is the responsibility of a non-resident Commissioner in the Foreign and Commonwealth Office in London, represented on the island by a Royal Naval Commander and a small British naval team.

Land Area: about 60 sq. km. (23 square miles).

Population: There are no permanent inhabitants.

Currency: The pound sterling and the U.S. dollar are both used.

Commissioner: J. A. ROBSON, Head of East Africa Dept., Foreign and Commonwealth Office, London.

Administrator: P. A. RAFFERTY, East Africa Dept., Foreign and Commonwealth Office, London.

THE BRITISH VIRGIN ISLANDS

Location, Climate, Capital

The British Virgin Islands consist of more than 40 islands, of which some 16 are inhabited, lying at the northern end of the Leeward Islands, about 100 km. to the east of Puerto Rico and adjoining the United States Virgin Islands. The climate is sub-tropical but extremes of heat are relieved by the trade winds. The capital, Road Town, stands on the island of Tortola.

Economic Affairs

The bulk of the islands' export trade is in fresh fish, gravel and sand, and, to a lesser extent, fruit and livestock. Tourism is the major industry, contributing approximately 45 per cent of national income. Efforts are being made to expand fishing and a modest offshore financial section has developed.

A land reclamation and tourism development scheme involving 70 acres at Wickham's Cay, Road Town, is in progress and a large holiday development at Prospect Reef near Road Town was completed in 1977.

THE CONSTITUTION

A new constitution came into effect in April 1967 and was amended with effect from June 1977. Under its terms, the Governor is responsible for defence and internal security, external affairs, terms and conditions of service of public officers, the administration of the Courts and possesses reserved legislative powers in respect of legislation necessary in the interests of his special responsibilities; there is an Executive Council with the Governor as Chairman, one *ex officio* member (the Attorney-General), the Chief Minister (appointed by the Governor from among the elected members of the Legislative Council) who has responsibility for finance, and two other ministers (appointed by the Governor on the advice of the Chief Minister); and a Legislative Council consisting of a Speaker, chosen from outside the Council, one *ex officio* member (the Attorney-General), one nominated member appointed by the Governor on the Chief Minister's advice, and nine elected members to be returned from nine one-member electoral districts.

The division of the islands into nine electoral districts instead of seven came into effect at the 1979 general election. The voting age was lowered from 21 years to 18 years.

CAYMAN ISLANDS

Location, Climate, Capital

The Cayman Islands lie about 290 km. (180 miles) north-west of Jamaica and consist of three main islands: Grand Cayman, Little Cayman and Cayman Brac. The climate is mild, being tempered by the trade winds. The capital is George Town.

Recent History and Economic Affairs

A dependency of Jamaica until 1959, the Caymans then became a separate dependent territory of the United Kingdom.

The bases of the economy are offshore financial industry and tourism. In the absence of any form of direct taxation the islands have become an important offshore banking

centre and such industrial and insurance activities are expanding. In 1980 there were 324 banks and trust companies and 12,129 foreign companies registered in the Cayman Islands.

Tourism infrastructure has been substantially developed and by 1980 there had been a 220 per cent growth in tourist arrivals since 1973. A large proportion of the visitors are cruise passengers.

Until 1970 fishing activities generated most of the island's income but these have since declined in importance. A tropical fish farm now provides the majority of fish exports. Turtle farming is being developed to replace the traditional pursuit of turtle fishing, which has virtually died out. However, exports of turtle products have

suffered as a result of the recent import ban imposed by the U.S.A.

An oil transshipment terminal on Little Cayman increased throughput from 48.2 million barrels in 1979 to 74.3 million in 1980 and the construction of an oil refinery on the island has been proposed.

Public Holidays

TRANSPORT AND TOURISM

ROADS

There are some 177 km. (110 miles) of motorable roads, of which 121 km. (75 miles) are tarmac. There are approximately 5,607 motor vehicles (1980).

SHIPPING

George Town is the principal port and a \$4 million port facility was opened in July 1977. There are no passenger vessels serving the Islands but small motor vessels ply between the Islands, Florida and Jamaica.

CIVIL AVIATION

There are two airports in the territory and the international airport at George Town can handle jet aircraft.

Cayman Airways Ltd.: P.O.B. 1101, George Town, Grand Cayman; f. 1968; operates to Miami (Florida) and Kingston (Jamaica) using BAC 1-11 aircraft; Gen. Man. W. NORMAN BODDEN.

Services are also provided by Republic Airlines (U.S.A.), Air Jamaica and various inter-island charter companies.

TOURISM

Tourism is an expanding industry in the Cayman Islands; in 1980 there were 120,241 overnight and 60,689 cruise visitors; revenue was about C.I. \$61.1 million.

FALKLAND ISLANDS

Location, Climate, Language, Capital

The Falkland Islands are situated in the South Atlantic Ocean, 770 km. north-east of Cape Horn. There are two main islands and some 200 smaller ones. The climate is temperate, characterized by strong prevailing westerly winds and a mean annual temperature of 6°C (42°F). The language is English. The capital is Stanley on East Falkland Island.

Recent History

Argentina claims sovereignty over the islands (which it calls *Islas Malvinas*) on the grounds that it inherited the territory on the break-up of the Spanish Empire and the independence of Argentina. The issue of sovereignty reappeared in the 1960s and 1970s, causing a near rupture of Argentine-British diplomatic relations, and the British Government has said that possession of the islands is not negotiable. The desire for a solution is increased by the rich fishing and the possible petroleum deposits in the islands' waters. In 1981 the British Government issued a warning to foreign companies considering responding to the invitation of the Argentina Petroleum Corporation to prospect in the Magallanes Este Block, an area of disputed sovereignty.

There was, however, some weakening of British protection for the islands in 1981. In September it was announced that the British Naval Antarctic Patrol would be discontinued in 1982, and the British Nationality Act passed in October denied islanders full British citizenship, although an unofficial guarantee was given that islanders would be able to return to the United Kingdom.

Elections to the Legislative Council were held in September and October 1981.

Government

Administration is conducted by an appointed Governor, who is the personal representative of the Crown, aided by an Executive Council of two *ex officio* members, two unofficial members appointed by the Governor and two members elected by the Legislative Council; and a Legislative Council composed of two *ex officio* members and six elected members. Voting is by universal adult suffrage.

Defence

Service in the Falkland Islands Defence Force is voluntary. A garrison of Royal Marines is stationed in the Colony and helps train local volunteers.

Economic Affairs

The economy is entirely dependent on the production of wool for export. A comprehensive economic survey on the islands, published in mid-1976, drew attention to the potential for exploitation of fish, especially krill and blue whiting, kelp and possibly petroleum, and made recommendations for various areas of development. Work on implementing many of the long-term and short-term recommendations began in 1978, notably feasibility studies in horticultural expansion, tourism, investigations into commercial fishing and fish drying, tanning of hides and skins, and the development of petroleum exploitation, as well as improving internal communications and educational and medical facilities.

Transport

LADE, the transport section of the Argentine air force, provides the only regular twice-weekly air service to the islands, from Comodoro Rivadavia to Stanley. The only regular sea communication is a ship operated by the Falkland Islands Company which calls four times a year. An airfield, financed by the United Kingdom, was completed in 1978 and officially opened in May 1979.

Social Welfare

Old age pensions and child allowances are provided and charitable relief is administered by the Medical Department. There is a modern well-equipped hospital in Stanley.

Education

Education is compulsory and free. In 1980 there were two government schools in Stanley, with 159 pupils. Eleven travelling and other teachers, with 153 pupils were maintained by the Government in country districts.

Tourism

Abundant wildlife and trout fishing constitute the main tourist attractions. In addition to air services from Argentina, several cruise ships visit the Falkland Islands during the southern summer. In 1980, 1,212 tourists visited the Islands by air and about 2,800 by sea.

Public Holidays

1982: April 9th (Good Friday), April 21st (H.M. the Queen's Birthday), October 4th (Bank Holiday), December 8th (Anniversary of the Battle of the Falkland Islands), December 25th-29th (Christmas).

1983: January 1st (New Year's Day).

Weights and Measures

Both the imperial and metric systems are in general use.

STATISTICS

Area: approx. 12,173 sq. km. (4,700 sq. miles); East Falkland 6,760 sq. km. (2,610 sq. miles), West Falkland 5,413 sq. km. (2,090 sq. miles).

Population (Dec. 1980): 1,813, Stanley (capital) 1,050.

Livestock (1980): sheep 663,367, cattle 8,056, horses 2,459.

Finance: 100 new pence (pennies) = 1 Falkland Islands pound (F.I.£). Coins: $\frac{1}{2}$, 1, 2, 5 and 10 pence. Notes: 50 pence; 1, 5 and 10 pounds. Exchange rates (October 1981): £1 sterling = F.I. £1.00, U.S. \$1 = 53.5 pence; F.I. £100 = £100.00 sterling = \$186.90.

Budget (1981/82 est.): Revenue £2,478,311, Expenditure £2,411,004.

Development Plan Expenditure: (1981/82) £485,191 from Colony Funds to be met from U.K. Development Aid of £533,000.

External Trade: Imports (1980) £2,590,321, Exports (1980) £2,661,731 (nearly all wool). Trade is mainly with the United Kingdom.

Shipping (1980): Tonnage entered 363,587, total 312 ships; cleared 356,684, total 305 ships.

THE CONSTITUTION

The present Constitution came into force on January 1st, 1949. The Territory is administered by a Governor,

BRITISH DEPENDENT TERRITORIES

UNITED FREE CHURCH

Minister: (vacant).

Also represented in the Islands are the Baha'i Faith, Jehovah's Witnesses, Lutherans, Seventh Day Adventists and Evangelists.

PRESS

There are no newspapers, other than two small monthly publications. The Government publishes *The Gazette*.

RADIO

There is a government-operated broadcasting station at Stanley. The number of licence-holders in 1980 was 553. The Government also operates a wired broadcasting service in Stanley (148 subscribers in 1980) and a wireless

station on West Falkland, to which most of the farms are linked by telephone. East Falkland has similar telephone facilities. The farm settlements are linked to Stanley by radio telephone. Cable and Wireless Ltd. control the external telecommunications of the colony.

Falkland Island Broadcasting Service: Broadcasting Studios, Stanley; broadcasts in English; Broadcasting Officer P. WATTS; Sec. Mrs. CLAUDETTE MOZLEY.

FINANCE

BANKS

Government Savings Bank: Stanley; deposits £2,683,303 (June 30th, 1981).

Lloyds Bank Ltd. has an agency in Stanley.

INSURANCE

The British Commercial Union, Royal Insurance and Norman Tremellen companies maintain agencies in Stanley.

Stanley Co-operative Society: Stanley; f. 1952; open to all members of the public; Man. Mrs. K. BERNTSEN.

TRANSPORT

ROADS

There are 21 km. of made-up road in and around Stanley. Elsewhere tracks link the settlements which are passable by land rover or motor cycle in all but the worst weather. Work has begun on an all-weather road from Stanley to Darwin.

SHIPPING AND CIVIL AVIATION

There is communication between the Islands and the mainland of South America by air. LADE, the Argentine air force airline, operates a twice-weekly air service from Comodoro Rivadavia in southern Argentina to the new Stanley airport, built by British Aid Funds. The Fokker F-27 and F-28 aircraft carry passengers, mail and freight. There is a ship on charter to the Falkland Islands Company which makes the round trip to the United Kingdom four or five times a year, carrying mail and cargo. In 1974 the transport service of the Argentine navy began a passenger and freight service between the Argentine mainland and Stanley.

Falkland Islands Government Air Service: f. 1948; maintains Beaver float-plane services between the settlements and Stanley; in 1980 an Islander "land plane" was brought into service for internal flights.

FALKLAND ISLANDS DEPENDENCIES

The Falkland Islands Dependencies consist of South Georgia and the South Sandwich Islands.

STATISTICS

Area: South Georgia 3,592 sq. km. (1,387 sq. miles); South Sandwich Islands 311 sq. km. (120 sq. miles).

Population: Twenty-two scientists and support personnel man the British Antarctic Survey station at King Edward Point, South Georgia. The South Sandwich

Islands were uninhabited until 1976, when Argentine personnel occupied the island of Thule. They have remained despite protests from the British Government.

Governor: R. M. HUNT, C.M.G. (Stanley, Falkland Islands)

HONG KONG

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Capital

The Colony of Hong Kong lies off the south coast of the People's Republic of China and consists of the island of Hong Kong, Stonecutters Island, the Kowloon Peninsula and the New Territories, which are partly on the mainland. The climate is sunny and dry in winter, and hot and humid in summer. The official language is English, but Cantonese is universally spoken and Mandarin is widely understood. The main religion is Buddhism; Confucianism, Islam, Hinduism and Daoism are also practised and there are more than a quarter of a million Christians. The capital is Victoria.

History

Hong Kong Island was ceded to Britain under the terms of the Treaty of Nanking in 1842. The Kowloon Peninsula was acquired in 1860. The New Territories were leased from China in 1898 for a period of 99 years. However, since 1949 China has asserted that the above treaties are no longer valid.

Hong Kong was temporarily occupied by Japan during the Second World War, but British government was re-established in 1945.

More than 460,000 immigrants arrived from mainland China between 1975 and 1980, many of them illegally. In 1980 the massive influx of refugees (62,000 in the first nine months of the year) forced the Government to introduce tough measures in October to stem the flow, including the use of extra British troops. Anxiety has been growing in Hong Kong about the future of the colony when the lease of the New Territories expires in 1997. The 1981 British Nationality Act caused alarm in Hong Kong, where the reclassification of 2.6 million citizens was seen as an attempt to downgrade their status and as a step in the direction of an eventual handover of the colony to China.

Government

The Colony is administered by the Governor, the Executive Council of five *ex officio* members and eleven others and the Legislative Council consisting of four of the *ex officio* Executive Council members, 17 other official members and 26 unofficial members.

Defence

Defence forces comprise five Royal Navy patrol craft, one U.K. and three Gurkha Infantry battalions, one Gurkha engineer squadron and one helicopter squadron.

In 1980 Britain agreed to send another battalion to help stem the flow of illegal immigrants. Additionally, there are auxiliary defence units. Defence expenditure for 1980/81 was estimated at HK \$867 million.

Economic Affairs

Hong Kong is a free trade area and one of the principal entrepôt ports of the world. Hong Kong's prosperity depends on exports, and manufactured goods, particularly textiles and electrical goods, provide three-quarters of total export earnings. The textile and clothing industry employed 41 per cent of the work force in 1980 and accounted for 41 per cent of domestic exports. However, these products are subject to increasingly restrictive quotas in importing countries, and a policy of diversification has been adopted. Commerce plays an important part in the economy and Hong Kong banking and mercantile houses have branches all over the Far East. In 1978 the Government lifted a 12-year moratorium on new banks in Hong Kong, but reimposed a "temporary" ban on the granting of new banking licences from August 1979.

In 1974 and 1975 there was effectively no growth in the Hong Kong economy due to prolonged recession in the major industrial nations, particularly the U.S.A. and the EEC countries which together account for over 60 per cent of the Colony's exports. However, since 1976 the economy has made a rapid recovery, achieving an increase of 16.9 per cent in G.D.P. in that year. In 1979 an increase in total exports of 40 per cent contributed to a G.D.P. growth rate of 11.5 per cent. In 1980 the economy continued to grow rapidly, in spite of unfavourable economic conditions in the U.S.A. and the United Kingdom, two of Hong Kong's major markets. Gross Domestic Product rose by 9 per cent, partly as a result of a rise of 22 per cent in the value of exports. However, the greater increase (30 per cent) in the value of imports in 1980 led to a rise in Hong Kong's visible trade deficit to HK\$13,480 million, nearly four times the 1977 figure. The record 50 per cent increase in re-exports in 1980, largely due to the growing entrepôt trade with the People's Republic of China, is an indication of the importance of Hong Kong to China. In 1981 inflation was officially running at 14 per cent, but the real figure may be nearer 18 per cent.

Transport

Transport facilities include buses, trams and ferries, and a railway runs north from Kowloon to the Chinese

border. The initial stage of an underground railway system (the Mass Transit Railway) came into operation in 1979 and it is thought that construction will continue until 1986.

Social Welfare

Social welfare is administered by the Social Welfare Department which initiated a scheme of five-year development programmes in 1973. It is not a comprehensive system: for instance, there is no unemployment benefit. Resettlement of refugees from mainland China is also undertaken by the Government. In 1979 there were 20,606 hospital beds in Hong Kong.

Education

Since 1965, with the doubling of free places in primary schools and the introduction of a system of subsidized places in primary schools, every child is ensured a primary education. There are five types of secondary school: Anglo-Chinese grammar schools, Chinese middle schools, secondary technical schools, secondary modern schools and pre-vocational schools. There are four government-run teacher-training colleges and five government-funded technical institutes. The two universities have a combined enrolment of over 8,800 students.

Tourism

Hong Kong is one of the main tourist centres of the Far East, and tourism is the second largest source of foreign

exchange. Over 2.3 million people visited Hong Kong in 1980.

Public Holidays

1982: April 5th (for Ching Ming), April 9th-12th (Easter), April 21st (Queen's Birthday), June 25th (Tuen Ng, Dragon Boat Festival), July 1st (first weekday in July), August 2nd (first Monday in August), August 30th (Liberation Day), October 2nd (the day following Chinese Mid-Autumn Festival), October 25th (Chung Yeung Festival), December 25th (Christmas Day), December 27th (first weekday after Christmas Day).

1983: January 1st (first weekday in January), January 25th-27th* (Chinese New Year).

* From the first to the third day of the first moon of the lunar calendar.

Weights and Measures

The metric system is in force. Chinese units include tsün (37.147 mm.), chek or ch'ih (37.147 cm.); kan or catty (604.8 grammes), tam or picul (60.479 kg.).

Currency and Exchange Rates:

100 cents = 1 Hong Kong dollar (HK \$).

Exchange rates (October 1981):

£1 sterling = HK \$11.13;

U.S. \$1 = HK \$5.995.

HK \$100=£8.98=U.S. \$16.68.

Note: From September 1949 to November 1967 the Hong Kong dollar was officially valued at 1s. 3d. sterling (£1=HK \$16.00) or 17.5 U.S. cents (U.S. \$1=HK \$5.714). On November 20th, 1967, the Hong Kong dollar was devalued, in line with sterling, to 15 U.S. cents (U.S. \$1=HK \$6.667) but, three days later, it was revalued at 1s. 4½d. or 6.875p (£1=HK \$14.545), worth 16.5 U.S. cents (U.S. \$1=HK \$6.061). In August 1971 the U.S. dollar was "floated" but the Hong Kong dollar's relationship to sterling remained unchanged and a rate of U.S. \$1=HK \$5.582 (HK \$1=17.91 U.S. cents) came into operation in December 1971. After sterling was allowed to "float" in June 1972, the Hong Kong dollar was devalued in July 1972, when the central exchange rate became U.S. \$1=HK \$5.65 (HK \$1=17.70 U.S. cents). This was retained until February 1973, after which the central rate was U.S. \$1=HK \$5.085 (HK \$1=19.666 U.S. cents) until November 1974, since when the Hong Kong dollar has been "floating". For calculating the value of foreign trade transactions, the average value of the Hong Kong dollar in U.S. cents was: 19.50 in 1973, 19.84 in 1974; 20.18 in 1975; 20.52 in 1976; 21.47 in 1977; 21.33 in 1978; 19.96 in 1979, 20.07 in 1980.

THE CONSTITUTION

The Government of Hong Kong, which consists of the Governor, the Executive Council and the Legislative Council, is constituted under the authority of Letters Patent and Standing Instructions.

The Executive Council is consulted by the Governor on all important administrative questions. In addition to five *ex officio* members, there are nine unofficial members and one nominated official member.

The Legislative Council, which advises on and approves the enactment of the Colony's laws and approves all expenditure from public funds, presently consists of the five *ex officio* members who sit on the Executive Council, 17 other official members and 26 unofficial members. A finance committee comprising all the unofficial members meets in private to scrutinize all government expenditure proposals; two subcommittees deal with public works capital expenditure, and with government staff increases.

THE GOVERNMENT

Governor: Sir CRAWFORD MURRAY MACLEHOSE, G.B.E., K.C.M.G., K.C.V.O. (until April 1982; then Sir EDWARD YOUDE, K.C.M.G.).

LEGISLATIVE COUNCIL

President: The Governor.

Ex Officio Members: The Chief Secretary, the Attorney General, the Secretary for Home Affairs, the Financial Secretary.

There are also 17 nominated official members and 27 unofficial members. Provision exists for a maximum membership of 54, comprising 27 nominated official member and 27 unofficial members.

POLITICAL ORGANIZATIONS

The Reform Club and Civic Association, which worked in alliance between 1961 and 1964, stand for moderate constitutional changes in Hong Kong's Government.

The Communists and Kuomintang (Nationalist of Party China, based in Taiwan) also maintain organizations.

JUDICIAL SYSTEM

The Supreme Court consists of a Court of Appeal and of a High Court.

The High Court of Justice has unlimited jurisdiction in civil and criminal cases, the District Court having limited jurisdiction. Appeals from these courts lie to the Court of Appeal, presided over by the Chief Justice or a Vice-President of the Court of Appeal with one or two Justices of Appeal. Appeals from Magistrates' Courts are heard by a High Court judge.

MONTSERRAT

INTRODUCTION

Montserrat is one of the Leeward Islands in the West Indies. It lies about 55 km. (35 miles) north of Basse Terre, Guadeloupe. The climate is generally warm but the island is fanned by sea breezes for most of the year. The average annual rainfall is about 1,500 mm. (60 inches), though it is rainier in the central and western areas. The capital is Plymouth.

In 1967 Montserrat elected to remain a British colony rather than become one of the West Indies Associated States. Britain is the most important source of economic aid and imports, although its share is declining. The public sector investment programme for 1980-83 amounted to EC\$35.9 million, almost all financed from outside.

About one-quarter of the land is under cultivation, the principal crops being cotton, limes, potatoes, tomatoes and hot peppers. A further one-half is under-utilized agricultural land and the Government is pursuing a resettlement programme for small-scale farmers. Although there is only a limited area suitable for arable farming, the prospects for livestock are good and in recent years exports of cattle have contributed a significant part to Montserrat's balance of trade. An area of 5,000 acres is covered by forests. Trial plots of pine, eucalyptus and mahogany have been established. Particularly heavy rainfall caused extensive flooding of agricultural land in 1981.

Tourism contributed 13 per cent of G.D.P. in 1979, or EC\$4.4 million. The Government is attempting to attract financial and industrial enterprise to the island to lessen the economy's reliance on tourism and agriculture. Light industry is expanding on the island's industrial estate and manufacturing (mainly of plastic bags and electronic appliances) accounted for 74 per cent of the total value of exports in 1980.

Montserrat experienced a growth in G.D.P. of 5 per cent in 1980. However, the island had a trade deficit of EC\$42 million.

TOURISM

Hotel accommodation is available on Grand Turk, South Caicos, North Caicos, Pine Cay and Providenciales, with a total of 356 beds. A 750-bed village is to be built on Providenciales, in spite of criticism of the scheme for its possible social and ecological effects. Guest house accommodation is available on Salt Cay and a hotel was under construction in 1981. In 1980, 11,887 tourists visited the islands.

BRUNEI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Brunei lies on the north-west coast of the island of Kalimantan (Borneo). It is surrounded on the landward side by Sarawak, one of the two eastern states of Malaysia. The climate is tropical, characterized by consistent temperature and humidity. Annual rainfall ranges from about 110 inches (2,800 mm.) in lowland areas to over 150 inches (3,800 mm.) in the interior. Temperatures are high, the annual extreme range being 23°C (73°F) to 35.8°C (96.4°F). The principal language is Malay though Chinese is also spoken and English widely used. The Malay population (50 per cent) is Muslim. Most Chinese are Buddhist, Confucian or Daoist. Europeans and Eurasians are largely Christian. The flag (proportions two by one) comprises two diagonal stripes of black and white on a yellow background, with the state emblem centred in red. The capital is Bandar Seri Begawan, formerly called Brunei Town.

Recent History

In 1888, when North Borneo became a British protectorate, Brunei became a British-protected state. Between 1906 and 1941, a form of government emerged which included a state council. The first written constitution was adopted in September 1959.

A revolt led by A. M. Azahari and the Brunei People's Party broke out in December 1962, prompted by dissatisfaction with the prospect of Brunei's joining the proposed Malaysian Federation. The disorders were suppressed, the People's Party banned and Azahari was given asylum in Malaya. In the event, in 1963 the Sultan decided against joining the Federation. From 1962 he ruled by decree, and the state of emergency declared in that year has remained in force. Sir Omar Ali Saifuddin, who had been Sultan since 1950, abdicated in October 1967 in favour of his son, Hassanal Bolkiah, then aged 21.

In December 1975 the UN General Assembly passed a resolution calling for British withdrawal from Brunei, the return of political exiles and for elections to be held. However, the Brunei Government remained reluctant to renegotiate the terms of its agreement with the United Kingdom. Talks held in June 1978, following assurances by Malaysia and Indonesia that they would respect Brunei's sovereignty, resulted in an agreement (signed in January 1979) that Brunei would become fully independent on January 1st, 1984. It was also agreed that the battalion of Gurkhas, stationed in Brunei since 1971, would remain in Brunei until September 1983.

Government

Under an agreement signed in November 1971, Brunei was granted full internal self-government and ceased to be a protected state. The United Kingdom continues to conduct Brunei's external relations and defence, although this arrangement is due to end in 1983. Internal security is the responsibility of the Brunei Government. The constitution confers supreme executive authority in the State on the Sultan. He is assisted and advised by five Constitutional

Councils: the Religious Council, the Privy Council, the Council of Ministers, the Legislative Council and the Council of Succession. Since the rebellion of 1962 certain provisions of the constitution have been suspended and the Sultan has ruled by decree.

Defence

Under the 1959 Constitution as amended in November 1971, Brunei and the United Kingdom share responsibility for the State's defence and security. Military service is voluntary. The Royal Brunei Malay Regiment numbered 2,850 men in 1980, all services forming part of the army. Paramilitary forces comprised 1,750 Royal Brunei Police. Defence expenditure in 1981 was estimated at B\$288 million. The British Government is represented on the Brunei Defence Council and provides some officers for the Royal Brunei Malay Regiment. A Gurkha battalion of the British army is stationed in Brunei.

Economic Affairs

Brunei's economy depends almost entirely on its petroleum and natural gas resources. Crude petroleum is produced onshore and offshore at an average daily rate of 250,000 barrels. Export earnings from crude petroleum, B\$762 million in 1973, rose to B\$3,936 million in 1979. Earnings from natural gas, B\$46.5 million in 1973, increased to B\$2,500 million in 1980. Sales of oil and natural gas are largely responsible for Brunei's favourable trade balance. In 1980 there was a surplus of B\$8,622 million.

Development projects to diversify the economy and improve the infrastructure, financed by petroleum revenues, are hampered to some extent by lack of skilled labour and a population of only 213,000 (1979). Projects already completed include an international airport, a deep-water port at Muara and a natural gas liquefaction plant, the largest in the world, at Lumut. G.D.P. more than doubled in the five years before 1979, when it reached an estimated B\$5,795 million. One of the fastest growing sectors is manufacturing, which grew by 55 per cent in 1975. Highly favourable tax concessions were introduced in 1975 with the aim of encouraging investment in new industries. The areas most suitable for industrial development are timber, paper, fertilizers, petrochemicals and glass. Some B\$215 million of the 1981 budget was allocated to the Development Fund. The 1980-84 Development Plan is designed to achieve a high level of employment, to diversify the economy through the development of agriculture, forestry and fisheries, and aims at a minimum annual growth rate of 6 per cent. The plan involves total expenditure of B\$2,000 million.

With the expansion of the petroleum and gas industries, the relative importance of agriculture has declined. Much potential agricultural land lies undeveloped and the 1975-79 Five-Year Plan aimed to achieve self-sufficiency in those crops, such as rice, which Brunei can produce itself. In 1980 Brunei produced about half its total con-

sumption of rice, or 7,000 tons. In 1980 a B\$20 million prawn and eel farm was founded.

Transport and Communications

There are two ports in Brunei. Most sea traffic is handled by a deep-water port at Muara. Brunei International airport was opened in 1974. Roads link the important towns, and carry most freight traffic. A B\$8 million earth satellite ground station was opened in September 1979. By the end of 1982 a second station (at a cost of B\$30 million) was expected to be in operation.

Social Welfare

Free medical services are provided by the State. Cases which cannot be treated in Brunei are sent overseas for treatment. In 1978 there were 785 hospital beds. There is a flying doctor service as well as various clinics, travelling dispensaries and dental clinics. A non-contributory state pensions scheme for the old and disabled came into operation in 1955. The State also provides financial assistance to the poor, destitute and widows.

Education

Education is free. Pupils who are Brunei citizens and live over 5 miles (8 km.) from their schools are entitled to free accommodation in hostels, free transport or a subsistence allowance. Schools are classified according to the language of instruction, i.e. Malay, English or Chinese (Mandarin). Total enrolment in primary schools was 33,053 in 1978, while in secondary schools and sixth-form centres the enrolment was 15,571. There are two teacher training colleges. Brunei has no university, but many pupils are sent to universities abroad at government expense.

Tourism

Tourism is relatively underdeveloped though there are the beginnings of a tourist industry. In 1979 3,561 tourists visited Brunei. The Five-Year Plan (1975-79) emphasized the expansion of tourism.

Public Holidays

1982: May 21st (Merja, Ascension of the Prophet*), May 31st (Anniversary of the Royal Brunei Malay Regiment), June 15th (Queen's Official Birthday), June 23rd (First Day of Ramadan), July 9th (Anniversary of the Revelation of the Koran), July 15th (Sultan's Birthday), July 23rd (End of Ramadan), September 29th (Constitutional Day and Hari Raya Haji), October 19th (Muslim New Year), December 25th and 27th (Christmas), December 28th (Mouloud, Birth of the Prophet).

1983: January 1st (New Year's Day), January 25th-27th (Chinese New Year)†.

Weights and Measures

The imperial system is in operation but local measures of weight and capacity are used. These include the Gantang (1 gallon), the Tabil (1½ oz.) and Kati (1½ lb.).

Currency and Exchange Rate

100 cents = 1 Brunei dollar (B\$).

Exchange rates (October 1981):

£1 sterling = B\$3.906;

U.S. \$1 = B\$2.099.

FINANCE

100 sen (cents) = 1 Brunei dollar (B\$).

Coins: 1, 5, 10, 20 and 50 cents.

Notes: 1, 5, 10, 50 and 100 dollars.

Exchange rates (October 1981): B\$1 = 1 Singapore dollar; £1 sterling = B\$3.906; U.S. \$1 = 2.099.
B\$100 = £25.60 = \$47.64.

Note: The Brunei dollar (B\$) was introduced in June 1967, replacing (at par) the Malayan dollar (M\$). From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M\$8.5714) or 32.667 U.S. cents (U.S. \$1 = M\$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Brunei dollar was valued at 35.467 U.S. cents (U.S. \$1 = B\$2.8195). From February to June 1973 the Brunei dollar's value was 39.407 U.S. cents (U.S. \$1 = B\$2.5376). In terms of sterling, the exchange rate was £1 = B\$7.347 from November 1967 to June 1972. The formal link with the Malaysian dollar, begun in June 1967, ended in May 1973 but the Brunei dollar remained tied to the Singapore dollar. Since June 1973 the Singapore dollar has been allowed to "float". The average market exchange rate (B\$ per U.S. \$) was: 2.809 in 1972; 2.444 in 1973; 2.437 in 1974; 2.371 in 1975; 2.471 in 1976; 2.439 in 1977; 2.274 in 1978; 2.175 in 1979; 2.141 in 1980.

THE CONSTITUTION

Note: Parts of the constitution have been in abeyance since 1962.

A new constitution was promulgated on September 29th, 1959. Under it sovereign authority is vested in the Sultan, who is assisted and advised by five Councils:

The Religious Council: In his capacity as head of the Islamic Faith, the Sultan is advised in all Islamic matters by the Religious Council, whose members are appointed by the Sultan.

The Privy Council: This Council, presided over by the Sultan, is to advise the Sultan on matters concerning the Royal prerogative of mercy, the amendment of the constitution and the conferment of ranks, titles and honours.

The Council of Ministers: Presided over by the Sultan, the Council of Ministers considers all executive matters as well as those raised by the Legislative Council. It is composed of 11 members.

The Legislative Council: This council is presided over by a Speaker appointed by the Sultan. The Council introduces Bills, passes laws, exercises financial controls and scrutinizes government policies.

The Council of Succession: Subject to the Constitution this Council is to determine the succession to the throne should the need arise.

A Mentri Besar (Chief Minister) is responsible to the Sultan for the exercise of all executive authority. He is assisted by a State Secretary, an Attorney-General and a State Financial Officer.

The State is divided into four administrative districts, in each of which is a District Officer (Malay) responsible to the State Secretary.

THE GOVERNMENT

(December 1981)

The Sultan: H.H. Sir MUDA HASSANAL BOLKIAH MU'IZZAD-DIN WADDAULAH (succeeded October 5th, 1967; crowned August 1st, 1968).

General Adviser to H.H. The Sultan: Pehin Dato Haji ISA.

Mentri Besar (acting): Pehin Dato Haji ABDUL AZIZ.

State Secretary (acting): Dato ABDUL RAHMAN TAIB.

State Financial Officer: Pehin Dato JOHN LEE, C.B.E.

Attorney-General: Pengiran LAILA KANUN DI-RAJA
Pengiran BAHRIIN.

Head of Religious Affairs: Pehin Dato Haji MOHAMMAD
ZAIN bin Haji SERUDDIN.

There are two other political organizations, Parti Ra'ayat Brunei (Brunei People's Party), which is banned, and Parti Perpaduan Kebangsaan Ra'ayat Perkara (Brunei People's National United Party), founded in 1968 but no longer active.

DIPLOMATIC REPRESENTATION

Brunei's external relations are conducted by the United Kingdom.

The British High Commission: Jalan Residency, Bandar Seri Begawan; *High Commissioner:* ARTHUR C. WATSON, C.M.G.

JUDICIAL SYSTEM

The Supreme Court consists of the High Court and the Court of Appeal. There are also Magistrates' Courts of First, Second and Third Class.

The Supreme Court: Consists of the Chief Justice and Commissioners of the Supreme Court appointed by the Sultan. The High Court has unlimited original jurisdiction in most civil matters and unlimited criminal jurisdiction.

Courts of Magistrates: There are Courts of Magistrates of the First, Second and Third Class. They have original jurisdiction in minor civil and criminal cases.

Courts of Kathis: Deal solely with questions concerning Muslim religion, marriage and divorce. Appeals lie from these Courts to the Sultan in the Religious Council.

Chief Justice: Sir DENYS ROBERTS.

President, Court of Appeal: Dato Sir GEOFFREY BRIGGS.

Chief Kathi: Pehin Dato IMAM Dato PADUKA Seri SETIA
Awang Haji ABDUL HAMID BIN BAKAL.

RELIGION

The official religion of Brunei is Islam, and the Sultan is head of the Islamic population. Muslims number about 60,000, most of them Malays. The Chinese population is either Buddhist, Confucianist, Daoist or Christian. Large numbers of the indigenous races are animists of various types. The remainder of the population are Roman Catholics, Anglicans or members of the American Methodist Church of Southern Asia.

TRANSPORT

RAILWAYS

There are no public railways in Brunei. The Brunei Shell Petroleum Co. Ltd. maintains a 19.3-km. section of light railway between Seria and Badas.

ROADS

There are some 576 kilometres of roads in Brunei and these are supplemented by 132 kilometres of district tracks. The main highway connects Bandar Seri Begawan, Tutong and Kuala Belait. A new 59-km. coastal road is currently under construction between Muara and Tutong.

SHIPPING

Most sea traffic is handled by a deep-water port at Muara, 27 km. from the capital. The original, smaller port at Bandar Seri Begawan itself is mainly used for river-going vessels. There is a port at Kuala Belait and a tanker terminal at Seria handling shipments of crude oil. At

Trade and Industry, Transport, Tourism

Lumut there is a two-mile jetty for liquefied natural gas (LNG) carriers.

Rivers are the principal means of communication in the interior.

BURMA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Socialist Republic of the Union of Burma lies in the north-west region of South-East Asia between the Tibetan plateau and the Malayan peninsula. It is bordered by Bangladesh and India to the north-west, China and Laos to the north-east and Thailand to the south-east. The climate is tropical, with an average temperature of 27°C (80°F) and monsoon rains from May to October. The official language is Burmese and there are also a number of tribal languages. About 80 per cent of the population are Buddhists. There are Christian, Hindu and Muslim minorities, and there is a Chinese community of some 350,000. The national flag is red with a blue canton bearing two ears of rice within a cogwheel and a ring of 14 stars, all in white. The capital is Rangoon.

Recent History

Burma was annexed to British India during the nineteenth century. It was separated from India in 1937 with a limited measure of self-government. Japanese forces occupied the country in 1942 and granted nominal independence under a government of anti-British nationalists. The Burmese nationalists later turned against Japan and aided Allied forces to retake the country. They formed a resistance movement, the Anti-Fascist People's Freedom League (AFPFL) led by Gen. Aung San, which became the main political force after the defeat of Japan. Aung San was assassinated in July 1947 and was succeeded by U Nu. On January 4th, 1948, the Union of Burma became independent, outside the Commonwealth, with U Nu as the first Prime Minister.

During the first decade of independence Burma was a parliamentary democracy and resisted revolts by communist and other insurgent groups. In 1958 the ruling AFPFL split, precipitating a political crisis. U Nu invited the Army Chief of Staff, Gen. Ne Win, to head a caretaker government and restore order. Elections in February 1960 gave an overwhelming majority to U Nu, leading the Union Party, and he resumed office in April. Despite its popularity, however, the U Nu administration proved ineffective and in March 1962 Gen. Ne Win intervened again, this time by staging a coup to depose U Nu. The new Revolutionary Government suspended the constitution and instituted authoritarian control through the Government-sponsored Burma Socialist Programme Party (BSPP). All other political parties were outlawed in March 1964.

The next decade saw the creation of a more centralized system of government, representing an attempt to win popular support and nationalize the economy. A new constitution, aiming to transform Burma into a democratic socialist state, was drafted and finally approved in a national referendum in December 1973. Under this constitution new governmental organizations were created, the BSPP became the sole authorized political party and the country's name was changed to the Socialist Republic of the Union of Burma. In March 1974 Ne Win (who, together

with other senior army officers, became a civilian in 1972) was elected President by the new State Council.

During 1974 and early 1975 government security forces achieved some success in suppressing various insurgent minority groups, but no concrete victories were won, and the rebels, seeking varying degrees of autonomy, continued their resistance. In 1977 the Government adopted new economic policies to calm unrest over food shortages and social injustices, and during the year several ministerial changes took place. General elections held in January 1978 gave Ne Win a mandate to rule for a further four years and in March he was re-elected Chairman of the State Council. In May 1980 President Ne Win declared a general amnesty for political prisoners and political exiles and rebels, including the former Prime Minister, U Nu, who returned from exile in India at the end of July. The Government estimated that a total of 2,189 exiles had taken advantage of the amnesty, but few ranking members of the rebel forces surrendered.

In May 1981 the Burmese Government had secret peace talks with the underground Burmese Communist Party (BCP). However, the BCP's demands for official recognition and for the integration of its armed forces into the Burmese army were found unacceptable by the Government and talks broke down. Throughout the remainder of 1981 the Government forces were still involved in continuous fighting with the BCP and other insurgent groups such as the Shan State Army and the Kachin Independence Army, which continue to receive financial and military aid from the People's Republic of China.

At the fourth congress of the BSPP in August 1981, Ne Win announced that he intended to give up the office of President, but remained Chairman of the Party, thereby retaining his commanding position in Burmese politics. In November Gen. San Yu, former Army Chief of Staff, was elected President by the People's Assembly. The general election due in 1982 was brought forward to October 1981.

Government

Under the constitution which came into force in January 1974, the highest organ of state is the 475-member People's Assembly (*Pyithu Hluttaw*), a legislative body elected by the people. From among its members the Assembly elects a State Council (29 members). The Council is the chief decision-making organ of government and co-ordinates the work of central and local governmental organs. The Assembly also elects the Council of Ministers (which is responsible for the public administration of the State), the Council of People's Justices, the Council of People's Attorneys and the Council of People's Inspectors. The state, formerly a federation, is now unitary, and is divided into States or Divisions. These in turn are divided into townships, and townships into wards or village-tracts. People's Councils exist for every sub-division at each of these levels.

Defence

Burma maintains neutrality and has no external defence treaties. The armed forces are largely engaged in internal

security duties. In July 1981 the armed forces totalled 179,000 men, of whom 163,000 were in the army, 7,000 in the navy and 9,000 in the air force. Paramilitary forces comprise a People's Police Force of 38,000 men and a People's Militia of 35,000 men. Defence expenditure allocated for 1980/81 was 1,114.7 million kyats.

Economic Affairs

Burma is rich in agricultural, fishery, timber, mineral and water resources. Agriculture, still using mainly traditional methods, produces about one-third of the G.D.P. and in 1980 employed 66 per cent of the labour force. Rice, timber and other agricultural products have traditionally been the main export items. The introduction of high-yield agricultural programmes, concentrating initially on rice, allowed paddy production to rise by 45 per cent between 1975/76 and 1980/81, when the rice harvest exceeded 13 million metric tons, more than double pre-war production figures. Burma has the largest hardwood stands in the world and timber export earnings reached 797 million kyats in 1980/81, compared with 281 million kyats in 1975/76.

Burma has significant deposits of petroleum, tin, copper and coal. However, insurgent activity and an inefficient and expensive system of internal transport have prevented Burma from attaining many pre-war production levels. Despite this, Burma achieves virtual self-sufficiency in crude petroleum and produced 11.2 million barrels in 1980/81. Three commercially viable oilfields were discovered between June and October 1981: the Tantabin, Kyontani and Pagan-Tuyintaung oilfields are estimated to have total recoverable reserves of 1,717 million barrels of crude oil. Natural gas production is also increasing, from 8.7 million cubic feet in 1977/78 to 12.6 million cubic feet in 1978/79.

The manufacturing sector in Burma is small, accounting for 9.8 per cent of the G.D.P. in 1977/78, but was expected to achieve a growth rate of 12.2 per cent during the third Four-Year Plan. The principal industrial activities are related to agriculture: food processing and the manufacture of tobacco products. Petroleum refining and textiles are also important.

Industry, transport, internal and external trade, communications and finance have been nationalized since the 1962 revolution. In 1973 the Government began to relax its opposition to foreign investment and aid and joined the Asian Development Bank, which, together with the IBRD, provides most of Burma's multilateral support. External debt rose from U.S. \$300 million in 1975 to U.S. \$1,700 million in 1980/81.

Economic growth has been slow, with production rising only slightly faster than the population. The third Four-Year Plan, launched in April 1978, aimed to raise the G.D.P. by 6.6 per cent annually. The growth rate for the first three years of the Plan averaged 6.7 per cent, with a record 8.3 per cent in 1980/81. Burma's 1982-86 Four-Year Plan will continue to emphasize the development of agriculture as opposed to an increase in industrial capacity. Despite a trading surplus of 465 million kyats in 1979/80, Burma's economy suffers from extensive "black market" trading, which is thought to have a turnover of as high as 50 per cent of official trading.

Burma's principal trading partner is Japan, which supplied 44.7 per cent of imports and took 18.4 per cent of exports in 1978.

Transport and Communications

The chief artery of traffic is the river Irrawaddy, which is navigable as far as Bhamo, 900 miles (1,450 km.) inland, and some parts of the Salween and the Chindwin are navigable. Railways have been modernized by the introduction of diesel engines and in 1979 comprised 2,721 track miles (4,379 km.). Burma Airways Corporation provides internal and international air services. All the railways, domestic air services, passenger and freight road transport services and the other major inland water facilities are owned and operated by the State. In 1979 there were 16,812 miles (27,056 km.) of motorable roads. In February 1979 a satellite communications station was opened, linking Burma with 114 other countries.

Social Welfare

Burma has fairly well-developed health facilities but they are not comprehensive. In 1981 there were 589 hospitals with 24,378 beds. Health treatment is free. State public health expenditure in 1980/81 was estimated at 360 million kyats. About 500,000 workers are covered by social security insurance and all workers are entitled to state pensions.

Education

Education is free, where available. The third Four-Year Plan aims to make basic education accessible to all. In 1978/79 there was a total of 24,907 schools, comprising 23,009 primary schools, 1,302 middle schools and 596 high schools. Total student enrolment was 4.7 million, of which 3.7 million were at primary school level. 924,739 in secondary education, 9,576 in vocational education, and 112,671 were engaged in higher education or university. There were 116,512 teachers. Emphasis is placed on vocational and technical training. There are two universities. In 1979/80 expenditure on education was estimated at 560 million kyats.

Tourism

Tourism is undeveloped. Rangoon, Mandalay and Pagan possess outstanding palaces, Buddhist temples and shrines. In 1979 an estimated 22,164 tourists visited Burma.

Public Holidays

1982: May 1st (World Workers' Day), July 19th (Martyrs' Day), December 25th (Christmas).

1983: January 4th (Independence Day), February 12th (Union Day), March 2nd (Peasants' Day, anniversary of 1962 coup), March 27th (Resistance Day).

In addition to the above, the usual Buddhist holidays are observed.

Weights and Measures

The imperial system is in force.

Currency and Exchange Rates

100 pyas = 1 kyat.

Exchange rates (October 1981):

£1 sterling = 13.69 kyats;

U.S. \$1 = 7.32 kyats.

Coins: 1, 5, 10, 25 and 50 pyas; 1 kyat.

Notes: 1, 5, 10, 20, 25, 50 and 100 kyats.

Exchange rates (October 1981): £1 sterling=13.69 kyats; U.S. \$1=7.32 kyats.

100 kyats=£7.305=\$13.653.

Note: Between September 1949 and August 1971 the kyat (known as the Burmese rupee before 1952) had a par value of 21 U.S. cents (U.S. \$1=4.7619 kyats). From December 1971 to February 1973 the central exchange rate was \$1=5.3487 kyats (1 kyat=18.696 U.S. cents). Between February 1973 and August 1974 the rate was \$1=4.8138 kyats (1 kyat=20.773 U.S. cents). From August 1974 to January 1975 the currency was subject to "controlled floating". In January 1975 the kyat was linked to the IMF Special Drawing Right, initially at a mid-point of 1 SDR=7.7429 kyats. In May 1977 a new rate of 1 SDR=8.5085 kyats was established. The exchange rate against the U.S. dollar is adjusted from month to month. The average market rate (kyats per \$) was: 5.454 in 1972; 4.907 in 1973; 4.858 in 1974; 6.454 in 1975; 6.770 in 1976; 7.136 in 1977; 6.865 in 1978; 6.651 in 1979; 6.609 in 1980. In terms of sterling, the value of the kyat between November 1967 and August 1971 was 1s. 9d. (8.75p), the exchange rate being £1=11.4286 kyats; from December 1971 to June 1972 the rate was £1=13.937 kyats.

THE CONSTITUTION

The constitution came into force on January 3rd, 1974, following a national referendum held in December 1973. It is the basic law of the State. A summary of the main provisions follows:

GENERAL PRINCIPLES

The Socialist Republic of the Union of Burma is a sovereign, independent, social state. There shall be only one political party, the Burma Socialist Programme Party. Sovereign power rests with the people as represented by the People's Assembly. The State is the ultimate owner of all natural resources and shall exploit them in the interests of the people. The means of production shall be nationalized. National groups shall have the right to practise their religion and culture freely within the law and the national interest. The State shall follow an independent and peaceful foreign policy.

STATE ORGANS

The structure of the State is based on a system of local autonomy under central leadership. Government operates at four levels of administration: wards or village tracts, townships, states or divisions and at national level.

People's Assembly (Pyithu Hluttaw)

A unicameral legislature, the highest organ of State power, it exercises sovereign power on behalf of the people. It is elected directly by secret ballot for a term of four years. Regular sessions take place twice a year, the intervening period being no more than eight months. The People's Assembly may be dissolved if three-quarters of its members agree to it. It may delegate executive and judicial power to central and local state organs. It has the power to enact economic legislation, declare war and peace and the right to call referenda. It may constitute committees and commissions and invest them with powers and duties. Under certain circumstances the People's Assembly may dissolve the People's Councils.

State Council

The State Council is composed of 29 members including one representative from each of the 14 states and divisions, and the Prime Minister, elected by the People's Assembly from its members. The State Council elects a Chairman from its members who becomes President of the Union and represents the State. The term of office of the Council and the President is the same as that of the People's Assembly. The State Council is vested with executive power to carry out the provisions of the Constitution. It has the power to convene the People's Assembly in consultation with the panel of Chairmen of the Assembly. It interprets and promulgates legislation, makes decisions concerning diplomatic relations, international treaties and agreements. It is responsible for the appointment of the heads of the bodies of the public services. The State Council has the power to grant pardons and amnesties. It may make orders with the force of law between sessions of the People's Assembly, and may order military action in defence of the State, declare a state of emergency and martial law subject to the subsequent approval of the People's Assembly.

Council of Ministers

The highest organ of public administration, elected by the People's Assembly from a list of candidates submitted by the State Council. Its term of office is the same as that

of the People's Assembly. The Prime Minister is elected by the Council of Ministers from among its members. It is responsible for the management of public administration and drafting economic measures and submitting them to the People's Assembly for enactment.

Council of People's Justices

The highest judicial organ. Elected by the People's Assembly from a list of its members submitted by the State Council. Its term of office is the same as that of the People's Assembly. The People's Councils form judges' committees at local levels.

Council of People's Attorneys

Elected by the People's Assembly from a list of members submitted by the State Council. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for directing state, divisional and township law officers, protecting the rights of the people and supervising the central and local organs of state power.

Council of People's Inspectors

Elected by the People's Assembly from a list of candidates submitted by the State Council. Its term of office is the same as that of the People's Assembly. It is responsible to the People's Assembly for the inspection of the activities of the local organs of state power, ministries and public bodies. There are also local inspectorates at each administrative level, responsible to the People's Council concerned.

People's Councils

The term of office of the People's Councils is the same as that of the People's Assembly. They are elected at different levels according to law. They are responsible for local economic and social affairs and public administration, the administration of local justice, local security, defence and the maintenance of law and order. Each of the People's Councils elects an executive committee to implement its decisions. The Executive Committees each elect a Chairman and a Secretary from among themselves who are also the Chairman and Secretary of the People's Council concerned.

FUNDAMENTAL RIGHTS AND DUTIES OF CITIZENS

All citizens are equal before the law irrespective of race, religion, sex or other distinction. Every citizen has the right to enjoy the benefits derived from labour, to inherit, to settle anywhere in the State according to law, to medical treatment, education and rest and recreation. Freedom of thought, conscience and expression are upheld subject to the law and the interests of state security. All citizens are bound to abstain from undermining the sovereignty and security of the State and the socialist system.

ELECTORAL SYSTEM

All citizens over 18 years are entitled to vote. Those whose parents are both citizens may stand for election to office having attained the age of 20 years (Village and Township Councils), 24 years (State and Divisional Councils), 28 years (People's Assembly). Members of religious orders and others disqualified by law are prohibited from voting or standing for election.

BURUNDI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Burundi lies on Lake Tanganyika in central Africa, a little south of the Equator. Rwanda is to the north, Tanzania to the south and east and Zaire to the west. The climate is tropical with an irregular rainfall. The official languages are French and Kirundi; and Swahili is used in addition to French in commercial circles. Missions have converted more than half the population from the traditional animist beliefs to Roman Catholicism. The national flag (proportions 3 by 2) consists of a white diagonal cross on a background of red and green, with a white circle containing three green-edged red stars in the centre. The capital is Bujumbura.

Recent History

Burundi (formerly Urundi) became part of German East Africa in 1899. In 1916, during the First World War, it was occupied by Belgian forces from the Congo (now Zaire) and, as part of Ruanda-Urundi, was administered by Belgium under a League of Nations mandate and later as a UN Trust Territory. Elections in September 1961 were won by the UPRONA (Unity and National Progress) Party which had been formed in 1958 by Ganza (Prince) Louis Rwagasore, son of the reigning Mwami (King), Mwambutsa IV. Prince Rwagasore became Prime Minister, but was assassinated after only two weeks in office. He was succeeded by his brother-in-law, André Muhirwa. Internal self-government was granted in January 1962 and full independence on July 1st, 1962, when the two parts of the Trust Territory became separate states. Burundi continued to be linked to Rwanda in a customs and monetary union, until the agreements were terminated in January 1964. In July 1966 the Mwami was deposed after a reign of over 50 years by his son Charles, with the help of a group of army officers, and the constitution suspended. In November 1966 Charles, now Mwami Ntare V, was himself deposed by his Prime Minister, Captain (later Lieut.-Gen.) Michel Micombero, who declared Burundi a republic.

Micombero's rule confirmed the long established dominance of the Tutsi tribe élite over the Hutu tribe who form the majority of the population. Several alleged plots against the Government in 1969 and 1971 were followed in 1972 by an abortive coup during which Ntare V was killed. The Hutus were held responsible for the attempted coup and this served as an excuse for the Tutsis to conduct a series of large-scale massacres of the rival tribe. Many Hutus fled to neighbouring countries and repression of the tribe continued.

In 1972 Micombero began a prolonged restructuring of the executive which resulted in 1973 in an appointed seven-man Presidential Bureau, with Micombero holding the dual office of President and Prime Minister. A new republican constitution was introduced in July 1974 which vested sovereignty in UPRONA, the sole legal political party in Burundi. The President was elected Secretary General of the party and re-elected for a seven-year presidential term.

On November 1st, 1976, an army coup deposed Micombero. Lieut.-Col. (from 1977 Col.) Jean-Baptiste Bagaza was appointed President by the Supreme Revolutionary Council (composed of army officers), and a new Council of Ministers formed. The Prime Minister, Lieut.-Col. Edouard (Ndugu) Nzambimana, announced in mid-1977 the military rulers' intention to hand over power to a civilian government in 1981.

The 1978-82 five-year plan elaborated on the Government's general policy as defined in the Declaration of Fundamental Aims of November 20th, 1976, the main objectives being social justice and unity throughout the country, based on the elimination of corruption in the administration. As Burundi is one of the most densely populated countries in Africa, the plan aimed at achieving an expanding economy, higher food production to support a rapidly increasing population, and lower unemployment.

In October 1978 President Bagaza announced a cabinet reshuffle in which he abolished the post of Prime Minister. The first national congress of UPRONA was held in December 1979 and a party Central Committee, headed by President Bagaza, was elected to take over the functions of the Supreme Revolutionary Council in January 1980. On November 18th, 1981, a draft constitution was approved in a national referendum. Its provisions included the election of a president for a five-year term by universal adult suffrage, and of representatives to a National Assembly, with legislative powers, for a similar period. President Bagaza, having been elected in 1979, does not need to stand for re-election until 1984.

Government

Legislative power is exercised by the President of the Republic and is embodied in decree-laws after consultation with Ministers and the approval of the Council of Ministers, which meets every Friday. The latter is directly responsible for its policy to UPRONA, the sole legal political party. Policy issues are often directed by the UPRONA Central Committee. There are eight provinces, administered by civilian governors, each of which is divided into districts and further sub-divided into communes.

Defence

The army was merged with the police force in 1967 and total armed strength in July 1981 was about 6,000 men. There were also 1,500 paramilitary personnel. Defence expenditure in 1980 was about U.S. \$35.5 million.

Economic Affairs

The economy is based almost entirely on agriculture, the main subsistence crops being cassava and sweet potatoes and the main cash crops coffee and cotton. Coffee is Burundi's principal export and accounted for 89 per cent of earnings in 1980, the main customer being the U.S.A. Because of the importance of this industry, the Government took over the coffee factories of four companies by a decree-law in 1977. Tea is being developed and the Government planned to raise output by building new

tea-processing factories and by aiming to have 4,680 hectares under tea cultivation by 1980/81, compared with 2,800 hectares in 1975. The EEC countries, in particular Belgium, Luxembourg, France and Federal Germany, are among the main trading partners, but continue to provide more imports than they take exports. In 1977 export revenue from coffee was high even though the crop yield was lower than in the previous year, but in 1978 international prices for coffee fell sharply, causing the value of exports to drop by 32 per cent and the balance of trade to register a deficit of 2,815 million Burundi francs, compared with a surplus of 1,800 million francs in 1977. Revenue from coffee exports rose by over 63 per cent in 1979 but the trade deficit continued to increase, reaching 9,248.4 million francs in 1980. The inflation rate was 12.8 per cent in 1980, compared with 23.8 per cent in 1978.

The mining industry is based on the exploitation of small amounts of gold, bastnaesite, cassiterite, tungsten and tantalum. Important deposits of nickel, estimated at three per cent of world reserves, and uranium are being surveyed, and petroleum has been detected in the Ruzizi valley. The 1978-82 Development Plan included projects to open nickel mines. Manufacturing industry is, however still in its infancy, accounting for less than one-tenth of Gross Domestic Product and consisting largely of the processing of agricultural products. Many industrial and consumer goods have to be imported, but a native textile industry has been developed and plans were being considered in 1981 to build a complex near Bujumbura which would make the country self-sufficient in sugar. In September 1976 Burundi established, with Zaire and Rwanda, the Economic Community of the Great Lakes Countries (CEPGL) and in 1974 trade agreements were reached with the EEC.

Most foreign aid to Burundi comes from Belgium, France and Federal Germany and through the EEC's European Development Fund and the World Bank. The African Development Fund and Development Bank and the Arab Bank for Economic Development in Africa have also made substantial development loans to Burundi.

Unemployment has always been an enormous problem. A 1976 regulation gave the Department of Employment exclusive control over employment by obliging all those seeking either work or employees to register at a central office. As 90 per cent of the population is rural, it is virtually impossible for unemployment in the countryside to decrease in absolute terms. The National Recovery Programme initiated in 1978 aimed to attack this problem by continuing efforts to alleviate the food scarcity. In 1977 a stocking and trading centre was established to co-ordinate the buying and selling of foodstuffs over the whole country. The Recovery Programme also aimed to promote intensive livestock farming and new crops such as soya beans, oil palms and sugar cane, and to create a farmers' co-operative.

Two dams are being built and a large joint hydro-electric scheme with Rwanda and Zaire is in its initial stages. These form a part of the Kagera River Basin project which also includes irrigation and mining development. Burundi's electricity supply at present comes from the hydro-electric station at Bukavu in Zaire. The exploitation

of Burundi's peat bogs will provide an additional source of energy.

Transport and Communications

There are no railways in Burundi, although in 1981 plans were being considered for the construction of a line passing through Rwanda and Burundi to connect with the Kigoma-Dar es Salaam line. Roads extend for over 10,000 km., of which 2,267 km. are national highways. Improvements have been made to the main roads linking Bujumbura and Gitega, and Bujumbura and Kayanza. It is also planned to extend the Bujumbura-Mutambara highway south to the Tanzania border, and to build a highway west from the capital to Rwanda and Zaire via Cibitoke and Changugu. There is passenger and freight traffic on Lake Tanganyika, with Bujumbura as the main port, and an international airport at Bujumbura equipped to take large jet aircraft.

Social Welfare

Wage-earners are protected by insurance against accidents and occupational diseases and can draw on a pension fund. Medical facilities are, however, limited. In 1975 Burundi had 4,489 hospital beds (one for every 857 inhabitants) and in 1978 there were 22 hospitals, nine maternity units and 100 dispensaries.

Education

Education is free but since 1972 its budget allocation has been severely reduced. It is estimated that the proportion of children aged 6 to 11 attending primary school fell from 35 to 23 per cent between 1970 and 1975. Burundi receives educational aid from UNDP, UNICEF, the World Food Programme, the EEC, Belgium, Switzerland and France. Kirundi is the language of instruction in the primary schools and French in secondary schools. In 1979/80 there were 160,495 pupils in primary schools, 7,967 in secondary, 1,918 in technical, and 6,525 student teachers. There is a university at Bujumbura with 1,763 students in 1979/80.

Tourism

Tourism is relatively undeveloped but the Government plans to encourage visitors and in 1977 a 150-bed hotel complex was built on the shores of Lake Tanganyika.

Notes: 10, 20, 50, 100, 500 and 1,000 francs.

Exchange rates (October 1981): £1 sterling = 168.2 francs; U.S. \$1 = 90.0 francs.

1,000 Burundi francs = £5.945 = \$11.111.

Note: The Burundi franc was introduced in May 1964, replacing (at par) the Rwanda-Burundi franc, valued at 2 U.S. cents (\$1 = 50.00 RB francs). This remained the exchange rate until January 1965. Between then and February 1973 the rate was \$1 = 87.50 Burundi francs (1 franc = 1.143 U.S. cents), despite the devaluation of the U.S. dollar in December 1971. From February 1973 to May 1976 the exchange rate was \$1 = 78.75 Burundi francs (1 franc = 1.270 U.S. cents). Since May 1976 the rate has been \$1 = 90.00 Burundi francs. In terms of sterling, the official exchange rate was £1 = 210 francs from November 1967 to August 1971; and £1 = 228 francs from December 1971 to June 1972.

Office National du Commerce (ONC): Bujumbura; f. 1974; responsible for the surveillance of international commercial operations between the Government of Burundi and other states or private organizations; also ensures the importation of necessary materials; separate branches in each province.

DEVELOPMENT ORGANIZATIONS

Caisse Centrale de Mobilisation et de Financement (CAMOFI): f. 1977 to finance development projects and businesses in the public sector.

Holding Arabe Libyen Burundais: f. 1977 to finance development projects and businesses.

Office de la Tourbe du Burundi (ONATOUR): f. 1977 to promote the exploitation of peat bogs.

Office des Cultures Industrielles du Burundi (OCIBU): supervises plantations and the exportation of their produce.

Société de Stockage et de Commercialisation des Produits Vivriers (SOBECOV): f. 1977 to stock and sell agricultural products in Burundi.

CHAMBER OF COMMERCE

Chambre de Commerce et de l'Industrie du Rwanda et du Burundi: P.O.B. 313, Bujumbura; f. 1923; Pres. M. R. LECLERE; Hon. Sec. M. T. POJER; 130 mems.

TRADE UNION

Union des Travailleurs du Burundi (UTB): B.P. 340, Bujumbura; sole authorized union for Burundi workers; f. 1967 by amalgamation of all previous unions; closely allied with UPRONA Party; Sec.-Gen. PIERRE-CLAVER KAYONDE.

TRANSPORT

RAILWAYS

There are no railways in Burundi but a rail link with Tanzania, financed by the World Bank, is likely to be built and will improve Burundi's at present isolated trade position.

ROADS

The road network is very dense and in 1977 there was a total of 10,476 km. of roads, of which 2,267 km. were national highways and 2,311 km. secondary roads.

INLAND WATERWAYS

Bujumbura is the principal port on Lake Tanganyika and the greater part of Burundi's external trade is dependent on the shipping services between Bujumbura and Tanzania, Zambia and Zaire.

CIVIL AVIATION

Air Burundi: B.P. 2460, 2 blvd. de l'Uprona, Bujumbura; f. 1971; formerly Société des Transports Aériens du Burundi; operates services to Kigali (Rwanda), Kigoma (Tanzania), Bukavu and Goma (Zaire), and internally from Bujumbura to Gitega; fleet of 1 Caravelle, 3 DC-3, 2 Piper Super Cub.

Air Zaire, Air France, Cameroon Airlines, Air Tanzania, Uganda Airways and Sabena (Belgium) operate services to Bujumbura, and flights to neighbouring countries are operated by a fleet of light aircraft.

TOURISM

Office National du Tourisme: B.P. 902, Bujumbura; f. 1972; Dir. LIBÉRAT NIYONDAGARA.
